This book is a modern exploration of how we engage with fashion today through the fields of Fashion, Dress, Material Culture, Fashion Management & Communication.

This volume explores the interconnection of social, political, technological and economic challenges that impact consumer relationships, new product launches and consumer interests. Featuring contributions presented at the 2019 Academy of Marketing Science (AMS) World Marketing Congress (WMC) held in Edinburgh, Scotland, the theme

of this proceedings draws from the Scottish Enlightenment movement of the mid-Eighteenth Century, which centered on ideas of liberty, progress and the scientific method. The core values of this movement are being challenged by the rapidly changing, globally shifting and digitally connected world. The contributions presented in this volume reflect and reframe the roles of marketers and marketing in incorporating and advancing the ideas of the Scottish Enlightenment within contemporary marketing theory and practice. Founded in 1971, the Academy of Marketing Science is an international organization dedicated to promoting timely explorations of

This book explores new approaches and strategies that luxury fashion brands could adopt in their operations toward sustainability goals. It addresses the unique challenges faced by luxury fashion brands, given that concepts of luxury and sustainability may be conflicting. In doing so, it elaborates on how fashion brands need to manage their suppliers to comply with and improve social and environmental conditions, the pressure to fulfill the triple-bottom lines, consumer demands for transparency, and social media and its advantages in achieving sustainability goals. Exploring the notion that luxury

fashion brands are in a better position to pursue superior sustainability performance, it presents research that highlights how the consequences of non-compliance could have more devastating effects on luxury brands than on mass-market brands. The book is a valuable resource for academics and practitioners in the field of business, sustainability, and fashion.

This proceedings volume explores the new and innovative ways in which marketers find new global customers and build meaningful bridges to them based on their wants and needs in order to ensure high levels of customer satisfaction. Customer loyalty is ensured through

continuous engagement with an ever-changing and demanding customer base. Global forces are bringing cultures into collision, creating new challenges for firms wanting to reach geographically and culturally distant markets, and causing marketing managers to rethink how to build meaningful and stable relationships with evermore demanding customers. In an era of vast new data sources and a need for innovative analytics, the challenge for the marketer is to reach customers in new and powerful ways. Featuring the full proceedings from the 2018 Academy of Marketing Science (AMS) World Marketing Congress (WMC) held in Porto, Portugal, this volume provides current and

The Luxury Strategy, written by two world experts on the subject, provides the first rigorous blueprint for the effective management of luxury brands and companies at the highest level. It rationalizes those business models that have achieved profitability and unveils the original methods that were used to transform small family businesses such as Ferrari, Louis Vuitton, Cartier, Chanel, Armani, Gucci, and Ralph Lauren into profitable global brands. By defining the differences between premium and luxury brands and products, analysing the nature of true luxury brands and turning established marketing 'rules' upside down, it has established itself as the definitive work on the essence of a luxury brand strategy. This fully revised second edition of The Luxury Strategy explores the diversity of meanings of 'luxury' across different markets. It also now includes a

section on marketing and selling luxury goods online and the impact of social networks and digital developments, cementing its position as the authority on luxury strategy.

Internationalization is an essential component of the business model for luxury fashion companies. Hence, regardless of their size, luxury firms have to develop in foreign markets to seek global demand, build a global image, and manage distribution and communications effectively. Filling a gap in current literature, this book examines the motives, processes, and forms assumed for the internationalization of luxury fashion companies and the relationship between internationalization and business models, with a focus on small and medium-sized enterprises (SMEs) and the specific challenges they face. The book proposes cases of Italian SMEs, being Italy a country

that is globally recognized as a key player in the luxury fashion industry. Specifically, the authors link internationalization with business models and discuss the business model of luxury fashion SMEs, characterized by "genetic internationalization". Finally, the authors address the main theoretical and managerial implications emerging from their empirical research and discuss the applicability of this model to luxury companies in general. Offering a comprehensive and in-depth view of luxury fashion SMEs, this book is targeted to students, scholars and practitioners interested in luxury firms, internationalization, and business models. Based on ongoing research at IDRAC Business School (France) and drawing from guest lectures at international partner universities, this volume discusses the changing landscape of 21st century

business. Written by scholars and practitioners across the globe, it covers a number of business-related issues, ranging from contemporary consumer trends to management styles, underscoring the notion of the global village and drawing attention to subtle differences. The book will appeal to undergraduates, postgraduates and managers who have an interest in how theories can be used to explain and identify the changes taking place in the global, online business environment.

Vast markets for high-symbolic-value goods serve as an expansive worldwide arena where luxury brands and products compete for consumer attention. publication is an extensive reference source for practitioners, academics, researchers, and students interested in the dynamics of the fashion industry. Despite being vastly different both socially and economically, art and fashion are increasingly converging to collaborate in mutually advantageous ways. This book discusses the mutual benefits of collaboration through analysis of successful case studies, including corporate art collections and museums, patronage and sponsorship initiatives, and art-based brand management in the fashion sector. It provides

a categorization of the strategies that fashion firms employ when they join the art world and illustrates how art and fashion brands can interact strategically at different levels. This book will be a valuable resource to researchers, providing an enhanced understanding of the potential of artification for managing brands and products. The first comprehensive analysis of the emergence of academic brands, this book explores how the modern university is being transformed in an increasingly global economy of higher education where

luxury is replacing access. More than just a sign of corporatization and privatization, academic brands provide a unique window on the university's concerns and struggles with conveying 'excellence' and reputation in a competitive landscape organized by rankings, while also capitalizing on its brand to generate revenue when state support dwindles. This multidisciplinary volume addresses topics including the uniqueness of academic brands, their role in the global brand economy of distinction, and their vulnerability to problematic social and political

associations. By focusing on brands, the volume analyzes the tensions between the university's traditional commitment to public interest values – education, research, and the production of knowledge – and its increasingly managerial culture framed by corporate, private values. China's love for luxury is not a phenomenon brought on by the contemporary luxury market, but has been a part of Chinese culture and history for generations. The Chinese luxury industry is again re-emerging along modern cultural and socio-economic contexts, and is taking the market by storm. Luxury the Chinese Way identifies the main strengths and opportunities associated with the Chinese luxury market, explains the influence of 'Chinese characteristics' on its development and mode of

Access Free Luxury Fashion Branding Trends Tactics Techniques

operations, and reflects on the challenges associated with diverse consumption orientations. Using references from the fields and real-life data, this book provides a comprehensive overview on China's innovation in luxury, and is an important contribution to the study of the phenomenon that is the global luxury industry.

In recent times, the advent of new technologies, the concerns about sustainability, and the new tastes of the youngest generations of luxury consumers have affected the traditional dynamics of the luxury goods markets. These emerging issues have caused significant changes in the marketing of luxury goods. Sustainable development is not a new practice in the luxury market but is of increasing importance. The real challenge is for luxury

Access Free Luxury Fashion Branding Trends Tactics Techniques

companies to overcome the residual corporate social responsibility perspective to embrace a real integration of environmental, ethical, and social concerns into the corporate strategy. Integrated output and sustainable processes, the introduction of non-financial reporting as operational practice, and a new orientation to circular economy practices are emerging issues that still today request for a deeper exploration both on the academic and managerial point of view. Digitalization is another relevant issue that is reshaping the business model of luxury companies. Big data, blockchain, omnichannel experience, and digital customer experience represent the main digital challenges that luxury brand companies are facing nowadays. Luxury brands must keep up with these digital

Access Free Luxury Fashion Branding Trends Tactics Techniques

demands and sustainability concerns to maintain their position in the global market. Developing Successful Global Strategies for Marketing Luxury Brands upgrades the most relevant theoretical frameworks and empirical research about the marketing of luxury goods. This book is focused on contemporary issues affecting luxury industries such as digital transformation (blockchain, big data, analytics, innovation processes), sustainable development, changes in luxury consumers' behavior, integration between physical and online channels, and the development of social media marketing strategies. Chapters will cover areas of marketing, management, buyer behavior, and international business, creating a multidisciplinary approach for this book. This book is ideal for scholars, local government

agencies and public bodies, managers, luxury business owners, along with practitioners, stakeholders, researchers, academicians, and students who are interested in emerging issues affecting the luxury market, such as sustainability and digital transformation.

This groundbreaking fashion branding and management text brings an analytical business dimension to the marketing and corporate techniques of the luxury fashion goods industry. It will make engaging reading for anyone who wishes to learn about the captivating business of turning functional products into objects of desire.

This book provides a contemporary theoretical insight into the fashion and luxury industry, addressing potential gray areas within the literature. The

Access Free Luxury Fashion Branding Trends Tactics Techniques

authors analyze the luxury and fashion industry using multiple perspectives, allowing for a critical comprehensive overview of the phenomenon across diverse streams. The book provides insight into fashion and luxury retailing in the context of both online and brick and mortar retailers based on a variety of market scenarios. It deciphers the rationale of customer behavioral and decision making in online and offline luxury and fashion purchasing contexts. It provides an overview of the challenges that the industry faces with the advent of the evolving omni-channel environment. The multiple theoretical and practical nuances of the fashion and luxury industry are presented. In this sense, the book is a fundamental reference point for the students and academics. This book will be of interest to practitioners in the fashion and

Access Free Luxury Fashion Branding Trends Tactics Techniques

luxury retailing sectors. Also, many policy makers will find the conceptual and exploratory insight of this book relevant to their organizational and retailing policies. The new knowledge that is produced in this book is a ground breaker in the fashion and luxury literature. It offers insight from both theoretical and practical perspectives from both retailer and customer perspectives.

Offering an original contribution to the field of luxury and fashion studies, this edited collection takes a philosophical perspective, addressing the idea that humans need luxury. From this framework it delves deep into two particular dimensions of luxury, emotions and society, and concludes with cases of brand building in order to illustrate the two dimensions at work. Comparative analysis between countries is brought together with an emphasis on China. Chapters address the ongoing growth in the market, as well as the significant changes in the sector brought

about by fast international expansion and an increased focus on ethical supply and sustainability, making the book an insightful read for scholars of fashion business, luxury and branding.

This book addresses the No 1 challenge of all major luxury brands today: How can these brands pursue their growth yet remain luxury? How do you reconcile growth and rarity? Kapferer on Luxury offers a selection of the most recent and insightful articles and original essays on the luxury growth challenge from Jean-Noël Kapferer, a world-renowned

luxury analyst. Each chapter addresses a specific issue relating to the luxury growth challenge such as sustaining the 'luxury dream', adapting the internet to luxury demands, re-widening the gap with premium brands' competition, and the importance of non-delocalization. It also explores in detail facing the demand of the Chinese clients, rising sustainable quality and experiential standards, developing real luxury services and managing luxury brands within groups without diluting their equity and more. As such, Kapferer on Luxury is the

perfect and timely resource for luxury executives, communication managers, luxury observers and advanced students willing to deepen their understanding of this major luxury challenge.

This second volume in the Palgrave Studies in Practice: Global Fashion Management series focuses on core strategies of branding and communication of European luxury and premium brands. Brand is a critical asset many firms strive to establish, maintain, and grow. It is more so for fashion companies when consumers purchase styles,

dreams and symbolic images through a brand. The volume starts with an introductory chapter that epitomizes the essence of fashion brand management with a particular emphasis on emerging branding practices, challenges and trends in the fashion industry. The subsequent five cases demonstrate how a family workshop from a small town can grow into a global luxury or premium brand within a relatively short amount of time. Scholars and practitioners in fashion, retail, branding, and international business will learn how companies can establish a

strong brand identity through innovative strategies and management.

This book explores the luxury industry and how it has undoubtedly been one of the fastest-growing sectors since the 1970s, and one in which Europe has managed to strengthen its competitiveness in the world market. While many aspects of globalization remain abstract and intangible, the luxury industry has created markets where previously there were none, by educating Japanese about the history of French handbags, Chinese about the finest wines, and

setting global standards for an elite, inspirational lifestyle. In this edited volume, a wide range of scholars comes together to analyze the history of the business and the innovations in management and marketing that have emerged from it. Invaluable for scholars, industry figures, and dilettantes alike, it will define the field of study for years to come.

The fashion and luxury industries

have been well-established for centuries, but the new disruptive digital environment is causing these industries to rethink their business case and adapt their brand offerings for consumers and experiences both online and offline, mixing physical place and digital space: phygital.

This exciting new text, the first on this timely subject, written by an expert author explores the current malaise and offers ways forward through a mixture of research and practice-led examples.

Exploring the elements that constitute the perceived luxuriousness of a brand, this book addresses the changing definitions of the term 'luxury' in today's

Access Free Luxury Fashion Branding Trends Tactics Techniques

world. Taking the approach that the concept of luxury evolves from the consumer, the author introduces a conceptual model which explains how the consumer interprets the luxuriousness of a brand. This innovative study analyses the key elements that influence luxury branding, such as extended product, perceived uniqueness, authenticity and context specificity. By critically reflecting on the existing definitions of luxury and its challenges, this book makes a unique contribution to research and an essential read for marketing students and scholars. The marketing of luxury brands is a highly complex and difficult task and differs strongly from the

Access Free Luxury Fashion Branding Trends Tactics Techniques

management of ordinary brands. At the heart of the difficulty lies a paradox: To increase sales and at the same time to preserve exclusivity. A luxury brand has to be anchored in the heads of as many people as possible and be desired but it must remain inaccessible to most of them. The more a luxury brand or good gets actually purchased, the more it loses its aura of exclusivity, its attractiveness and its 'dream value'. The purpose of this book is to analyze the specificities of the management and marketing of luxury brands in comparison to ordinary brands. The analysis will mainly focus on the four elements of the marketing mix, namely product,

Access Free Luxury Fashion Branding Trends Tactics Techniques

place, price and promotion. A detailed analysis of the four elements will disclose the particularities of luxury brands and present the requirements of successful luxury brand management which is able to overcome the difficulties resulting from the mentioned paradox.

This book explores omnichannel fashion and luxury retailing with a particular emphasis on the role of computer-mediated marketing environments in determining a consumer's purchase and post-purchase trajectories. The fashion industry has evolved rapidly over the last few years with the diffusion of fast fashion and luxury democratization, not to mention the advent of ICT and the development of communication. Today, fashion companies face new challenges, such as how to manage brands and how to

Access Free Luxury Fashion Branding Trends Tactics Techniques

choose between marketplaces and digital marketspaces. While some companies focus on one channel selection, others embrace the omnichannel choice and look for a balance between the two environments. Whatever the strategy, it is essential to manage these touch-points in order to create interaction between consumers and brands, provide meaningful customer experiences, and to maximize customers' engagement. An insightful read for scholars in marketing, fashion and retail, this book investigates the triangulation between branding,

Providing a critical insight into the growth of the secondhand luxury and vintage fashion industry, this book offers a compendium of business developments from across the globe, including examples from Europe, the Middle East and Asia. The 'pre-loved or pre-owned' clothing trade has grown as an economic entity, providing a living for over 100,000 people and creating a desirable and essential clothing source in under-developed economies. By debating and deliberating contemporary
