How to find the soft innovation that will make your product, service, school, church, or career worth talking about. We live in an era of too much noise, too much clutter, too many choices, and too much spam. And as Seth Godin's 200,000-copy bestseller *Purple Cow* taught the business world, the old ways of marketing simply don't work anymore. The best

way to sell anything these days is through word of mouth and the only real way to get word of mouth is to create something remarkable. Free Prize Inside, the sequel to Purple Cow, explains how to do just that. It's jammed with practical ideas you can use right now to make your product or service remarkable, so that it will virtually sell itself.

Remember when cereal came with a free prize inside? Even if you already liked the cereal, it was the little plastic toy that made it irresistible. Godin explains how you can think of a bonus that will make your customers feel just as excited, no matter what

business you're in. Consider these free prizes:

- The Tupperware party, which turned buying plastic bowls into a social event
- Flintstones vitamins, which turned a serious product into something fun
- The free change-counting machine at every Commerce Bank branch
- The little blue box from Tiffany, which makes people happy before they even open it

This book offers a way to create free prizes quickly, cheaply, and reliably and persuade others in your organization to help you bring them to life.

A significant addition to the literature on gas turbine technology, the second edition of Gas Turbine

engines. Busch begins with the history and theory of four-stroke spark-ignition engines. He describes the construction of both the "top end" (cylinders) and "bottom end" (inside the case), and functioning of key systems (lubrication, ignition, carburetion, fuel injection, turbocharging). He reviews modern engine leaning technique (which your POH probably has all wrong), and provides a detailed blueprint for maximizing the life of your engine. The second half presents a 21st-century approach to health assessment, maintenance, overhaul and troubleshooting. Busch explains how modern condition monitoring tools-like

borescopy, oil analysis and digital engine monitor data analysis-allow you to extend engine life and overhaul strictly on-condition rather than at an arbitrary TBO. The section devoted to troubleshooting problems like rough running, high oil consumption, temperamental ignition and turbocharging issues is worth its weight in gold. If you want your engine to live long and prosper, you need this book.

## How to Make a Purple Cow

This is a completely new and revised edition of the General Aviation Handbook, long overdue since it has been over 10 years since the last edition was published. This edition is fully revised and updated and contains 10 years worth of updated material, including the addition of a number of manufacturers and aircraft which were omitted from earlier editions for various reasons. Aircraft new to this edition include the so-called "heavy microlights", which are now an important part of the worldwide light aircraft scene. About 90 percent of the photos are new, and larger

page size provides greater space for large data tables and photos. Previous editions have been strong sellers; this is the main reference book on this important sector of the aviation world, and this new edition will be welcomed by both aviation enthusiasts and those involved in the aviation industry.
