***Semiotics - the study of the general principles of signs and sign systems - is crucial to an understanding of human nature, both social and psychological. The sign systems that we use for interaction with other living beings determine our potential for thought and social action, and language is central among them. It is the implicit claim of this two-volume work that linguistics has something very specific to give to semiotics, and many would further claim that relational network models of language in particular, i.e. systematic and stratificational linguistics, have a fundamental contribution to make.***

Die Buchreihe Linguistische Arbeiten hat mit über 500 Bänden zur linguistischen Theoriebildung der letzten Jahrzehnte in Deutschland und international wesentlich beigetragen. Die Reihe wird auch weiterhin neue Impulse für die Forschung setzen und die zentrale Einsicht der Sprachwissenschaft präsentieren, dass Fortschritt in der Erforschung der menschlichen Sprachen nur durch die enge Verbindung von empirischen und theoretischen Analysen sowohl diachron wie synchron möglich ist. Daher laden wir hochwertige linguistische Arbeiten aus allen zentralen Teilgebieten der allgemeinen und einzelsprachlichen Linguistik ein, die aktuelle Fragestellungen bearbeiten, neue Daten diskutieren und die Theorieentwicklung vorantreiben.

The present English translation reproduces the original German of Carl Brockelmann's *Geschichte der Arabischen Litteratur (GAL)* as accurately as possible. In the interest of user-friendliness the following emendations have been made in the translation: Personal names are written out in full, except b. for ibn; Brockelmann's transliteration of Arabic has been adapted to comply with modern

standards for English-language publications; modern English equivalents are given for place names, e.g. Damascus, Cairo, Jerusalem, etc.; several erroneous dates have been corrected, and the page references to the two German editions have been retained in the margin, except in the Supplement volumes, where new references to the first two English volumes have been inserted..

The Indo-Aryan languages are spoken by at least 700 million people throughout India, Pakistan, Bangladesh, Nepal, Sri Lanka and the Maldives. They have a claim to great antiquity, with the earliest Vedic Sanskrit texts dating to the end of the second millennium B.C. With texts in Old Indo-Aryan, Middle Indo-Aryan and Modern Indo-Aryan, this language family supplies a historical documentation of language change over a longer period than any other subgroup of Indo-European. This volume is divided into two main sections dealing with general matters and individual languages. Each chapter on the individual language covers the phonology and grammar (morphology and syntax) of the language and its writing system, and gives the historical background and information concerning the geography of the language and the number of its speakers.

This book synthesizes and integrates 40 years of research on the semantics of questions, and its interface with pragmatics and syntax, conducted within the formal semantics tradition. A wide range of topics are covered, including weak-strong exhaustiveness, maximality, functional answers, single-multiple-trapped list answers, embedding predicates, quantificational variability, concealed questions, weak islands, polar and alternative questions, negative polarity, and non-canonical questions. The literature on this rich set of topics, theoretically diverse and scattered across multiple venues, is often hard to assimilate. Veneeta Dayal, drawing on her own research, brings them together for the first time in a coherent, concise, and well-structured whole. Each chapter begins with a non-technical introduction to the issues discussed; semantically sophisticated accounts are then presented incrementally, with the major points summarized at the end of each section. Written in an accessible style, this book provides both a guide to one of the most vibrant areas of research in natural language and an account of how this area of study is developing. It will be a unique resource for the novice and expert alike, and seeks to appeal to a variety of readers without compromising depth and breadth of coverage.

In this brilliant analysis, Radau organizes the archival and inscriptional material from c. 4500 BCE to c. 2300 BCE. The volume includes extensive transcriptions and translations of the relevant documents along with the author's historical judgments. Also included are chronological tables and lists, as well as a new Select Bibliography. **This book challenges the uncritical use of the long held dictum of the development discourse that education empowers women. Situated in the post-structuralist feminist position it argues that in its current state the educational discourse in Pakistan actually disempowers women.**

**This book discusses the perceptions of staff and students with regards to the policy and practice of English as the medium of instruction (EMI) in Pakistani universities. Findings from qualitative and quantitative data collected in two public universities are compared to identify perceptions of problems concerning English as a medium of instruction for postgraduate study. The research also examines participants' attitudes towards the use of Pakistani English (PakE), a distinct variety of English different from other dialects such as American English and British English in its various linguistic features, in higher education settings. The findings explore the gap between the policy and practice of EMI, and expose various multi-layered and inevitable issues.**

*th The purpose of the 11 Conference on Software Engineering, Artificial Intelligence, Networking, and Parallel/Distributed Computing (SNPD 2010) held on June 9 - 11, 2010 in London, United Kingdom was to bring together researchers and scientists, businessmen and entrepreneurs, teachers and students to discuss the numerous fields of computer science, and to share ideas and information in a meaningful way. Our conference officers selected the best 15 papers from those papers accepted for presentation at the conference in order to publish them in this volume. The papers were chosen based on review scores submitted by members of the program committee, and underwent further rounds of rigorous review. In Chapter 1, Cai Luyuan et al. Present a new method of shape decomposition based on a refined morphological shape decomposition process. In Chapter 2, Kazunori Iwata et al. propose a method for reducing the margin of error in effort and error prediction models for embedded software development projects using artificial neural networks (ANNs). In Chapter 3, Viliam Šimko et al. describe a model-driven tool that allows system code to be generated from use-cases in plain English. In Chapter 4, Abir Smiti and Zied Elouedi propose a Case Base Maintenance (CBM) method that uses machine learning techniques to preserve the maximum competence of a system. In Chapter 5, Shagufta Henna and Thomas Erlebach provide a simulation based analysis of some widely used broadcasting schemes within mobile ad hoc networks (MANETs) and propose adaptive extensions to an existing broadcasting algorithm.*

*"A superb collection. This pathbreaking book is sure to have wide and lasting interest not only for students of South Asian literature, but for anyone interested in the role of literature in cultural self-definition, conflict and change."--David Damrosch, President, American Comparative Literature Association and editor of The Longman Anthology British Literature "This tour-de-force might be not only a landmark in Indian cultural history, but a major accomplishment in the scholarship of global cultures, inviting us to think critically about forms of history and communities of literature."--Walter D. Examines the relationship between Mughal political culture and the two dominant strains of Islam's Sufi traditions in South Asia: one centred around orthodoxy, the other focusing on a more accommodating and mystical spirituality. Based on a critical study of a large number of contemporary Persian texts, court chronicles, epistolary collections, and biographies of sufi mystics, The Mughals and the Sufis examines the complexities in the relationship between Mughal political culture and the two dominant strains of Islam's Sufi traditions in South Asia: one centered around orthodoxy, the other focusing on a more accommodating and mystical spirituality. Muzaffar Alam analyses the interplay of these elements, their negotiation and struggle for resolution via conflict and coordination, and their longer-term outcomes as the empire followed its own political and cultural trajectory as it shifted from the more liberal outlook of Emperor Akbar "The Great" (r. 1556-1605) to the more rigid attitudes of his great-grandson, Aurangzeb 'Alamgir (r. 1658-1701). Alam brings to light many new and underutilized sources relevant to the religious and cultural history of the Mughals and reinterprets well-known sources from a new perspective to provide one of the most detailed and nuanced portraits of Indian Islam under the Mughal Empire available today. Muzaffar Alam is George V. Bobrinsky Professor in South Asian Languages and Civilizations at the University of Chicago. He is the author of several books, including, The Languages of Political Islam: India 1200-1800 and The Crisis of Empire in Mughal North India: Awadh and the Punjab, 1707-1748.
