

custom, responsive, and advanced Magento themes. Readers must have some experience with HTML, PHP, CSS, and Magento theme design. This book will be useful for anybody who already has knowledge of the Magento frontend structure. A beautifully designed celebration of the iconic French fashion brand Rouje and its visionary founder Jeanne Damas In this glamorous, inspiring book, Jeanne Damas shares her vision for a timeless, free, sensuous, and proud femininity through the story her designs tell. As the designer of the ready-to-wear brand Rouje, she uses her very distinct visual language to create a book bursting with life. Life in Rouje gathers for the first time the iconic pictures of the Rouje ad campaigns, archival photographs never before published, as well as a backstage glimpse of the photo shoots and of the day-to-day life of Damas. The pages introduce the heroines who personify the designer's universe and lifestyle, including models and actresses of all generations and nationalities (such as Léa Seydoux, Isabelle Adjani, Maya Thurman-Hawke, Emma Corrin and Emmanuelle Béart), and the close circle of women in her life. Featuring scenes from Paris to the south of France, from Tangier to California, this book gathers all of Rouje's most iconic photographs together for the first time. Throughout, Damas's own handwritten notes, quotes, and collages punctuate the pages, like a modern, elegant scrapbook.

The Essential Guide to Business for Artists and Designers

Curated by Jeanne Damas

As we move through life many of us find ourselves needing to help a family member or friend with a medical condition. If the condition is temporary, our need to help is temporary. However, chronic conditions such as Alzheimer's and other dementias require longer-term, possibly ever-increasing assistance. Problems with thinking and memory lead to new, different, and often challenging behaviors. In addition, caring for someone with Alzheimer's often means helping them deal with other medical problems that are often difficult to recognize. This book is a resource for caregivers of people with Alzheimer's or dementia who are also beginning to experience non-memory-related medical conditions. It addresses 54 medical conditions that caregivers often must deal with when providing care. Each medical condition is addressed in an easy-to-follow, two-page guide that provides basic facts about the medical condition, signs that indicate a possible emergency, tips on providing relief in the home, other related issues to watch out for, and safety tips for the caregiver. Written by experts at the University of North Carolina at Chapel Hill and Duke University, this book is based on the latest clinical knowledge and scientific research on Alzheimer's and the care of Alzheimer's and dementia patients. It includes basic facts about Alzheimer's disease and other dementias and practical guidance when conferring with doctors and nurses, when visiting hospitals, nursing homes, and assisted-living residences, and during the dying process. Also, an entire chapter is devoted to what caregivers need to do to take care of themselves while helping someone with Alzheimer's and related dementia. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}
