This is the must-have guide for all amateur astronomers who double as makers, doers, tinkerers, problem-solvers, and inventors. In a world where an amateur astronomy habit can easily run into the many thousands of dollars, it is still possible for practitioners to get high-quality results and equipment on a budget by utilizing DIY techniques. Surprisingly, it's not that hard to modify existing equipment to get new and improved usability from older or outdated technology, creating an end result that can outshine the pricey higher-end tools. All it takes is some elbow grease, a creative and open mind and the help of Chung's hard-won knowledge on building and modifying telescopes and cameras. With this book, it is possible for readers to improve their craft, making their equipment more user friendly. The tools are at hand, and the advice on how to do it is here. Readers will discover a comprehensive presentation of astronomical projects that any amateur on any budget can replicate – projects that utilize leading edge technology and techniques sure to invigorate the experts and elevate the less experienced. As the "maker" community continues to expand, it has wonderful things to offer amateur astronomers with a willingness to get their hands dirty. Tweaking observing and imaging equipment so that it serves a custom purpose can take your observing options to the next level, while being fun to boot.

Reprint of "My seventy years" with updating material for the final 20 years of Martha Black's life.
The DSLR cinema revolution began over ten years ago. Professional filmmakers, students, video journalists, event video shooters, production houses, and others jumped at the opportunity to shoot cinematic images on these low budget cameras. The first edition of the book mapped the way focusing exclusively on DSLRs. This new edition shows how you can create stunning cinematic images using low budget cinema cameras, from iPhones to the C200. The author examines new cameras and new projects as filmmakers shoot action movies with the Panasonic GH5, craft personal stories with Blackmagic’s Pocket Cinema Camera, make documentaries and short films with the Canon C100 Mark II, and create music videos with the 5D Mark IV. This book, like the previous edition, takes the wisdom of some of the best shooters and empowers you to create visually stunning images with low budget cinema cameras. It includes six all new case studies, as well as updated examples from short films and documentaries. This book contains the essential tools to make you a better visual storyteller. FEATURES An examination of the creative and technical choices filmmakers face—everything from why we move cameras to shooting flat in order to widen the dynamic range of cameras Case studies from documentary filmmakers, news shooters, fiction makers, a visual anthropologist, and recent film school graduates An updated list of gear for low-budget filmmakers, including a section on what to look for in the gear you need to shoot and edit your projects
Large sensor video cameras (DSLRs) offer filmmakers an affordable, high-quality image previously impossible without high-end cinema cameras. These video-capable DSLR cameras have revolutionized filmmaking, documentary production, journalism, television, and even Hollywood cinema. This book empowers the filmmaker to craft visually stunning images inexpensively. DSLR Cinema presents insight into different shooting styles and real-world tips and techniques indispensible to any DSLR filmmaker. This updated and expanded edition includes new workflows for Adobe Premier and Final Cut X-from syncing external audio settings to using the right settings. It also covers the workflow for using Technicolor's picture style, CineStyle, designed on consultation with Canon scientists. DSLR Cinema features case studies of an international cast of cutting edge DSLR shooters, including Philip Bloom, Shane Hurlbut, Bernardo Uzeda, Rii Schroer, Danfun Dennis, and many more. The films are examined in detail, exploring how each exemplifies great storytelling, exceptional visual character, and how you can push the limits of your DSLR.
