As political leaders acknowledge the limits of their power they increasingly integrate constructive input from inside and outside government into their decision-making. A Ministry or Commission of Public Input is necessary to collect, process and communicate input more effectively and politicians need to work with the public to identify solutions.

all have been revised and updated. As new technology is introduced, physicians from nonsurgical specialties offer alternative and competing therapies for what was once the exclusive province of the thoracic surgeon. In addition, there is increasing knowledge regarding the efficacy of traditional thoracic surgical therapies. How to select among these varied and complex approaches is becoming increasingly difficult. Concise chapters are devoted to one or two specific questions, or decisions, in general thoracic surgery that are

*Project Decisions*

**With the arrival of Clement V in 1309, seven popes ruled the Western Church from Avignon until 1378. Joëlle Rollo-Koster traces the compelling story of the transplanted papacy in Avignon, the city the popes transformed into their capital. Through an engaging blend of political and social history, she argues that we should think more positively about the Avignon papacy, with its effective governance, intellectual creativity, and dynamism. It is a remarkable tale of an institution growing and defending its prerogatives, of people both high and low who produced and served its needs, and of the city they built together. As**

**the author reconsiders the Avignon papacy (1309–1378) and the Great Western Schism (1378–1417) within the social setting of late medieval Avignon, she also recovers the city’s urban texture, the stamp of its streets, the noise of its crowds and celebrations, and its people’s joys and pains. Each chapter focuses on the popes, their rules, the crises they faced, and their administration but also on the history of the city, considering the recent historiography to link the life of the administration with that of the city and its people. The story of Avignon and its inhabitants is crucial for our understanding of the institutional history of the papacy in the later Middle Ages. The author argues that the Avignon papacy and the Schism encouraged**

terms of its history, its scientific methodology and its normative role in international affairs. Split into three sections, it covers the 2000-year canon of realism: the different schools of thought, the key thinkers and how it responds to foreign policy challenges faced by individual states and globally. It brings political realism up-to-date by showing where theory has failed to keep up with contemporary problems and suggests how it can be applied and adapted to fit our new, globalised world order.
