The latest masterpiece—perceptive, funny, insightful, affecting—from the Nobel Prize – winning author Nobel laureate Mario Vargas Llosa’s newest novel, The Discreet Hero, follows two fascinating characters whose lives are destined to intersect: neat, endearing Fel i cito Yanaqu é , a small businessman in Piura, Peru, who finds himself the victim of blackmail; and Ismael Carrera, a successful owner of an insurance company in Lima, who cooks up a plan to avenge himself against the two lazy sons who want him dead. Fel i cito and Ismael are, each in his own way, quiet, discreet rebels: honorable men trying to seize control of their destinies in a social and political climate where all can seem set in stone, predetermined. They are hardly vigilantes, but each is determined to live according to his own personal ideals and desires—which means forcibly rising above the pettiness of their surroundings. The Discreet Hero is also a chance to revisit some of our favorite players from previous Vargas Llosa novels: Sergeant Lituma, Don Rigoberto, Do ñ a Lucrecia, and Fonchito are all here in a prosperous Peru. Vargas Llosa sketches Piura and Lima vividly—and the cities become not merely physical spaces but realms of the imagination populated by his vivid characters. A novel whose humor and pathos shine through in Edith Grossman’s masterly translation, The Discreet Hero is another remarkable achievement from the finest Latin American novelist at work today.

How to Read a Paper describes the different types of clinical research reporting, and explains how to critically appraise the publications. The book provides the tools to find and evaluate the literature, and implement the findings in an evidence-based, patient-centered way. Written for anyone in the health care professions who has little or no knowledge of evidence-based medicine, it provides a clear understanding of the concepts and how to put them into practice at the basic, clinical level. Changes for the 4th edition The fourth edition will include two new chapters on important developments in health care research and delivery, but otherwise retains its original style, size, and scope. New chapter on quality improvement – describing papers on quality improvement projects using ebm methods; this will extend the readership to non clinical health care professionals working in hospitals and family practice, and to nurse specialists and practice nurses working in this field New chapter on complex interventions - how to set up research projects involving both qualitative and quantitative methodology (known as mixed methods) Thorough revision and updating of existing chapters and references New illustrations – diagrammatic representations of ebm concepts

The Broadcast Announcing Worktext provides you with the skills, techniques, and procedures necessary to enter this highly competitive field of broadcast performance. In addition to the principles of good performance, this book addresses the importance of audience and how to communicate effectively to various groups. Television and radio studio environments, announcer specializations and responsibilities, and developing a broadcast delivery style are just a few of the many topics covered. Factual information is presented in brief, easy-to-digest modules and is enhanced with self-study questions and projects. The self-study provides an immediate check on what you learn, and the projects allow for a practical hands-on application of key concepts in the material. The worktext format, with many real-life examples, combines both traditional teaching and practical experience. A companion CD illustrates techniques and concepts in each chapter with audio and visual examples. This third edition will give you knowledge of other non-traditional forms of announcing, such as online radio announcing, podcast announcing, and other forms of online announcing, such as online shows, clips, and news. * New coverage of internet radio announcing techniques and other forms of distribution gives the readers a broader view of broadcast outlets * Presented in brief, easy-to-digest modules with self-study questions and projects that encourage active participation * CD with samples of broadcast and radio performaces for enhanced learning

Arguing About Literature: A Guide and Reader

Students have always responded powerfully to the memorable stories, poems, plays, and essays gathered in distinctive clusters in Making Literature Matter's thematic anthology. At the same time, the book's chapters on reading, writing, and research help students harness those responses into persuasive, well-supported arguments about the issues raised by the literature. As ever, the new edition of Making Literature Matter reflects John Schilb and John Clifford's careful attention to emerging pedagogical needs. In response to instructor requests, the text includes even more instruction on the key skills of argumentation, critical reading, and research, while linking literature more directly to the newsworthy current issues of today in new "Literature and Current Issues" clusters. Further, they have read widely to identify the most engaging recent fiction, poetry, drama, and nonfiction, and based their new choices for the seventh edition on how well that literature explores issues that matter to students right now. Making Literature Matter is also available with LaunchPad Solo for Literature, a set of online materials that helps beginning literature students learn and practice close reading and critical thinking skills in an interactive environment. To order Making Literature Matter packaged with LaunchPad Solo for Literature, use ISBN 978-1-319-07191-2.

Making Literature Matter combines an innovative writing text with a uniquely organized anthology for introductory literature courses that emphasize critical thinking and writing. The third edition addresses new trends in literature and composition, with more instruction on writing arguments and unique clusters that pair literary and visual texts for analysis.

With more than three-quarters of a million copies sold since its first publication, The Craft of Research has helped generations of researchers at every level—from first-year undergraduates to advanced graduate students to research reporters in business and government—learn how to conduct effective and meaningful research. Conceived by seasoned researchers and educators Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams, this fundamental work explains how to find and evaluate sources, anticipate and respond to reader reservations, and integrate these pieces into an argument that stands up to reader critique. The fourth edition has been thoroughly but respectfully revised by Joseph Bizup and William T. FitzGerald. It retains the original five-part structure, as well as the sound advice of earlier editions, but reflects the way research and writing are taught and practiced today. Its chapters on finding and engaging sources now incorporate recent developments in library and Internet research, emphasizing new techniques made possible by online databases and search engines. Bizup and FitzGerald provide fresh examples and standardized terminology to clarify concepts like argument, warrant, and problem. Following the same guiding principle as earlier editions—that the skills of doing and reporting research are not just for elite students but for everyone—this new edition retains the accessible voice and direct approach that have made The Craft of Research a leader in the field of research reference. With updated examples and information on evaluation and using contemporary sources, this beloved classic is ready for the next generation of researchers.

"This book focuses on the practical aspects of modern and robust statistical methods. The increased accuracy and power of modern methods, versus conventional approaches to the analysis of variance (ANOVA) and regression, is remarkable. Through a combination of theoretical developments, improved and more flexible statistical methods, and the power of the computer, it is now possible to address problems with standard methods that seemed insurmountable only a few years ago"--

Best-selling authors and veteran college writing instructors Laurie Kirszner and Stephen Mandell believe that students learn to write best when they use their own writing as a starting point. In Writing First with Readings: Practice in Context, designed for the paragraph to essay course, Kirszner and Mandell take seriously the ideas and expressive abilities of developmental students, as well as their need to learn the rules of writing and grammar. Visual writing prompts that open every chapter get students writing immediately. By moving frequently between their own writing, writing models and instruction, and workbook-style mastery exercises, students get constant reinforcement of the skills they are learning. Thoughtful chapters on college success, research, and critical reading, along with high-interest essays, round out the text, making it the perfect introduction to college writing. Read the preface.

Creating an exceptionally student-friendly textbook in psychology isn't just about making the chapters shorter and pages more colorful. It's about using that type of format to provide a clear portrait of psychological science, concise but not oversimplified, all while continually answering the recurring student question: "What does this have to do with me?" David Myers' brief introduction to psychology, Psychology in Everyday Life, certainly does offer brief, easily manageable chapters and a colorful, image-rich design (both shaped by extensive research, class testing, and instructor/student feedback). But what makes it such an exceptional text is what flows through those chapters—rich presentations of psychology's core concepts and field-defining research, examined in context of the everyday lives of all kinds of people around the world and communicated in the captivating storyteller's voice that is instantly recognizable as Myers'. The new edition of Psychology in Everyday Life offers an extraordinary amount of new research, effective new inquiry-based study tools, and further design innovations, all while maintaining its trademark brevity and clean layout. And it is accompanied by an innovative media/supplements of the same scope as all of David Myers' more comprehensive textbooks.

Now in its fifth edition, Diffusion of Innovations is a classic work on the spread of new ideas. In this renowned book, Everett M. Rogers, professor and chair of the Department of Communication & Journalism at the University of New Mexico, explains how new ideas spread via communication channels over time. Such innovations are initially perceived as uncertain and even risky. To overcome this uncertainty, most people seek out others like themselves who have already adopted the new idea. Thus the diffusion process consists of a few individuals who first adopt an innovation, then spread the word among their circle of acquaintances—a process which typically takes months or years. But there are exceptions: use of the Internet in the 1990s, for example, may have spread more rapidly than any other innovation in the history of humankind. Furthermore, the Internet is changing the very nature of diffusion by decreasing the importance of physical distance between people. The fifth edition addresses the spread of the Internet, and how it has transformed the way human beings communicate and adopt new ideas.

As critical thinking and coherent argument become even more important in our contemporary world, Arguing about Literature economically combines two first-year writing books in one: a concise guide to reading literature and writing arguments, and a compact thematic anthology of stories, poems, plays, essays, and arguments for inquiry groundbreaking Making Literature Matter draw connections between contemporary debates and literary analysis, bringing both argument and literature into a contemporary context. Through instruction in close critical reading of texts and well-supported, rhetorically sound argumentative writing, Arguing about Literature prepares students includes a new chapter on evaluating internet resources and visual arguments in the "post-truth" era, as well as dozens of new works of literature and argumentation.

This book is the result of more than ten years of research and teaching in the field of quantum electronics. The purpose of the book is to introduce the principles of lasers, starting from elementary notions of quantum mechanics and electromagnetism. Because it is an introductory book, an effort has been made to make it self contained for the same reason: the references have been limited (whenever possible) either to review papers or to papers of seminal importance. The organization of the book is based on the fact that a laser can be thought of as consisting of three elements: (i) an active material, (ii) a pumping system, and (iii) a suitable resonator. Accordingly, after an introduction with the interaction of radiation with matter, pumping processes, and the theory of passive optical resonators.

Students respond powerfully to literature when it explores issues that matter to them, such as how love can be compromised by the demands of tradition, how authoritarian injustice can be resisted, and how popular culture influences behavior. And when students learn to analyze and argue for how literature engages such issues and exerts such power, they develop and hone their critical thinking and writing skills. In its fifth edition Making Literature Matter continues to deliver on the promise of its title. Its thematic anthology gathers memorable stories, poems, plays, and essays into unique literary clusters addressing issues that rouse passionate responses in students. At the same time, its comprehensive rhetoric shows students how to harness those responses into thoughtful arguments about the issues raised by the clusters and the literature. Read the preface. The Discreet Hero

The practice of modern medicine and biomedical research requires sophisticated information technologies with which to manage patient information, plan diagnostic procedures, interpret laboratory results, and carry out investigations. Biomedical Informatics provides both a conceptual framework and a practical inspiration for this swiftly emerging scientific discipline at the intersection of computer science, decision science, information science, cognitive science, and biomedicine. Now revised and in its third edition, this text meets the growing demand by practitioners, researchers, and students for a comprehensive introduction to key topics in the field. Authored by leaders in medical informatics and extensively tested in their courses, the chapters in this volume constitute an effective textbook for students of medical informatics and its areas of application. The book is also a useful reference work for individual readers needing to understand the role that computers can play in the provision of clinical services and the pursuit of biological questions. The volume is organized so as first to explain basic concepts and then to illustrate them with specific systems and technologies.

The world's leading textbook on astrobiology--ideal for an introductory one-semester course and now fully revised and updated Are we alone in the cosmos? How are scientists seeking signs of life beyond our home planet? Could we colonize other planets, moons, or even other star systems? This introductory textbook, written by a team of four renowned science communicators, educators, and researchers, tells the amazing story of how modern science is seeking the answers to these and other fascinating questions. They are the questions that are at the heart of the highly interdisciplinary field of astrobiology, the study of life in the universe. Written in an accessible, conversational style for anyone intrigued by the possibilities of life in the solar system and beyond, Life in the Universe is an ideal place to start learning about the latest discoveries and unsolved mysteries in the field. Central to every vampire story is the undead's need for human blood, but equally compelling is the human ingestion of vampire blood, which often creates a bond. This blood connection suggests two primal, natural desires: breastfeeding and communion with God through a blood covenant. This analysis of vampire stories explores the benefits of the bonding experiences of breastfeeding and Christian and vampire narratives, arguing that modern readers and viewers are drawn to this genre because of our innate fascination with the relationship between human and maker.
