Lead-er-shift [verb]: The act of nimbly adapting one ' s leadership in the midst of rapid change. The term leadershift may be new to you, but the climate of change that demands it is not. As a leader, you already know that it takes more than staying the course to be successful. The key to not just surviving but to continual innovation, improvement, and influence is to learn how to leadershift. In the Leadershift Workbook, based on the bestselling book of the same name, author John C. Maxwell helps leaders make the changes the current fast-paced environment demands. He begins by helping leaders embrace seven principles to face every situation with flexibility and confidence: Continually learn, unlearn, and relearn Value yesterday, but live in today Rely on speed, but thrive on timing See the big picture as the picture keeps getting bigger Live in today, but think about tomorrow Move forward courageously in the midst of uncertainty Realize today ' s best will not meet tomorrow ' s challenges In each of the lessons in this workbook, John shares the critical shifts he has personally made over the course of his long and successful leadership career, including the Adaptive Shift from Plan A to Option A, the Production Shift from Ladder Climbing to Ladder Building, and the Influence Shift from Positional Authority to Moral Authority. These

leadershifts will change the way you think, act, and ultimately lead so you can be proactive and successful in an ever-changing world. Designed for use with the Leadershift book (9780718098506).

In his inspiring new book, *You Don't Need a Title to Be a Leader*, Mark Sanborn, the author of the national bestseller *The Fred Factor*, shows how each of us can be a leader in our daily lives and make a positive difference, whatever our title or position. Through the stories of a number of unsung heroes, Sanborn reveals the keys each one of us can use to improve our organizations and enhance our careers. Genuine leadership – leadership with a “little l”, as he puts it, is not conferred by a title, or limited to the executive suite. Rather, it is shown through our everyday actions and the way we influence the lives of those around us. Among the qualities that genuine leaders share:

- Acting with purpose rather than getting bogged down by mindless activity
- Caring about and listening to others
- Looking for ways to encourage the contributions and development of others rather than focusing solely on personal achievements
- Creating a legacy of accomplishment and contribution in everything they do

As readers across the country discovered in *The Fred Factor*, Mark Sanborn has an unparalleled ability to explain

fundamental business and leadership truths through simple stories and anecdotes. *You Don ' t Need a Title to Be a Leader* offers an inspiring message to anyone who wants to take control of their life and make a positive difference.

Thinking to stay ahead of change In a complex business climate, people need to make informed decisions and learn how to think flexibly. A leader's most important asset is the ability to sense changes in the environment and

adapt to them quickly. The Prepared Mind of a Leader presents an original and effective way to think more flexibly about innovation, strategy, change, and problem solving. It helps leaders anticipate challenges and prepare for both the intended and unintended consequences of change by laying out a program for developing, maintaining, and mobilizing eight key skills: Observing, Challenging, Reflecting, Reasoning, Imagining, Deciding, Learning, and Teaching. These skills provide a framework that the thoughtful leader or manager can use to approach issues of strategy, innovation, and more. Chapters feature interactive tools that will help readers develop each of the key skills. Bill Welter (Bartlett, IL) is President of Adaptive Strategies, a consulting firm focused on helping clients in a wide range of industries to deal with change. Jean Egmon (Wilmette, IL) is Director of the Complexity in Action Network and on the faculty at the Kellogg School of Management at Northwestern University. There's no mistaking what a great leader does. The real challenge is to know how it's done. Understanding the nuances of putting leadership into action has long been the specialty of Michael Feiner, the former chief people officer at Pepsi-Cola and current management professor at Columbia Graduate School of Business. Now, in this hands-on, plain-speaking, practical guide, Feiner shares his hard-won expertise and gives you

detailed solutions to the everyday problems of leadership. "The Feiner Points of Leadership" offers fifty insightful laws covering everything from managing tough bosses and difficult subordinates, to dealing with uncooperative colleagues, to overcoming resistance to corporate change. Based on Feiner's experiences as an aspiring executive, senior leader, and management consultant, "The Feiner Points" shows you that leadership has little to do with grand strategies or personal charisma.

The epic story of how one man shaped events, people, and himself to forever change a country. President Theodore Roosevelt forever transformed America, ushering the country into the arena of world supremacy. His brand of leadership is entirely American: confident, compassionate, energetic, diverse, visionary. But Roosevelt was not a born leader; his ascent to the apex of power was not a foregone conclusion. He made himself a leader of consequence and it is his epic journey to the White House—a road filled with terrific failures, intimate introspection, and self-made luck—will inspire readers anew. While a graduate student at Harvard, author Jon Knokey, a Roosevelt historian and business leader, unearthed hundreds of unpublished letters and interview notes from Roosevelt contemporaries. These long-forgotten documents provide a fresh and stunning ringside seat along the 26th President's journey to 1600

Pennsylvania Avenue. The stories from Harvard chaps, idealistic political reformers, coarse cowboys from the Badlands, and rough and tumble Rough Riders from the nation's interior, all combine to illuminate the maturation process of a man learning to lead at every stage of his life. Fast paced and written as a biographical narrative, Theodore Roosevelt and the Making of American Leadership places the reader alongside a young Theodore Roosevelt as he learns what he stands for and how he will lead. The modern manager faces a bewildering range of challenges every single day. Their ability to make critical decisions, often under pressure, can directly determine the future success of the company and their career. It is therefore surprising that so few managers take the time to learn the art of decision making. In this groundbreaking book from Caroline Wang, readers will learn that quality decision making is a competence that can be acquired according to a simple framework. The framework is practical and easy-to-remember, consisting of two acronyms: GPA and IPO. GPA for decision content quality (Goal, Priority, Alternatives); and IPO for decision process quality (Information, People, Objective reasoning). The book places emphasis on leading a team to make decisions, even though the framework can be used for personal and individual decisions. By using this common decision-making framework, managers and leaders will gain credibility and team support for the decision, will confidently articulate, promote, and defend the decision, and will have made the necessary preparations for successful implementation when the decision-making process is complete. This proven framework from one of Asia's most dynamic leadership experts will improve the quality of your decisions and change the way you do business.

Leadership by the Good Book will inspire, empower, and equip men and women to lead their businesses, their teams, their ministries, and even their families to greater heights and to have an eternal impact. For David L. Steward, founder and chairman of World Wide Technology, his philosophy for building a successful business is simple and founded on a Biblical principle: "For even the Son of Man did not come to be served, but to serve" (Mark 10:45 NIV). As a business leader, he says, the first

priority is to serve employees. Together with Brandon K. Mann, these two leaders distill their wisdom in this field guide for leaders who want to bring respect, integrity, honesty, and trust to the workplace. Steward and Mann draw from personal experiences as well as share insights and examples of how God's Word has informed and influenced their leadership. Each chapter ends with a section titled Your Leadership Flywheel: Learn, Live, Lead, Legacy, which includes self-reflection questions, application of biblical principles, as well as a prayer.

the visionary you were meant to be. True leadership isn't a matter of having a certain job or title. In fact, being chosen for a position is only the first of the five levels every effective leader achieves. To become more than "the boss" people follow only because they are required to, you have to master the ability to invest in people and inspire them. To grow further in your role, you must achieve results and build a team that produces. You need to help people to develop their skills to become leaders in their own right. And if you have the skill and dedication, you can reach the pinnacle of leadership—where experience will allow you to extend your influence beyond your immediate reach and time for the benefit of others. The 5 Levels of Leadership are: 1. Position—People follow because they have to. 2. Permission—People follow because they want to. 3. Production—People follow because of what you have done for the organization. 4. People Development—People follow because of what you have done for them personally. 5. Pinnacle—People follow because of who you are and what you represent. Through humor, in-depth insight, and examples, internationally recognized leadership expert John C. Maxwell describes each of these stages of leadership. He shows you how to master each level and rise up to the next to become a more influential, respected, and successful leader.

There remains a huge gulf in understanding by many leaders of what some are calling the Social Age — huge changes going on in society, enabling anyone with a smartphone to sign up to a social network and comment on anything and everything. Despite this revolution, which has been embraced by the masses, it is the people at the top of organizations who have been slowest to understand and adapt to it. While business leaders may feel that it's enough to hire social media managers and amend their marketing strategies, Damian Corbet shows why organizations need to do more to succeed in the Social Age — why CEOs need to 'get social' to survive. The Social CEO sets out to educate and inspire senior leaders to embrace the Social Age, teaching them the hows and whys of utilising social media in order to make them stronger leaders. Social CEOs can effectively encourage engagement from their employees as well as other stakeholders and customers; they're better able to communicate their organization's objectives and values, gauge the climate in which they operate and improve their brand image. Offering invaluable contributions from industry-recognised experts in social business, The Social CEO explores the many aspects of leading in the Social Age, such as storytelling, personal branding, managing risk and public relations. With chapters also written by practising 'social CEOs' working across a variety of sectors, from healthcare to sport, the book provides a wealth of insight into how social media can be used to gain a competitive advantage.

The authors offer an optimistic assessment based upon frank and stark conclusions about what colleges must do—and must not do—to remain relevant in the coming decades.

From launching a company, to starting a day care center for homeless teen moms, to running a successful political campaign, finding what you want to fight for is as critical as knowing how to turn thought into action. Stacey uses her experience and hard-won insights to break down how ambition, fear, money, and failure function in leadership, while offering personal stories that illuminate practical strategies. Stacey includes exercises to help you hone your skills and realize your aspirations. She discusses candidly what she has learned over the course of her impressive career: that differences in race, gender, and class are surmountable. Making Sense of Leadership identifies the five key roles used by effective leaders. A practical, accessible and solution-focused book, it helps entrepreneurs, managers and leaders develop their leadership skills. The authors examine successful leaders to determine the type of leadership roles which succeed. This allows them to present five distinct roles of leadership, which are used to promote positive change and innovation. The authors encourage the reader to play with these, recognizing and taking on those elements which most appropriately suit their situation. Discovering these roles offers an important guide to the new leader, in order for them to shape their own leadership approach. It also provides interesting challenges

to the existing leader who wants to refresh their stance in order to tackle a new situation. The book is supported by exercises for both individuals and groups, so that the text can also be used as a learning and development resource and for team facilitation and one-to-one coaching.

Can you lead? Can you make the difference? The good news is that everyone has untapped leadership abilities. Winning leaders do three things: they challenge the status " they build confidence in others; they coach people on what to do and how to do it.

Turnover at the top can stimulate great changes throughout an organization. These changes can mean low morale, decreased productivity, rumors, and political infighting-or they can revitalize working relationships and opportunities to rethink outdated assumptions and forge new directions. In this book Thomas North Gilmore, a consultant to leaders in business and government, shows how executives in new positions-as well as those overseeing leadership changes-can capitalize on these opportunities and minimize the risks of making changes at the top.

A pioneering neuroscientist reveals how brain science can transform how we think about leadership, team-building, decision-making, innovation, marketing, and more. Leadership is a set of abilities with which a lucky few are born.

*They're the natural relationship builders, master negotiators and persuaders, and agile and strategic thinkers. The good news for the rest of us is that those abilities can be developed. In *The Leader's Brain: Enhance Your Leadership, Build Stronger Teams, Make Better Decisions, and Inspire Greater Innovation with Neuroscience*, Wharton Neuroscience Initiative director Michael Platt explains how. Over two decades as a professor and practitioner in neuroscience, psychology, and marketing, Platt's pioneering research has*

deepened our understanding of how key areas of the brain work--and how that understanding can be applied in business settings. Neuroscience is providing answers to many of leadership's most vexing challenges. In The Leader's Brain, Platt explains: Why two managers, when presented with the same set of information, make very different decisions; Why some companies (Apple) build strong social and emotional connections with their customers and others do not (Samsung); How some of the most significant events in sports history, like the "Miracle on Ice," contain insights for how to build a team; Why even some of the most visionary business leaders can make disastrous decisions, and how to fix that. The Leader's Brain relates findings like these, and many more, to help enhance leadership in an ever-shifting world entering a "new normal." In this fast-reading and engaging guide, you'll gain actionable insights you can put into practice as a leader. You will also learn what's going on in your team's brains when they are working in sync with one another, how you can tweak your message delivery to make sure others hear you, how to encourage greater creativity and innovation, and much more. Most leadership literature stems from and focuses on the private sector, emphasizing personal qualities that bind leaders and followers to a shared purpose. As the authors of New Public Leadership argue, if these shared

purposes do not build trust and legitimacy in public institutions, such traditional leadership tropes fall short of the standard demanded by contemporary public servants.? For twenty years the authors have been developing a leadership education and training framework specifically designed to encourage public service professionals to 'lead from where they sit.' This book presents that comprehensive, integrated, and practical leadership framework, grounded in the uniqueness of public legal missions, culture, history and values. The authors explore three key elements of leadership success: 1) an understanding of our public service context, including the history, the values and the institutions that comprise our leadership setting, 2) a set of tools designed to help leaders initiate collective action in wicked challenge settings, and 3) tools to support sound judgment, enabling leaders to do the right thing in the right circumstances for the right reasons. The authors further provide readers with a basic understanding of democratic institutions, encouraging them to work within and across multiple vertical and horizontal systems of authority.? The book is organized into four sections, each of which is accompanied by a Master Case that provides the reader with an opportunity to apply the principles and leadership tools discussed in the text to practice. To further reinforce the practice-centered

approach to leadership knowledge and skills, the authors have developed an accompanying EMERGE Leadership Handbook, complete with exercises, available online.? Written specifically with the practicing public manager in mind, this book arms public servants with a large repertoire of leadership skills, designed to accommodate changing public values and conflicting priorities at all levels of our public organizations.
