MicroRNAs are small non-coding RNAs involved in post-transcriptional regulation of gene expression. Thousands of miRNAs have been identified in different organisms including viruses, insects, plants and animals. MiRNAs has emerged as key regulators of important biological processes. The differential expression of miRNAs in various human diseases has made them potential candidates for developing novel therapies and personalized medicines. This book is focused on microRNA let-7, the second miRNA discovered in the year 2000 and one of the most studied miRNA. This book discusses various aspects of miRNA let-7 starting from its discovery, biogenesis, transcriptional and posttranscriptional regulation to its crucial role in various fundamental cellular processes such as development, stem cell maintenance and differentiation, regulation of signalling pathways in cancer, drug resistance and therapeutic potential in different human diseases.

With clear, insightful analysis of Scripture, he answers many common questions, such as: • Are we living in the end times? • How should Believers respond to increasing immorality? • Will Christians go through the Tribulation? • What role does Israel play in God's prophetic plan? • Are COVID-19 and other world events announcing the imminent return of Jesus? her legendary painting *Mountains and Sea*. She poured thinned-down pigment directly onto unprimed canvas to be absorbed into its fibers. This large painting, the first in which Frankenthaler used her soak-stain technique, synthesized the influences that had informed her work to that point and announces her arrival as a mature artist. Published to accompany a 1998 exhibition at the Solomon R. Guggenheim Museum, New York, this book focuses on *Mountains and Sea* and other groundbreaking paintings of Frankenthaler's early career. In this period, Frankenthaler drew upon Cubism, the abstractions of Arshile Gorky and, especially, those of Jackson Pollock, whose radical technique inspired her to reject easel painting. Frankenthaler herself became associated with the second generation of the New York School and her unique method and experimental use of materials influenced her contemporaries and subsequent generations of artists.
