Rising young comedian Moshe Kasher is lucky to be alive. He started using drugs when he was just 12. At that point, he had already been in psychoanalysis for 8 years. By the time he was 15, he had been in and out of several mental institutions, drifting from therapy to rehab to arrest to...you get the picture. But KASHER IN THE RYE is not an "eye opener" to the horrors of addiction. It's a hilarious memoir about the absurdity of it all. When he was a young boy, Kasher's mother took him on a vacation to the West Coast. Well it was more like an abduction. Only not officially. She stole them away from their father and they moved to Oakland, California. That's where the real fun begins, in the war zone of Oakland Public Schools. He was more than just out of control-his mother walked him around on a leash, which he chewed through and ran away. Those early years read like part Augusten Burroughs, part David Sedaris, with a touch of Jim Carrol...but a lot more Jewish. In fact, Kasher later spends time in a Brooklyn Hasidic community. Then came addiction... Brutally honest and laugh-out-loud funny, Kasher's first literary endeavor finds humor in even the most horrifying situations.

Kit also includes a 32-page book on the history and rules of the game. Following the Pulitzer prize-winning collection Stag's Leap, Sharon Olds gives us a stunning book of odes. Opening with the powerful and tender "Ode to the Hymen," Olds addresses and embodies, in this age-old poetic form, many aspects of love and gender and sexual politics in a collection that is centered on the body and its structures and pleasures. The poems extend parts of her narrative as a daughter, mother, wife, lover, friend, and poet of conscience that will be familiar from earlier collections, each episode and memory burnished by the wisdom and grace and humor of looking back. In such poems as "Ode to My Sister," "Ode of Broken Loyalty," "Ode to My Whiteness," "Blow Job

Ode," and "Ode to the Last Thirty-Eight Trees in New York City Visible from This Window," Olds treats us to an intimate examination that, like all her work, is universal, by turns searing and charming in its honesty. From the bodily joys and sorrows of childhood to the deaths of those dearest to us, Olds shapes the world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader.

DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

Including comprehensive coverage of health disparities commonly encountered in pediatric and adult pulmonary, critical care, and sleep medicine, **Achieving Respiratory Health Equality in the United States** provides a definitive reference on this prominent issue. Expert authors explore questions such as: * What is the

evidence that respiratory health disparities exist? * What do we know about the causes of the disparities? * What are the clinical implications? * What can be done to address the particular disparities and thus achieve health equality? Recognizing the magnitude of this problem, the American Thoracic Society (ATS) Executive Committee created a Health Equality Sub-Committee, with an initial mandate of defining respiratory health disparities and respiratory health equality in the United States. This book will follow the format of a workshop on respiratory health equality held before the 2015 ATS International Meeting and led by editor Juan Carlos Celedón. Written by the workshop presenters, this book focuses closely on major risk factors for health, specific respiratory diseases for which health disparities are known to occur, and potential approaches to eliminate such disparities. Achieving Respiratory Health Equality in the United States is a timely resource for researchers, clinicians, and public health practitioners in respiratory medicine.

"This report sets out the statistics, evidence and experiences needed to launch a more forceful response to the growing threat posed by noncommunicable diseases. While advice and recommendations are universally relevant, the report gives particular attention to conditions in low- and middle-income countries, which now bear nearly 80% of the burden from diseases like cardiovascular disease, diabetes, cancer and chronic respiratory diseases. The health consequences of the worldwide epidemic of obesity are also addressed. The report takes an analytical approach, using global, regional and country-specific data to document the magnitude of the problem, project future trends, and assess the factors contributing to these trends. As noted, the epidemic of these diseases is being driven by forces now touching every region of the world: demographic aging, rapid unplanned urbanization, and the globalization of unhealthy lifestyles"--Publisher's description.

This book examines the regulation of pharmacists in the Netherlands and Belgium from the perspective of law and economics. It starts with an extensive and accessible overview of the economic literature with respect to the regulation (including self-regulation) of liberal professions. Subsequently, this book analyses the extent to which the current regulation of Dutch and Belgian pharmacists serves the public interest and the extent to which this regulation is a result of rent-seeking behaviour by private interest groups. The author concludes that some regulation, notably with respect to advertising, design of the pharmacy, establishment of pharmacies and drug prices, does not seem to serve the public interest. Moreover, he criticises the regulation of reimbursement for the pharmacist, which in both countries is still linked to the pharmacist monopoly in the distribution of drugs, despite new tasks of the pharmacist in the field of pharmaceutical care. In addition to a theoretical analysis, the author carries out an empirical research of rent-seeking behaviour in the pharmaceutical market. Although the book studies the situation in the Netherlands and in Belgium, its conclusions will certainly apply to other countries and other professions. The book will therefore be of interest to all economists, lawyers and practitioners interested in regulation of the liberal professions as well as practitioners and academics working in the field of health care.
