Italy is a country that exercises a hold on the imagination of people all over the world. Its long history has left an inexhaustible treasure chest of cultural achievement. The historic cities of Rome, Florence, and Venice are among the most sought-after destinations in the world for tourists and art lovers, and Italy's natural beauty and cuisine are rightly renowned. Italy's history and politics are also a source of endless fascination. Modern Italy has consistently been a political laboratory for the rest of Europe. In the 19th century, Italian patriotism was of crucial importance in the struggle against the absolute governments reintroduced after the Congress of Vienna, 1814-15. After the fall of Fascism during World War II, Italy became a model of rapid economic development, though its politics has never been less than contentious and its democracy has remained a troubled one. The A to Z of Modern Italy is an attempt to introduce the key personalities, events, social developments, and cultural achievements of Italy since the beginning of the 19th century, when Italy first began to emerge as something more than a geographical entity and national feeling began to grow. This is done through a chronology, a list of acronyms and abbreviations, an introductory essay, a map, a bibliography, and some 400 cross-referenced dictionary entries on prominent individuals, basic institutions, crucial events, history, politics, economics, society, and culture.

More complex and imposing than any other vehicle in the British emergency services, the fire engine has a long and interesting history. The earliest water pumps had been developed by the eighteenth century – basic manual pumps that had to be hauled around by people or horses, and were often only used on fire-insured premises. In the nineteenth and twentieth centuries horse-drawn, steam-powered fire engines, and eventually motorised fire engines, came to revolutionise firefighting, offering far greater versatility and the brigades came to be run by the municipalities. In this beautifully illustrated introduction, Eddie Baker charts the history of fire engines and their variants, and the increasingly complex equipment they have carried, such as high-rise ladders and high-pressure hoses. He also explains the wider history of the fire service and how the engines have been shaped by its needs and, most importantly, those of the firefighters themselves.

The car world is full of fascinating characters, but few have a story to tell quite as remarkable and inspirational as Tom Hartley. Walking out of school at the age of 11, unable to read or write, Hartley set up his own business buying and selling cars. From that moment, he defied logic and ripped up the rule book on his way to the top. Today he runs one of the most successful independent family run performance and luxury car businesses in the world. He has built up an unrivalled reputation as "The Dealmaker." Tom has been at the top for over 40 years, survived and thrived through four recessions, and overcome three life threatening illnesses.

In his own brutally honest words, Hartley tells his gripping story of a boy from a traditional Romany family who swapped the classroom for the cut-throat world of Glasgow's car auctions, buying and selling his first car at the age of 12. Having decided to drive himself around illegally, he was only 15 when he had his first car crash, and they don't come more spectacular than writing off a Ferrari Dino - nothing has ever been normal in the world of Tom Hartley! Hartley had made his first million by the age of 17, but soon suffered major setbacks as his business went bust, and he found himself at risk of losing his sight without major surgery. Hartley started all over again, living in a mobile home with his wife and working from the back of a car. He had gone from hero to zero, but his burning desire to be the best saw him climb his way back to the top. His ability to clinch deals in some of the most bizarre places has become legendary, like buying a car in a sauna, while stuck in a traffic jam on a motorway, and even in a swimming pool! Family has played a key part in the Tom Hartley story, his wife has been at his side all the way, and his two sons have followed closely in their father's footsteps. Indeed Tom's belief in family is one of the inspiring messages that comes through. Hartley's inspirational story is about the unshakeable belief in his own abilities, from a precocious schoolboy who had a dream, and then through sheer hard work and a burning desire to make the dream come true. This is not just a book for car enthusiasts but for anyone who has dared to dream. It's a story that will inspire and motivate, and proves you can make the wildest dream come true if you want it badly enough. Tom's remarkable story is written with the collaboration of journalist Ken Gibson, for 24 years, award-winning Motoring Editor of The Sun newspaper.

As Mr Jackson often reiterates, the logistics business has neither the time, inclination, nor sees a need to give any more than a very basic knowledge of what the new recruit should be doing. An assumption that a Satnav or the company guidance system is all they need he sees as being misguided and bad for business. On paper the business is simple. In reality it is not. The drop-out rate from those that are 'just having a go', 'see how they get on', is phenomenal. Good people are being wasted. And as one of the fastest-growing service industries in the world, it should be better. Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour.
