

Manual Fujifilm X100 Espanol

The Fujifilm X100S is a digital camera with a 23mm fixed prime lens. It is intended for amateurs to semi-professionals who want a camera that allows them to make great images faster and with less hassle than any other digital camera. While the camera manual explains what the camera can do, it doesn't show exactly how to use the camera to create great images! That's where Fujifilm X100S: From Snapshots to Great Shots comes in. Starting with the top ten things users need to know about the camera, author Kevin Mullins carefully guides readers through the operating features. Readers get practical advice from a pro on which settings to use when, great shooting tips, and end of chapter assignments. From Snapshots to Great Shots is a beautiful how-to photography series that provides the perfect blend of instruction, inspiration, and reference for specific camera models and photography concepts. Featuring a clear, elegant design; outstanding images that educate and inspire; and a friendly, accessible voice, this series helps photographers get great shots every time they pick up their camera.

Here is a fresh look at the wonders of Yosemite National Park (visited by more than three million people each year), as well as the lesser-known vistas of the pristine wilderness that adjoins the eastern slopes of the Sierra Nevada. From the first light of sunrise cascading above an alpine creek to the last glint of sunset reflected on the joyful serenade of a waterfall ballet at Horsetail Falls, the spirit of the land will nourish your soul. The accompanying text of this small but exquisitely printed volume speaks through the voices of our great nature writers, from Ansel Adams and Galen Rowell to Joan Didion, Wallace Stegner, and Mark Twain. This is the perfect gift for anyone who has ever marveled at the beauty of Yosemite National Park and the glorious gallery of the Eastern Sierra's natural wonders.

The Secrets to Creating Amazing Photos

No one has counted the enzymes in the human organism, and probably their profuse number can only be estimated from the restrictions the finite mass of genetic material imposes. Still, numerous catalytic activities have been identified and investigated for their clinical relevance. After one century of such research, surprisingly, only a handful of enzymes has survived the stern trial of clinical application to find regular medical use. Disregarding genetic defects, most of the diagnostically used enzymes participate in metabolic conversions fundamental to life: the utilization, transfer or fixation of vital nutrients or of chemical energy. Creatine kinase is central to the function of the mitochondrion, the cellular power generator. The wider distribution of this enzyme is linked to tissues whose physiology crucially relies on an adaptable supply of energy, notably skeletal muscle, the brain, and the heart. Just as these three tissues vary in their preference for different energy sources, each produces a different isoenzyme of creatine kinase. Accordingly, the finding of elevated creatine kinase activity in blood can lead to a variety of interpretations, but in practice the diagnosis of acute myocardial infarction is the major consideration.

Cardiff After Dark is the first monograph by British-based Polish photographer Maciej Dakowicz. Dakowicz spent five years photographing the nighttime revelries that take place in Cardiff over the weekend. Focused around a few pedestrianized streets in the city centre, Dakowicz's images capture nightlife fueled by alcohol and emotions. The arc of an evening's entertainment is captured in these candid photographs, which reveal fun and hilarity as well as fighting and drunken exhaustion. There are stag nights and hen parties, men dressed as superheroes and women dressed as Playboy bunnies, mountains of discarded chip wrappers, arrests by the police, and lots and lots of posing for photographs. Dakowicz's images, at times shocking or upsetting, form an important documentary photobook of British urban life in the early part of the 21st century.
