OphthoBook is the printed version of the amazing OphthoBook.com online book and video series. The combination of this text, along with the online video lectures, creates the most informative and easy-to-understand ophthalmology review ever written. It is geared toward medical students, optometry students, and non-ophthalmologists who want to learn more about the eye without getting bogged down with mindless detail. The book is broken down into ten chapters: 1. Eye History 2. Anatomy 3. Glaucoma 4. Retina 5. Infection 6. Neuroophthalmology 7. Pediatric Ophthalmology 8. Trauma 9. Optics 10. Lens and Cataract Each chapter also includes "pimp questions" you might be asked in a clinic. Also, an entire chapter of ophthalmology board-review questions, flashcards, and eye abbreviations. Perhaps most useful, each chapter corresponds to the 20-minute video lectures viewable at OphthoBook.com. And lots of fun cartoons!

This is a well-organized discussion of the most common issues, both clinical and psychosocial, of general pediatrics. The book covers a wide scope of topics from those as benign as thumb-sucking to those as devastating as HIV and childhood cancer. A case history opens each chapter to set the stage for a practical discussion of primary care pediatrics. This state-of-the-art reference emphasizes concepts in health promotion, illness prevention, and family and community participation. The book includes well-child care for normal children and adolescents. It also discusses premature infants, and children with specific needs such as patients with Down's Syndrome. Signs and symptoms are presented by body system in a logical approach.

Life Span Motor Development, Seventh Edition With Web Study Guide, is a leading text for helping students examine and understand how interactions of the developing and maturing individual, the environment, and the task being performed bring about changes in a person's movements. This model of constraints approach, combined with an unprecedented collection of video clips marking motor development milestones, facilitates an unmatched learning experience for the study of motor development across the life span. The seventh edition expands the tradition of making the student's experience with motor development an interactive one. An improved web study guide retains more than 100 video clips to sharpen observation techniques, while incorporating additional interactive questions and lab activities to facilitate critical thinking and hands-on application. The text also contains several updates to keep pace with the changing field: Content related to physical growth and development of the skeletal, muscle, and adipose systems is reorganized chronologically for a more logical progression. New material on developmental motor learning demonstrates the overlap between the disciplines of motor development and motor learning. New insights into motor competence help explain the relationship between skill development and physical fitness. The text helps students understand how maturational age and chronological age are distinct and how functional constraints affect motor skill development and learning. It shows how the four components of physical fitness—cardiorespiratory endurance, strength, flexibility, and body composition—interact to affect a person's movements over the life span, and describes how relevant social, cultural, psychosocial, and cognitive influences can affect a person's movements. This edition comes with 148 illustrations, 60 photos, and 25 tables—all in full color—to help explain concepts and to make the text more engaging for students. It also retains helpful learning aids including chapter objectives, a running glossary, key points, sidebars, and application questions throughout each chapter. The enhancements to the seventh edition don't end with revised content in the text. Instructors adopting the text for use in their course will find an updated ancillary package. The authors have revised the text package, and the instructor guide now includes feedback and answers to lab questions and "Test Your Knowledge" questions that appear throughout the book. In addition, the video clips that students can view through the web study guide are available in separate files so they can be uploaded into learning management systems or PowerPoint presentations. Life Span Motor Development, Seventh Edition, embraces an interactive and practical approach to illustrate the most recent research in motor development. Students will come away with a firm understanding of motor development concepts and how they apply to real-world situations.

Written by one of America's foremost authorities in preventive medicine, Nutrition in Clinical Practice, Second Edition is the practical, comprehensive, evidence-based reference that all clinicians need to offer patients effective, appropriate dietary counseling. This fully revised edition incorporates the latest studies and includes new chapters on diet and hematopoiesis, diet and dermatologic conditions, and health effects of coffee, chocolate, and ethanol. Each chapter concludes with concise guidelines for counseling and treatment, based on consensus and the weight of evidence. Appendices include clinically relevant formulas, nutrient data tables, patient-specific meal planners, and print and Web-based resources for clinicians and patients.

The abuse of drugs and chemicals has become a problematic public health dilemma for the world's population and one that must be dealt with by parents, societies, clinicians, researchers, and even countries in the world. This book discusses the complex neurobiology that underlies drug addiction and reveals how these illicit chemicals disrupt central nervous system neurotransmission involving such neurotransmitters as serotonin, dopamine, and others. This manual reviews current understanding in drug interactions with neurotransmitter systems, neuroimmune signaling, current research on reward circuitry, and current medications used to treat drug addiction. It also discusses related topics such as drug addiction in females, co-morbid conditions, drug addiction in minority populations, prenatal drug exposure and others. The book covers new drugs of the 21st century and discusses such controversial topics as legalization of drug use. It also provides internet resources, treatment facilities by state, and parent support organizations. The importance of prevention of drug abuse is a key theme of the book.

Los trastornos alimentarios aparecen cada vez con mayor frecuencia, y las preocupaciones por el peso y la apariencia parecen haberse convertido en normativas. Incluso estos trastornos han aumentado en la población masculina a pesar de la mayor presión social a la se somete, en mayor medida, a la población femenina y especialmente a las jóvenes. En los dieciséis años que han transcurrido desde que se publicó el libro Anorexia y bulimia. Trastornos alimentarios, de esta misma autora y en esta misma editorial, el estudio de estos trastornos se ha incrementado tremendamente. Existen muchas revistas científicas especializadas en el tema en las que se han recogido infinidad de estudios importantes sobre la clasificación, la epidemiología, la evaluación y el tratamiento de éstos. De manera sumaria, en esta nueva edición se pretende mostrar los datos de mayor credibilidad sobre algunos de estos aspectos. El propósito de esta obra es el de proporcionar información útil y relevante sobre estos problemas tanto a las personas que los sufren como a sus allegados, y el de presentar un instrumento sencillo y útil para su aplicación por los terapeutas, así como para marcar las nuevas tendencias de cómo abordar las preocupaciones exageradas por el peso.

Addressing physical and psychosocial matters of survivorship prior to, during, and after anticancer treatment is central to a patient's wellbeing. The MASCC Textbook of Cancer Supportive Care and Survivorship explores not only the diagnosis and treatment but also the increasingly recognized complex and ongoing symptoms experienced by long term cancer survivors. Significant advances have been made, designing strategies to manage the side effects and symptoms of treatment and to prevent them from occurring, maximizing the person's ability to pursue daily activities. The MASCC Textbook of Cancer Supportive Care and Survivorship assembles international, multidisciplinary experts who focus on a comprehensive range of symptoms and side effects associated with cancer and its treatment. Intended for health professionals involved with cancer care, medical oncologists, radiation oncologists, surgeons, general practitioners, nurses and allied health workers, this textbook provides current information on the management and prevention of cancer related side effects, referring to up-to-date sources that are useful for conducting further research.
