*I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.*

**Velocette is one of the most respected names in the history of the motorcycle. Though not as numerous or as successful, as some machines, the motorbikes produced by the Veloce company in Birmingham command a special respect and an extremely loyal following, and machines such as the KTT and Thruxton are among the most desirable classic bikes you can buy today. In this book motorcycle historian, Mick Walker, chronicles the history of the Veloce company and the bikes they produced between 1905 and the winding up of the company in 1971.**

**Formed as the offshoot of an aircraft manufacturer shortly after World War II, MV Agusta in 1950 commenced production of four-cylinder motorcycles that would prove to be among the world's most successful competition motorcycles and extremely desirable road bikes for more than a quarter-century. Prolific motorcycle author Mick Walker offers background histories and complete specs for all road and race MV Agusta Fours, along with a generous selection of archival photography and a special eight-page color section. Motorsport coverage spans nearly 40 World Championships and includes legendary riders like John Surtees, Giacomo Agostini, and Mike Hailwood. A final chapter updates the MV Agusta story with the latest on Cagiva's resurrection of the marque in the form of 1998's F4 road bike.**

*This book is the third in the Redline books Enthusiasts Series. It tells the story of one of Italy's premiere post-war marques. With a history steeped in aviation, including the MC72 World Speed Record holder and World War II fighters, Aermacchi began building motorcycles in 1950. At the 1956 Milan Show, the futuristic Chimera, an ohv horizontal single with enclosed bodywork was launched. Later in the decade the Chimera was 'undressed' to create some of Italy's best sports and racing machines, including the Ala Verde and the Ala d'Oro. In 1960 Harley Davidson bought 50% of Aermacchi, and then in 1978 the Varese factory was sold to Cagiva. A number of Aermacchi personalities have contributed to this book, giving it additional authority.*

*The primary purpose of the Manual of Classification of Motor Vehicle Traffic Accidents is to promote uniformity and comparability of motor vehicle traffic accident statistics now being developed in Federal, state and local jurisdictions. This manual is divided into two sections, one containing definitions and one containing classification instructions.*

*Ducati stunned the world in 1988 when the struggling, small Italian firm unleashed its Desmoquattro -- 8-valve, desmodromic -- Superbike. The bike found success on the world's racetracks right from the start. Road-going versions soon carried that success to the general public, proving this design wasn't just another noisy prototype. The Superbikes -- 748, 851, 888, 916, and 996 -- are now Ducati's best-selling machines in the United States; and the Desmoquattro engine found its way into the company's more pedestrian series such as the Monster roadster and ST4 sport-tour. This is the comprehensive volume on Ducati's ultimate performance motorcycles and replaces the out-of-print Ducati Super Bikes: 851, 888, 916.*
