Marketing Strategy and Competitive Positioning 6e deals with the process of developing and implementing a marketing strategy. The book focuses on competitive positioning at the heart of marketing strategy and includes in-depth discussion of the processes used in marketing to achieve competitive advantage. The book is primarily about creating and sustaining superior performance in the marketplace. It focuses on the two central issues in marketing strategy formulation – the identification of target markets and the creation of a differential advantage. In doing that, it recognises the emergence of new potential target markets born of the recession and increased concern for climate change; and it examines ways in which firms can differentiate their offerings through the recognition of environmental and social concerns. The book is ideal for undergraduate and postgraduate students taking modules in Marketing Strategy, Marketing Management and Strategic Marketing Management.

Marketing Decision Making and the Management of Pricing

How long does it take to buy a loaf of bread? A pair of shoes? A car? These are trick questions. Imagine a hundred potential customers in the same store, each holding a stopwatch. Some of their stopwatches are ticking very fast (grabbing a bottle of wine before a party), some glacially slow (agonizing over the perfect bottle for a first date). Some, in fact, aren't ticking at all. For today's savvy marketers understanding how much time and energy consumers are willing to spend shopping for their product or service is the single most important (yet overlooked) factor in maximizing sales. After years of advising clients who sell everything from all-natural fruit juice to health insurance, John Rosen and AnnaMaria Turano have learned that capturing a consumer's attention at precisely the right time and holding it through the purchase decision requires a strategy that they call Stopwatch Marketing. It is the method of adjusting your marketing strategies to match the shopping styles of your customers. Stopwatch Marketing unveils a systematic way to capitalize on four different types of shopping styles—Recreational, Painstaking, Impatient, and Reluctant. Rosen and Turano also share the stories of how America's top brands put the concept of Stopwatch Marketing to work for them. You'll learn how: Goodyear turned Assurance with TripleTred tires into a billion-dollar success story built on a shopping cycle that takes less than an hour. Roto-Rooter became the only legitimate brand in its category by controlling the typical Yellow Pages users' 50-second search pattern. Whole Foods reinvented the supermarket shopping experience to slow down their customers' clocks. Microsoft exploits shoppers' reluctance to spend time researching alternatives to their Office software. Lexus begins targeting customers up to a year before they set foot inside a dealer showroom. In a world where consumers are assaulted with thousands of different marketing messages every day, the biggest challenge is to align the content and timing of your messages to the amount of time buyers have for hearing them. Stopwatch Marketing shows how to do just that and increase your bottom line as a result.

Building A Customer-Driven Health System

This new, innovative textbook provides a highly accessible introduction to the principles of marketing, presenting a theoretical foundation and illustrating the application of the theory through a wealth of case studies.

The Pharmaceutical Studies Reader is an engaging survey of the field that brings together provocative, multi-disciplinary scholarship examining the interplay of medical science, clinical practice, consumerism, and the healthcare marketplace. Draws on anthropological, historical, and sociological approaches to explore the social life of pharmaceuticals with special emphasis on their production, circulation, and consumption Covers topics such as the role of drugs in shaping taxonomies of disease, the evolution of prescribing habits, ethical dimensions of pharmaceuticals, clinical trials, and drug research and marketing in the age of globalization Offers a compelling, contextually-rich treatment of the topic that exposes readers to a variety of approaches, ideas, and frameworks Provides an accessible introduction for readers with no previous background in this area

A thorough update to a best-selling text emphasizing how marketing solves a wide range of health care problems There has been an unmet need for a health care marketing text that focuses on solving real-world health care problems. The all new second edition of Strategic Marketing for Health Care Organizations meets this need by using an innovative approach supported by the authors' deep academic, health management, and medical experience. Kotler, Stevens, and Shalowitz begin by establishing a foundation of marketing management principles. A stepwise approach is used to guide readers through the application of these marketing concepts to a physician marketing plan. The value of using environmental analysis to detect health care market opportunities and threats then follows. Readers are shown how secondary and primary marketing research is used to analyze environmental forces affecting a wide range of health care market participants. The heart of the book demonstrates how health management problems are solved using marketing tools and the latest available market data and information. Since the health care market is broad, heterogenous, and interconnected, it is important to have a comprehensive perspective. Individual chapters cover marketing for consumers, physicians, hospitals, health tech companies, biopharma companies, and social cause marketing – with strategies in this last chapter very relevant to the Covid-19 pandemic. Each chapter gives readers the opportunity to improve marketing problem-solving skills through discussion questions, case studies, and exercises.
