Phonics are an essential skill that all beginner readers must

master. Do you want to help your child to develop their spelling, reading and writing skills? Work through this Phonics book with your child and they will learn how to spell all the major sounds that start with a. 170 pages of A sounds! You can use this book with a young child who is just starting school or with an older child who has missed out on the basics. If a child doesn't know their phonic sounds...they will always struggle with spelling, reading and writing. Sometimes the same sound can be spelt in different ways, e.g. the sound ake (cake) can also be spelt ache earache) and eak (steak). The best way to use this book is to focus on one sound at a time. Read through them with your child, talk about the sounds, practice spelling them and write them. The A Sounds book is the largest of the series. You will also find the e, i, o and u books on Amazon. competencies, and expertise.

Psychologists, educators, researchers, and practitioners in neighboring areas are interested in exploring how writing develops and in what manner this development can be fostered, but they lack a handy, unified, and comprehensive source of information to satisfy their interest. The goal of this book is to fill this void by reflecting on the phenomenon of writing from a developmental perspective. It contains an integrated set of chapters devoted to issues of writing: how writing

develops, how it is and should be taught and how writing paths of development differ across writing genres.

Specifically, the book addresses typologies of writing; pathways of the development of writing skills; stages of the development of writing; individual differences in the acquisition of writing skills; writing ability and disability; teaching writing; and the development and demonstration of expertise in writing.
