Meditation is not only about crystals, hypnotic folk music and incense sticks! Forget about sitting in unnatural and uncomfortable positions while going "ommmmm...." It is not a club full of yoga masters, Shaolin monks, hippies and new-agers. It is super practical and universal practice, that can improve your overall brain performance and happiness! -Looking to be truly happy... not just fake smiles anymore? -Sick of being held up and helpless, a victim of terrible circumstance? -Do you really want to be a slave to your emotions anymore? -Are you so depressed and negative that no one really enjoys spending time with you? Well, I was not necessarily talking to you, but if it speaks to you, you have picked up the right book! Most People Walk Through Their Life In a Walking Daze And I was too. I was constantly fighting everything going on in my life; with my mind. Day to day stressors like traffic, the mean lady at the gas station with the bad breath that I had to see every morning, and the long hours put in at work, were enough to drain me.

My boss, with his long nose hair, breathing down my neck about my productivity level was enough to deplete a person every day. "What do I do? What will happen next? What if, what if, what if...?" I could not even enjoy a second of my day, because I was lost in worry and stress over what was going to happen next and what I could do to maybe control it. In this book you will find techniques to step out of your thinking and allow your mind to finally rest. When meditating, you take a step back from actively thinking your thoughts, and instead, see them for what they are. The reason why meditation is helpful in reducing stress and attaining peace is that it gives your over-active conscious a break. Just like your body needs it, your mind does too! I give you the gift of peace that I was able to attain through present moment awareness. In This Book I'll Show You: -My favorite meditation and mindfulness techniques perfect for ordinary busy people like you and me -My personal experience -How exactly do I practice and how it helped me in so many ways -How to maintain stillness, peace and focus in everyday life -How to stick to your meditation practice and maintain high level of motivation -The right mindset you should have to keep your brain and thoughts healthy -A few simple things you can do to instantly feel better and happier! -And many, many more! information and quantum computation is bringing a fresh perspective, a new understanding about the true nature of us and our universe. It has profound implications to the way us humans understand ourselves and our universe. Since this newer understanding rests on digital and informational nature of being and has divine-like qualities, I have referred to this as “digital divine.” A road to arrive at “digital divinity” has also been my journey to understand this new nature of us and our universe. From this perch, our universe appears like an informational entity rooted deeply in the nature of silence or zero. Broader laws of information seem to describe its nature and behaviors far better than the classical laws of physics. Our physical universe emerges as a computing platform engaged in grand act of quantum and binary information processing. How does one start from a macro view of our perceptual universe and arrive at the computational nature of matter and mind? How do cosmic, emotional, and rational mind arise from this foundation? How does this view impact the concept of my self that I hold deep with in my psyche? The informational and computational description of our universe provides a framework to naturally

explain many such difficult questions. As one realizes that this grand informational and quantum computational entity or digital divine is not only rooted in logic, but it is also rooted in love, oneness, or unity consciousness, one embarks on a new understanding of us, our universe, and our divinity; an incredible bridge between science and spirituality. This is an amazing know-how. We can all benefit from this.
