Find out why the happiest, most successful people have the ability both to persist and to quit. In a culture that perceives quitting as a last resort and urges us to hang in, *Mastering the Art of Quitting* tackles our tendencies to overanalyze, ruminate, and put a positive spin on goals that have outlived their usefulness. Bestselling author Peg Streep and psychotherapist Alan Bernstein demonstrate that persistence alone isn't always the answer. We also need to be able to quit to get the most out of life. They reveal simple truths that apply to goal setting and achievement in all areas of life, including love, relationships, and work: Quitting promotes growth and learning, as well as the

ability to frame new goals. Without the ability to give up, most people will end up in a discouraging loop. The most satisfied people know when it's time to stop persisting and start quitting. Quitting is a healthy, adaptive response when a goal can't be reached. Featuring compelling stories of people who successfully quit, along with helpful questionnaires and goal maps to guide you on the right path, *Mastering the Art of Quitting* allows you to evaluate whether your goals are working for or against you, and whether you need to rechart certain aspects of your life. When is it time to stop persisting and start quitting? Take a moment and answer the following questions. Just thinking about the answers will give you insight into your ability to quit artfully and restart your life. Do you believe that "winners never quit and quitters never win"? How realistic are you when it comes to setting goals? What matters more: staying the course or exploring new possibilities in life? How much of your sense of self relies on other people's judgments? Do you tend to hang in longer than you should, even when you're

unhappy? When you try something new, do you focus on the effort you have to put in or the possibility of failure? Are you a procrastinator or a delayer when it comes to getting things done? How much do you worry about making a mistake? Do you second-guess yourself? How hard is it for you to get over a setback?

An investigation into how specific Web technologies can change the dynamics of organizing and participating in political and social protest.

A new edition of the bestselling classic – published with a special introduction to mark its 10th anniversary This pioneering account sets out to understand the structure of the human brain – the place where mind meets matter. Until recently, the left hemisphere of our brain has been seen as the ‘rational’ side, the superior partner to the right. But is this distinction true? Drawing on a vast body of experimental research, Iain McGilchrist argues while our left brain makes for a wonderful servant, it is a very poor master. As he shows, it is the right side which is the more

reliable and insightful. Without it, our world would be mechanistic – stripped of depth, colour and value.

Testing, Measurement, Assessment Mastering Modern Psychological Testing: Theory & Methods presents quality written research in a thorough and comprehensive manner that allows students to master the material. This text provides a comprehensive introduction to psychological assessment and covers areas not typically addressed in existing test and measurements texts such as neuropsychological assessment and the use of tests in forensics settings. Mastering Modern Psychological Testing addresses special topics in psychological testing and includes special material on test development written by a leading test developer as well as relevant examples. The book is designed for undergraduate courses in Psychological Testing / Assessment / Testing Theory & Methods.

A new workplace demands that you take charge of your anchors. It challenges you to pay attention to the aspects that drive your behaviour, attitudes,

perceptions, and emotions. At the same time, recognizing the motives, needs and emotions of others is imperative for personal leadership. This will help you hone your collaborative instincts, and in embracing diversity and engaging effectively in a professional setting. Based on the author's experiences and her interaction with others, *Mastering Behaviour* explores the hinterland of behavioural insights. Applying popular psychology theories, the book helps in tackling difficult interpersonal and behavioural issues at work, such as personal clashes, stress, handling difficult interactions and workplace loneliness. With technological developments changing the way we connect, the book will provide insights to the real-world challenges of developing greater trust, engagement and collaboration within their teams and the organization.

"*Mastering the Job Market: Career Issues for Master's Level Industrial-Organizational Psychologists* begins with an introduction to the field of I-O psychology and presents the empirical basis for the book, a large scale survey of I-O master's graduates and a second survey of their employers. Survey methodology and demographic data for I-O master's graduates and employers are presented. The remaining six chapters of this volume address a myriad of issues related to the careers of master's level I-O psychologists based on the survey data and insights from I-O master's faculty from top ranked I-O master's

programs. In Chapter 2, L'Heureux and Van Hein provide information about job opportunities available to I-O master's graduates. The authors draw heavily on the Graduate Survey data to identify common occupational titles, organizational roles, and salary ranges for both recent I-O graduates and those later in their careers. Job positions reflect a broad range of roles that include talent management, data analytics, human resources, organizational development, and consulting. I-O psychology master's graduates overwhelmingly perceive their I-O degree to be valuable and report a high level of career satisfaction"--

The world's leading expert on self-control, Walter Mischel has proven that the ability to delay gratification is critical for a successful life, predicting higher SAT scores, better social and cognitive functioning, a healthier lifestyle and a greater sense of self-worth. But is willpower prewired, or can it be taught? In The Marshmallow Test, Mischel explains how self-control can be mastered and applied to challenges in everyday life--from weight control to quitting smoking, overcoming heartbreak, making major decisions, and planning for retirement. With profound implications for the choices we make in parenting, education, public policy and self-care, The Marshmallow Test will change the way you think about who we are and what we can be.*

*Mastering the Art of Psychotherapy: the principles of effective psychological change: challenging the boundaries of self-expression. This is a mechanics manual for the personality. It addresses the fundamentals of the human psyche and personality: how identity is formed, how trauma works, the nature and dynamism of psychological energy, the function and analysis of dreams, the shadow side of falling in love, but even more importantly, how to effectively diagnose and treat personality problems. This book is a complete manual on the practice of psychotherapy, principally designed for clinical professionals and graduate students, in order to improve diagnostic skills, develop*

Andrew Aziz describes technology, strategy, and psychology as the three essential pillars of successful trading, and he knows that the psychological aspects of trading are the most likely

to be underestimated or even ignored. He wrote *Mastering Trading Psychology* to help traders enhance their understanding of this crucial pillar of trading and to strengthen their "mental skills" in order to maximize their performance. This practical and highly entertaining book takes its readers inside the minds of ordinary retail traders who contributed more than 175 accounts of their successes, their failures, their joys, their struggles, and, most of all, what they have learned as traders. Some are experienced, but many are relative beginners. They represent an intriguing diversity in terms of where they live, their ages, their levels of education, their everyday jobs, and how they tell their stories. All are members of Andrew's trading community, and their enthusiastic response to his invitation to share their experiences and insights was overwhelming. Complemented by Andrew's explanatory text, the stories are told in the contributors' own words, minimally edited for length, clarity, and privacy.
