the price for the devastating human and environmental consequences of this failure to hold corporations accountable for their actions. The stories in *Depraved Indifference* are the stories of ordinary people. Discarded and forgotten by their

represents over five years of research and interviews. It lays bare a Workers' Compensation system that cavalierly exposes workers to severe injury, toxic exposure and death; while throwing the major cost unto the family and

the taxpayer, without fear of lawsuit, prosecution or even public outcry. It is a call to action.

Depraved Indifference by Patrice Woepfel is a well researched look at the failure of workers' compensation laws to deliver the

promise of fast, sure and adequate benefits based upon a no fault approach to compensating on-the-job injury and death. The author makes the case that miniscule benefits, the ability to starve out injured workers and their families,

Despite major engineering advances in controlling the atmosphere within spacecraft, some contamination of the air appears inevitable. NASA has measured numerous airborne

contaminants during space missions. As the missions increase in duration and complexity, ensuring the health and well-being of astronauts traveling and working in this unique environment becomes increasingly difficult. As part of its efforts to promote safe conditions aboard spacecraft, NASA requested the National
