

Maternal And Child Nursing Journal

Featuring the most accurate, current, and clinically relevant information available, **Maternal Child Nursing Care in Canada, 2nd Edition**, combines essential maternity and pediatric nursing information in one text. The promotion of wellness and the care for women experiencing common health concerns throughout the lifespan, care in childbearing, as well as the health care of children and child development in the context of the family. Health problems including physiological dysfunctions and children with special needs and illnesses are also featured. This text provides a family-centered care approach that recognizes the importance of collaboration with families when providing care. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Nursing Alerts point students to critical information that must be considered in providing care. Community Focus boxes emphasize community issues, supply resources and guidance, and illustrate nursing care in a variety of settings. Critical thinking case studies offer opportunities to test and develop analytical skills and apply knowledge in various settings. Emergency boxes guide you through step-by-step emergency procedures. Family-Centered Teaching boxes highlight the needs or concerns of families that you should consider to provide family-centered care. NEW! Content updates throughout the text give you the latest information on topics such as perinatal standards, mental health issues during pregnancy, developmental and neurological issues in pediatrics, new guidelines including SOGC, and CAPWHN. NEW! Increased coverage on health care in the LBGTQ community and First Nations, Metis, and Inuit population NEW! Medication Alerts stress medication safety concerns for better therapeutic management. NEW! Safety Alerts highlighted and integrated within the content draw attention to developing competencies related to safe nursing practice.

his brand new book gives your students a holistic approach to pediatric care that views wellness and illness as family-centered events. Accessible and reader friendly, the book underscores the importance of child development in the planning of nursing care; encourages child health promotion as a foundation for healthy adult living; and examines both the physical and emotional effects of illness on children. The book's emphasis on nursing communication, family education, and culturally sensitive care combines with nursing process overviews, an outcomes oriented approach, critical thinking exercises, and step by step coverage of therapeutic procedures to produce the most effective and practical resource in the field

Master the essentials of maternity and pediatric nursing with this comprehensive, all-in-one text! **Maternal Child Nursing Care, 7th Edition** covers the issues and concerns of women during their childbearing years and children during their developing years. It uses a family-centered, problem-solving approach to patient care, with guidelines supported by evidence-based practice. New to this edition is an emphasis on clinical judgment skills and a new chapter on children with integumentary dysfunction. Written by a team of experts led by Shannon E. Perry and Marilyn J. Hockenberry, this book provides the accurate information you need to succeed in the classroom, the clinical setting, and on the Next Generation NCLEX-RN® examination. Focus on the family throughout the text emphasizes the influence of the entire family in health and illness. Expert authors of the market-leading maternity and pediatric nursing textbooks combine to ensure delivery of the most accurate, up-to-date content. Information on victims of sexual abuse as parents and human trafficking helps you prepare to handle these delicate issues. **Nursing Alerts** highlight critical information that could lead to deteriorating or emergency situations. **Guidelines boxes** outline nursing procedures in an easy-to-follow format. **Evidence-Based Practice boxes** include findings from recent clinical studies. **Emergency Treatment boxes** describe the signs and symptoms of emergency situations and provide step-by-step interventions. **Atraumatic Care boxes** describe how to manage pain and provide competent care to pediatric patients with the least amount of physical or psychological stress. **Community Focus boxes** emphasize community issues, provide resources and guidance, and illustrate nursing care in a variety of settings. **Patient Teaching boxes** highlight important information nurses need to communicate to patients and families. **Cultural Considerations boxes** describe beliefs and practices relating to pregnancy, labor and birth, parenting, and women's health. **Family-Centered Care boxes** draw attention to the needs or concerns of families that you should consider to provide family-centered care.

Maternal & Child Nursing Care

Patient Studies in Maternal and Child Nursing

Maternal-Neonatal Nursing Made Incredibly Easy!

Care of the Child and Family

Designed to be used by the student together with the sixth edition of Maternal and child health nursing by Adele Pillitteri.

This dynamic, up-to-date text offers an integrated framework and philosophy for teaching the nursing of childbearing families and nursing of children together. Accurate, readable, and concise, Maternal & Child Nursing Caresupports faster and more efficient learning in briefer, more compressed courses; while helping students develop essential skills for fast-changing healthcare environments. Core themes in this edition include family-centered and community-based care; health promotion (including Healthy People 2020); patient and family education; clinical reasoning; evidence-based practice, and developing cultural competence. This edition adds new Safety Alerts; more coverage of pain as the fifth vital sign; greater focus on care of families where a child is dying; and updated content on assessment, nutrition, communication, and many other key topics. Multiple pedagogical tools help students focus both learning and review, including intuitive Pathophysiology Illustrated visuals; Family Quotes presenting the family's perspective; Learning Outcomes and Critical Concept Review Features; Key Terms, and an online audio glossary.

Now in its second decade of publication, this landmark series draws together and critically reviews all the existing research in specific areas of nursing practice, nursing care delivery, nursing education, and the professional aspects of nursing.

This volume should be quite useful to the target audience. It provides a good foundation for evidence-based practice and further research (4 stars). Dody's Book Review Service.The nursing community is continually challenged with expanding the empirical knowledge base that informs rural nursing practice. This volume of the prestigious Annual Review of Nursing Research, Focus on Rural Health, addresses this challenge. Contributors have developed creative and effective strategies to identify relevant research and present them in the context of the rural delivery system.

This 21st volume of the Annual Review synthesizes nursing research to date on child health and illness, including family issues. Ages range from pre-term babies to adolescents, with a focus on chronic illness. A special final chapter reviews the highlights of the past 10 volumes of the Annual Review of Nursing Research, to mark the 20th anniversary of the Review.

A respected authority updated for today's changing healthcare environment, *Maternal & Child Health Nursing, 9th Edition*, equips students for success by presenting maternal-newborn and child healthcare not as two separate disciplines, but as a continuum of knowledge. This extensively revised 9th Edition integrates a nursing process framework, an approachable organization, the latest evidence-based research, and engaging learning aids to ensure a mastery of essential concepts and cultivate the skills for successful nursing practice.

Focus on Family Nursing

Make sure you fully understand how to care for women and newborns! Foundations of Maternal-Newborn and Women's Health Nursing, 7th Edition integrates essential maternity information into the overall continuum of nursing care to show how to provide safe care in the clinical setting. With easy-to-understand language, this updated text uses evidence-based guidelines and step-by-step instructions for assessments and interventions to help you quickly master key skills and techniques. Also emphasized is the importance of understanding family, communication, culture, patient teaching, and clinical decision making. This edition reflects the latest QSEN competencies, and the accompanying Evolve website includes review questions to prepare students for the NCLEX® exam! Safety checks integrated into the content help you develop competencies related to safe nursing practice. Unfolding case studies help you apply what you ' ve learned to practice. UPDATED Evidence-Based Practice boxes highlight the latest research and the most current QSEN (Quality and Safety Education for Nurses) practice guidelines for quality care. Patient teaching boxes provide teaching guidelines, including communication guides, directed at patients and families. Critical to Remember boxes highlight and summarize need-to-know information. Critical Thinking exercises focus on clinical situations designed to test your skills in prioritizing and critical thinking. Nursing Care Plans help you apply the nursing process to clinical situations. Chapter summaries appear at the end of each chapter and help you review core content in each chapter while on the go. Updated Drug guides list important indications, adverse reactions, and nursing considerations for the most commonly used medications. Procedure boxes provide clear instructions for performing common maternity skills, with rationales for each step. UNIQUE! Therapeutic Communications boxes present realistic nurse-patient dialogues, identifying communication techniques and showing to respond when encountering communication blocks. Knowledge check helps you assess your mastery of key content. Glossary provides definitions of all key terms. NEW! Reorganized content integrates complications into standard family care, includes new sections on obesity, and recommendations for infant safe sleep environment and reductions of SIDS risk. NEW! Contributing content from known experts in the field of Maternal and Women ' s Health include a former AWHONN president.

Maternal Newborn Nursing Care Plans, Second Edition teaches students and professional nurses how to assess, plan, deliver, and evaluate care for normal and abnormal pregnancy, including delivery and recovery for both the mother and baby. This new edition contains more than 65 of the most common and high-risk care plans for maternal and newborn nursing care using the nursing process approach. Organized according to clinical condition, Maternal Newborn Nursing Care Plans, Second Edition provides practical components for each care plan incorporating: * Key nursing activities * Etiologies and risk factors * Signs and symptoms * Diagnostic studies * Medical management * Collaborative problems * Individualized care plans complete with the Nursing Interventions Classification (NIC)

The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focusses on maternal conditions, childhood illness, and malnutrition. Specifically, the chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth, and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular, the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can lessen the disparity in terms of both health and financial risk.

Sj McN Maternal/Child Nursing

Growing research shows that many children from immigrant and refugee families are not doing well in school, due in part to linguistic and cultural disadvantages. Teaching dual-language learners requires cultural sensitivity, an understanding of language acquisition, and intentional teaching strategies. Combining research and techniques, this resource helps early childhood educators support dual-language learners as they develop the skills necessary for school readiness and success.

Using an outcomes-based, contemporary approach, AWHONN's Core Curriculum for Maternal-Newborn Nursing, 4th Edition provides essential knowledge for care through every stage of pregnancy and childbirth. It is also the definitive resource in preparing for the AWHONN certification examination. A concise, outline format covers concepts of reproduction, fetal development, normal pregnancy, the intrapartum and postpartum periods, the normal newborn, complications in the mother and the newborn, and ethical and legal issues. Edited by two well-respected authors, Susan Mattson, RNC, CTN, PhD, FAAN, and Judy Smith, PhD, RNP-C, this is the only book that includes AWHONN-endorsed content for the practice of maternal-newborn nursing! A bulleted, outline format provides quick review and reference on the management of pregnant women and their newborns through all stages of care. AWHONN-endorsed content makes this the definitive resource in preparing for current practice and for AWHONN specialty nursing certification exams. Case studies and review questions reflect the realities of practice and help you prepare for certification exams. Coverage of outpatient and inpatient care includes families, ethics, legal issues, research, case management, genetics and genetic counseling, and the transition to home and parenthood. New evidence-based practice content includes the latest research and best practice standards for maternal-newborn patient care. New National Institute of Child Health & Human Development (NICHD) terminology fosters interdisciplinary communication and ensures greater accuracy and precision. New patient safety and risk management strategies help in improving outcomes, reducing complications, and increasing patient safety. New information on the latest assessment and monitoring devices describes new applications of technology and the resulting benefits to patient care.

Ideal for accelerated maternity and pediatrics courses, Maternal-Child Nursing, 4th Edition is filled with user-friendly features to help you quickly master essential concepts and skills. It offers completely updated content that's easy to read and understand. Plus, active learning tools give you the chance to practice applying your knowledge and make learning fun! Critical Thinking Exercises allow you to apply your knowledge to realistic clinical situations. Nursing care plans assist you with applying the nursing process to plan individualized care for the most common maternity and pediatric conditions. Critical to Remember boxes summarize and highlight essential, need-to-know information. Communication Cues provide practical tips for effective verbal and nonverbal communication with patients and families. Clinical Reference sections in pediatric chapters present information relevant to each body system, including anatomy and physiology, differences in the pediatric patient, and related laboratory and diagnostic tests. Integrated electronic features match icons in the text, so you can use print and electronic resources more effectively together.

Using Research to Improve Practice boxes help you determine proper care to reinforce best practice. Spanish translations are included for phrases commonly encountered with maternity and pediatric patients. Improved design makes the text easier to read, and up-to-date photos ensure accuracy.

Love Maternal and Child Health Nurse

"This volume offers a comprehensive review of all the current knowledge on maternal role attainment since Reva Rubin's seminal work. Drawing from research in nursing, maternal-child health, psychology, sociology, and social work, the book examines the psychological transition to motherhood from a contemporary, multidisciplinary perspective." "Special circumstances such as preterm birth and single parenthood are discussed, as well as the effects of maternal employment and maternal age (such as teens and older mothers). This volume should be of value for use in courses in maternity nursing, women's studies, community and social psychology, and social work, as well as for health professionals providing care for the woman during pregnancy and early motherhood.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Written specifically for the LPN/LVN student, this Third Edition of Introductory Maternity and Pediatric Nursing provides clear, well-illustrated, and clinically relevant coverage of pregnancy, birth, and pediatrics to help student's master key clinical and critical thinking skills and prepare for the NCLEX® exam and successful practice. This Third Edition is enhanced by new care plans in the clinical chapters, new case studies, a new art program, a new pronunciation guide, and more. Online video clips of live births, Cesarean delivery, breastfeeding, pediatric milestones, the well child, and the hospitalized child bring concepts to life in dynamic full color. To ensure student mastery of key topics, an integrated workbook at the end of each chapter includes NCLEX-style questions (many NEW to this edition), study activities, and critical thinking: "What Would You Do?" exercises.

Featuring the most accurate, current, and clinically relevant information available, Perry's Maternal Child Nursing Care in Canada combines essential maternity and pediatric nursing information in one text. Comprehensive coverage includes promotion of wellness and the care for persons experiencing common health concerns throughout the lifespan, care in childbearing, as well as the health care of children and child development in the context of the family. Health concerns, including physiological dysfunctions and special needs and illnesses, are also featured. This text provides a family-centered care approach that recognizes the importance of collaboration with families when providing care. Medication Alerts stress medication safety concerns for better therapeutic management. Safety Alerts highlighted and integrated within the content draw attention to developing competencies related to safe nursing practice. Research Focus boxes identify best practices by presenting evidence and how to apply the knowledge learned. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, supply resources and guidance, and illustrate nursing care in a variety of settings. Clinical reasoning case studies offer you opportunities to test and develop your analytical skills and apply knowledge in various settings. Cultural Awareness boxes explore beliefs and practices about pregnancy, childbirth, parenting, women's health concerns, and caring for sick children. Evidence-Informed Practice boxes highlight findings that confirm effective practices or that identify practices with unknown, ineffective, or harmful effects. Emergency boxes alert you to emergency situations and guide you step-by-step through emergency procedures. Family-Centered Care boxes highlight the needs or concerns of families that you should consider in providing family-centered care. Guidelines boxes outline nursing procedures in an easy-to-follow format. Home Care boxes detail important information that you need to deliver care to patients and families in the home setting. Medication Guide boxes include key information about medications used in maternity and newborn care, including their indications, adverse effects, and nursing considerations. Patient Teaching boxes assist you in helping patients and families become involved in their own care with optimal outcomes.

Easy and fun gift idea for a favorite nurse, already personalized with her/his specialty. Give it as a birthday, Christmas or Nurses' Week appreciation gift. Cute heartbeat/sunshine graphics inside (B&W, lined pages) and outside (bright yellow against navy blue). Handy 6x9-inch size is perfect for journaling, note taking or to do list.
