It is sure to engage little ones for hours! The book is also suitable for adults who want to improve their mental math ability! Try not to use a calculator to solve the problems. By the end of the book you should be a superstar at solving math problems in your head very quickly.

This bold and colorful counting book shows young readers that math and addition can be fun and easy (when you use dominos). Black and white dominos make up each number on various bold backgrounds and each page gives the various properties of numbers zero to twelve. With a simple but imaginative approach, Lynette Long, has created a perfect classroom resource that teaches kids how to add up each dot on an individual domino as well as how to spot different number combinations. This bright and fun-filled introduction to basic addition will appeal to both eager and reluctant math students.

A comprehensive book-and-learning-game experience designed by educators to teach important concepts for kindergarten success.

Includes 2 double-sided, self-inking, washable stampers and flashcards that make learning about addition, subtraction, and counting an interactive game. After color by number, you should get your child a color by math Activity Book. Why? Because you want him to be comfortable in arithmetic and the traditional learning technique of coloring will pave the way for that. Here, your child will be asked to solve simple equations in order to come up with the right colors to use. Isn't this exciting? Grab a copy today!

Prepare your child for math success! The proven activities in Math Readiness K-1 reinforce a variety of important early math skills, including counting, number order, shapes, addition, subtraction, and more. (Ages: 4-6 | 32 Pages | Dimensions: 11x8.5in.)

These simple math secrets and tricks will forever change how you look at the world of numbers. Secrets of Mental Math will have you thinking like a math genius in no time. Get ready to amaze your friends—and yourself—with incredible calculations you never thought you could master, as renowned “mathemagician” Arthur Benjamin shares his techniques for lightning-quick calculations and amazing number tricks. This book will teach you to do math in your head faster than you ever thought possible, dramatically improve your memory for numbers, and—maybe for the first time—make mathematics fun. Yes, even you can learn to do seemingly

complex equations in your head; all you need to learn are a few tricks. You'll be able to quickly multiply and divide triple digits, compute with fractions, and determine squares, cubes, and roots without blinking an eye. No matter what your age or current math ability, Secrets of Mental Math will allow you to perform fantastic feats of the mind effortlessly. This is the math they never taught you in school.

Hard math for elementary school is a math enrichment textbook, providing ideas to provide children with lessons that are harder, deeper, and more fun. It has chapters to supplement most textbook topics as well as chapters on topics, such as making polyhedra out of marshmallows and toothpicks, that make the book more fun and develop higher reasoning skills.
