Persepolis: Discovery and Afterlife of a World Wonder presents the first full study of the history of archaeological exploration at Persepolis after its destruction in 330 BC. Based in part on archival evidence, anecdotal information, and unpublished documents, this book describes in detail the history of archaeological exploration, visual documentation, and excavations at one of the most celebrated sites of the ancient world. The book addresses a broad audience of readers ranging from students of the archaeology, history, and art history of ancient, medieval, and modern Iran to scholars in Classical Studies and Ancient Near Eastern Studies.

Cachées dans l'anonymat, de nombreuses créatures peuplent la terre. Leur espèce est malade. Pour les vampires, la reproduction est maintenant impossible. Les loups-garous perdent en longévité, et seules les nouvelles lunes et les pleines lunes leur permettent la transformation. Quant à la magie, elle est corrompue au sein des sorciers. Sur une île enchantée et cachée de tous, Aipherly cherchera à fuir les siens pour vivre d'aventure et non d'agriculture. Investie de magie pure, elle attirera l'attention d'êtres surnaturels. Mathias, à la fois jarl et strandhogg, part demander de l'aide pour sauver son village attaqué par des monstres. Cette aventure lui permettra de se rapprocher d'Aipherly, pour qui il voue un amour profond et passionné. Anthone, un vampire en marge de sa société, avait prédit le déclin des créatures. Réveillé par une magie pure, il entreprend un long périple pour sauver les siens d'une lente extinction.

Controlling a New Migration World explores the factors that drive recent migration control policies and, in turn, sheds light on the unintended consequences of policies for the new character of migration. This book asks how we can account for the immigration policies of liberal states. Is the recent linkage between migration and security a rhetorical invention of elites or a reflection of changing migrant profiles? Are states' control policies effectively containing or only redirecting unwanted migration flows? This increasingly relevant issue will be of great use to anyone working in comparative politics, sociology and studying ethnicity or international migration, as well as professionals working in the migrant/asylum and public law fields.

*In the decades following World War II, France experienced both a period of affluence and a wave of political, artistic, and philosophical discontent that culminated in the countrywide protests of 1968. In *Disordering the Establishment* Lily Woodruff examines the development of artistic strategies*

of political resistance in France in this era. Drawing on interviews with artists, curators, and cultural figures of the time, Woodruff analyzes the formal and rhetorical methods that artists used to counter establishment ideology, appeal to direct political engagement, and grapple with French intellectuals' modeling of society. Artists and collectives such as Daniel Buren, André Cadere, the Groupe de Recherche d'Art Visuel, and the Collectif d'Art Sociologique shared an opposition to institutional hegemony by adapting their works to unconventional spaces and audiences, asserting artistic autonomy from art institutions, and embracing interdisciplinarity. In showing how these artists used art to question what art should be and where it should be seen, Woodruff demonstrates how artists challenged and redefined the art establishment and their historical moment.

The Standing Challenge of Grammar Writing

Descriptive grammars are our main vehicle for documenting and analysing the linguistic structure of the world's 6,000 languages. They bring together, in one place, a coherent treatment of how the whole language works, and therefore form the

primary source of information on a given language, consulted by a wide range of users: areal specialists, typologists, theoreticians of any part of language (syntax, morphology, phonology, historical linguistics etc.), and members of the speech communities concerned. The writing of a descriptive grammar is a major intellectual challenge, that calls on the grammarian to balance a respect for the language's distinctive genius with an awareness of how other languages work, to combine rigour with readability, to depict structural regularities while respecting a corpus of real material, and to represent something of the native speaker's competence while recognising the variation inherent in any speech community. Despite a recent surge of awareness of the need to document little-known languages, there is no book that focusses on the manifold issues that face the author of a descriptive grammar. This volume brings together contributors who approach the problem from a range of angles. Most have written descriptive grammars themselves, but others represent different types of reader. Among the topics they address are: overall issues of grammar design, the complementary roles of outsider and native speaker grammarians, the balance between grammar and lexicon, cross-linguistic comparability, the role of explanation in grammatical description, the interplay of theory and a range of fieldwork methods in language description, the challenges of describing languages in their cultural and historical context, and the tensions between linguistic particularity, established practice of particular schools of linguistic description and the need for a universally commensurable analytic framework. This book will renew the field of grammaticography, addressing a multiple readership of descriptive linguists, typologists, and formal linguists, by bringing together a range of distinguished practitioners from around the world to address these questions.

The Etude

Research in Colonial and Postcolonial Linguistics has experienced a significant increase in contributions from varying fields of language studies, gaining the attention of scholars from all over the world. This volume aims to showcase the variety of topics relevant to the study of language(s) in colonial, postcolonial and decolonial contexts. A main reason of this variety is that the new paradigm invites and necessitates research on different subject matters such as language typology, grammar and cross-linguistics, meta-linguistics and research on language ideology, discourse analysis and pragmatics. The contributions of this volume are selected, peer-reviewed papers which were partly invited and partly given at the First Bremen Conference on Colonial and Postcolonial Linguistics, held in September 2013.

A wildly original, fantastical adventure—and now an animated move, Jack and the Cuckoo-Clock Heart—this international bestseller will charm readers of all ages. Edinburgh, 1874. Born with a frozen heart, Jack is near death when his mother abandons him to the care of Dr. Madeleine—witch doctor, midwife, protector of orphans—who saves Jack by placing a cuckoo clock in his chest. And it is in her orphanage that Jack grows up among tear-filled flasks, eggs containing memories, and a man with a musical spine. As Jack gets older, Dr. Madeleine warns him that his heart is too fragile for strong emotions: he must never, ever fall in love. And, of course, this is exactly what he does: on his tenth birthday and with head-over-heels abandon. The object of his ardor is Miss Acacia—a bespectacled young street performer with a soul-stirring voice. But now Jack's life is doubly at risk—his heart is in danger and so is his safety after he injures the school bully in a fight for the affections of the beautiful singer. Now begins a journey of escape and pursuit,

from Edinburgh to Paris to Miss Acacia's home in Andalusia. Mathias Malzieu's The Boy with the Cuckoo-Clock Heart is a fantastical, wildly inventive tale of love and heartbreak—by turns poignant and funny—in which Jack finally learns the great joys, and ultimately the greater costs, of owning a fully formed heart.
