Now in its 11th edition, Criminal Law and Its Processes: Cases and Materials covers all the doctrinal material and key criminal justice policy questions an instructor may want to explore for a either a one-semester or year-long course in criminal law. From a preeminent authorship team, Criminal Law and its Processes: Cases and Materials, Eleventh Edition, continues in the tradition of its best-selling predecessors by providing students not only with a cohesive policy framework through which they can understand and examine the use of criminal laws as a means for social control, but also analytic tools to understand and apply important criminal law doctrines. Criminal Law and its Processes: Cases and Materials focuses on having students develop a nuanced understanding of the underlying principles, rules, and policy rationales that inform all criminal laws. A cases-and-notes pedagogy along with scholarly excerpts, questions, and notes, provides students with a rich foundation for not only the academic examination of criminal laws but also the application of the law to real-world scenarios. New to the Eleventh Edition: Enhanced treatment of America's long-overdue reckoning with

over-criminalization, mass incarceration, and discriminatory law enforcement Discussion of abolitionist critiques of American penal law and consideration of restorative justice as a possible alternative to traditional punishment The chapter on rape makes more readily understandable the major split between states that still require proof of some kind of force and those that now make absence of consent sufficient. The material also contains more depth for discussion of the increasingly important question of what “consent” means, including several of the most recent cases and the new Model Penal Code provisions on rape approved by the ALI membership in June 2021. In-depth treatment of racial profiling and police use of excessive force, and a broader discussion of structural pressures and biases in the context of exploring the expansion of excuses Broader exploration of what society chooses to criminalize and prioritize for enforcement Updated notes to incorporate contemporary cases and recent news touching on criminal law Inclusion of additional preeminent cases in the field of criminal law, including: Kahler v. Kansas as a principal case in the material on the insanity defense Two new cases on the actus reus of conspiracy - the first in a drug distribution context and the second addressing Apple’s strategy for marketing ebooks on its iPad Professors and students will benefit from: Cohesive Intellectual Framework Grounds student understanding of criminal law as an instrument of social control?and provides analytical tools to interpret and understand doctrine Holistic approach encourages students to develop an understanding of principles and rules applicable to all crimes Cases-and-notes pedagogy Includes excerpted materials,

questions, and problems useful for Socratic instruction and policy discussions
Challenging Problems ? Places discussion of the law and policy in relevant, real-world scenarios Enhance students' understanding of basic principles and test their application of these principles to particular offenses

It is now trite knowledge that corporate criminal liability is laced with a large number of contradictions that seriously threaten its legitimacy. This book demonstrates that these contradictions may be avoided if courts consistently refer to an adequate mechanism of imputation. It proposes parameters for evaluating mechanisms of imputation and shows how an adequate mechanism may be determined. This distinctive book provides students and practitioners with an exposition of the current substantive and procedural corporate criminal law and considers other ways of regulating the activities of corporations than using the criminal law. It also addresses the distinction between internal knowledge and external knowledge with reference to pedigreed and non-pedigreed rules and shows how

the concept of discursive dilemma may be employed to aggregate the acts and intents of agents for the purposes of imputing these acts and intents to accused corporations and holding them liable. This book is highly recommended for students of criminology, law and business. It should also be of interest to defence counsels, prosecutors and regulatory agencies that either represent and advise corporate defendants or seek to hold corporations accountable for the breach of criminal law standards. Concentrate Q&A Criminal Law is part of the Concentrate Q&A series, the result of a collaboration involving hundreds of law students and lecturers from universities across the UK. International criminal law is at a crucial point in its history and development, and the time is right for practitioners, academics and students to take stock of the lessons learnt from the past fifteen years, as the international community moves towards an increasingly uni-polar international criminal legal order, with the International Criminal Court (ICC) at the helm. This unique Research Companion takes a critical approach to a wide variety of theoretical, practical, legal and policy issues surrounding and underpinning the operation of international criminal law as applied by international criminal tribunals. The book is divided into four main parts. The first part analyses international crimes and modes of liability, with a view to identifying areas which have been inconsistently or misguidedly interpreted, overlooked to date or are likely to be increasingly significant in future. The second part

examines international criminal processes and procedures, and here the authors discuss issues such as victim participation and the rights of the accused. The third part is a discussion of complementarity and sentencing, while the final part of the book looks at international criminal justice in context. The authors raise issues which are likely to provide the most significant challenges and most promising opportunities for the continuing development of this body of law. As international criminal law becomes more established as a distinct discipline, it becomes imperative for international criminal scholarship to provide a degree of critical analysis, both of individual legal issues and of the international criminal project as a whole. This book represents an important collective effort to introduce an element of legal realism or critical legal studies into the academic discourse.

Smith and Hogan Criminal Law: Text and Materials is an essential, accessible guide to the criminal law. The eminently clear text that is the hallmark of the Smith & Hogan approach is supplemented by extracts from all of the key criminal law cases, together with other essential materials from statutes, reports, and articles. Introductory notes, commentary, summaries, and questions help students to contextualize the materials and to apply the law confidently, gaining an in-depth insight into the problems that the law poses and faces. The contents of the eleventh edition have been substantially revised and restructured to present the materials in an order that closely matches the structure of contemporary courses on criminal law. The overall approach that the book takes has been adjusted to include significantly more

explanatory text, thus ensuring that the book is suitable for use as a core textbook. The latest legislation and all of the recent cases that continue to shape the law are included, providing the law student with everything they need to develop a thorough understanding of the key cases and the legal principles that they illustrate.

What does criminal intent mean? Criminal intent must be formed before the act, and it must unite with the act. It need not exist for any given length of time before the act; the intent and the act can be as instantaneous as simultaneous or successive thoughts. A jury may be permitted to infer criminal intent from facts that would lead a reasonable person to believe that it existed. For example, the intent to commit Burglary may be inferred from the accused's possession of tools for picking locks. Criminal intent may also be presumed from the commission of the act. For example, the intent to commit murder may be demonstrated by the particular voluntary movement that caused the death, such as the pointing and shooting of a firearm. A defendant may rebut this presumption by introducing evidence showing a lack of criminal intent. In the preceding example, if the murder defendant reasonably believed that the firearm was actually a toy, evidence showing that belief might rebut the presumption that death was intended. Proof of general criminal intent is required for the conviction of most crimes. The intent element is usually fulfilled if the defendant was generally aware that he or she was very likely committing a crime. This means that the prosecution need not prove that the defendant was aware of all of the elements constituting

the crime. For example, in a prosecution for the possession of more than a certain amount of a controlled substance, it is not necessary to prove that the defendant knew the precise quantity. Other examples of general-intent crimes are Battery, rape, Kidnapping, and False Imprisonment. Some crimes require a Specific Intent. Where specific intent is an element of a crime, it must be proved by the prosecution as an independent fact. For example, Robbery is the taking of property from another's presence by force or threat of force. The intent element is fulfilled only by evidence showing that the defendant specifically intended to steal the property. Unlike general intent, specific intent may not be inferred from the commission of the unlawful act. Examples of specific-intent crimes are solicitation, attempt, conspiracy, first-degree premeditated murder, assault, robbery, burglary, forgery, false pretense. Most criminal laws require that the specified crime be committed with knowledge of the act's criminality and with criminal intent. However, some statutes make an act criminal regardless of intent. When a statute is silent as to intent, knowledge of criminality and criminal intent need not be proved. Such statutes are called Strict Liability laws. Examples are laws forbidding the sale of alcohol to minors, and Statutory Rape laws. The doctrine of transferred intent is another nuance of criminal intent. Transferred intent occurs where one intends the harm that is actually caused, but the injury occurs to a different victim or object. To illustrate, the law allows prosecution where the defendant intends to burn one house but actually burns another instead. The concept of transferred intent applies to Homicide,

battery. For murder criminal behavior example. It is not necessary to prove that the defendant intended to kill the victim. For example, a death resulting from arson will give rise to a murder charge even though the defendant intentionally set the structure on fire without intending to kill a human being. Furthermore, the underlying crime need not have been the direct cause of the death. In the arson example, the victim need not die of burns; a fatal heart attack will trigger a charge of felony murder. In most jurisdictions, a death resulting from first-degree murder, usually include arson, robbery, burglary, rape, and kidnapping.

How does the state, as a public authority, relate to those under its jurisdiction through the criminal law? Connecting the ways in which criminal lawyers, legal theorists, public lawyers and criminologists address questions of the criminal law's legitimacy, contributors to this collection explore issues such as criminal law-making and jurisdiction; the political-ethical underpinnings of legitimate criminal law enforcement; the offence

of treason; the importance of doctrinal guidance in the application of criminal law; the interface between tort and crime; and the purposes and mechanisms of state punishment. Overall, the collection aims to enhance and deepen our understanding of criminal law by conceiving of the practices of criminal justice as explicitly and distinctly embedded in the project of liberal self-governance.

Complete Criminal Law provides students with choice extracts, supported by clear author commentary and useful learning features. The explanations and examples in this textbook have been crafted to help students hone their understanding of criminal law. The Complete titles are ambitious in their scope; they have been carefully developed with teachers to offer law students more than just a presentation of the key concepts. Instead they offer a complete package. Only by building on the foundations of the subject, by showing how the law works, demonstrating its application through extracts from cases and judgments, and by giving students the tools and the confidence to think critically about the law will they gain a complete understanding. Christopher C. Langdell (1826-1906) is one of the most influential figures in the history of American professional education. As dean of Harvard Law School from 1870 to 1895, he conceived, designed, and built the educational model that leading professional schools in virtually all fields subsequently emulated. In this first full-length biography of the educator and jurist, Bruce Kimball explores Langdell's controversial role in modern professional education and in jurisprudence. Langdell founded his model on the idea of academic meritocracy. According to this principle, scholastic achievement should determine one's merit in professional life. Despite fierce opposition from students, faculty, alumni, and legal professionals, he designed and instituted a formal system of innovative policies based on meritocracy. This system's components included the admission requirement of a bachelor's degree, the sequenced curriculum and its extension to three years, the hurdle of annual examinations for continuation and

graduation, the independent career track for professional faculty, the transformation of the professional library into a scholarly resource, the inductive pedagogy of teaching from cases, the organization of alumni to support the school, and a new, highly successful financial strategy. Langdell's model was subsequently adopted by leading law schools, medical schools, business schools, and the schools of other professions. By the time of his retirement as dean at Harvard, Langdell's reforms had shaped the future model for professional education throughout the United States.

This affordable text covers criminal law briefly and comprehensively. It is presented in the form of questions and answers, like flashcards, to review law. This quiz book series can be used for traditional self-study or in combination with trivia games and at bar trivia nights. Take the quiz book, get a friend or a couple and go to the bar and quiz each other over a beer or coffee. This quiz book is also suitable for similar

social gatherings, e.g. SBA meetings, debating union, moot court. The idea is to make the study of law more FUN and SOCIAL to liven up the study and make it memorable. The points of law have been revised, edited, and written by Eric Engle, and reflect common law in the United States. Have a lot of fun, and fiat justitia. .

EU Criminal Law is perhaps the fastest-growing area of EU law. It is also one of the most contested fields of EU action, covering measures which have a significant impact on the protection of fundamental rights and the relationship between the individual and the State, while at the same time presenting a challenge to State sovereignty in the field and potentially reconfiguring significantly the relationship between Member States and the EU. The book will examine in detail the main aspects of EU criminal law, in the light of these constitutional challenges. These include: the history and institutions of EU criminal law (including the evolution of the third pillar and its relationship with EC law); harmonisation in criminal law and procedure (with emphasis on competence questions); mutual recognition in criminal matters (including the operation of the

European Arrest Warrant) and accompanying measures; action by EU bodies facilitating police and judicial co-operation in criminal matters (such as Europol, Eurojust and OLAF); the collection and exchange of personal data, in particular via EU databases and co-operation between law enforcement authorities; and the external dimension of EU action in criminal matters, including EU-US counter-terrorism co-operation. The analysis is forward-looking, taking into account the potential impact of the Lisbon Treaty on EU criminal law.

Men have always dominated the most basic precepts of the criminal legal world – its norms, its priorities and its character. Men have been the regulators and the regulated: the main subjects and objects of criminal law and by far the more dangerous sex. And yet men, as men, are still hardly talked about as the determining force within criminal law or in its exegesis. This book brings men into sharp focus, as the pervasively powerful interest group, whose wants and preoccupations have shaped the discipline. This constitutes the 'man problem' of criminal law. This new analysis probes the unacknowledged thinking of generations of influential legal men,

which includes the psychological and legal techniques that have obscured the operation of bias, even to the legal experts themselves. It explains how men's interests have influenced the most cherished legal norms, especially the rules of human contact, which were designed to protect men from other men, while specifically securing lawful sexual access to at least one woman. The aim is to test the discipline's broadest commitments to civility, and its trajectory towards the final resolution, when men and women were declared to be equal and equivalent legal persons. In the process it exposes the morally and intellectually limiting consequences of male power.

This critical inquiry into the nature and underpinnings of criminal law legislation provides a comprehensive review and analysis of criminal law content from statutory, moral and philosophical

perspectives. The book covers fundamental principles in criminal law codifications, delivers an accurate examination of criminal elements in felonies and misdemeanors and encourages critical inquiry and analysis beyond the volume. The volume introduces the definitions of crime, Actus Reus and Mens Rea and analyzes homicide, assault and other offenses, sexual offenses, crimes against property and habitation, offenses contrary to the public morality, inchoate offenses and criminal defenses. For those interested in critical inquiry into criminal law legislation.

This volume deals with the tension between unity and diversification which has gained a central place in the debate under the label of 'fragmentation'. It explores the meaning, articulation and risks of this phenomenon in a specific area: International Criminal Justice. It brings together established and fresh voices who analyse different sites and contestations of this concept, as well as its context and specific manifestations in the interpretation and application of International Criminal Law. The volume thereby connects discourse on 'fragmentation' with broader inquiry on the merits and discontents of legal pluralism in 'Public International Law'.

Criminal Law offers a unique hybrid approach to learning criminal law. Most textbooks oversimplify the law by presenting the "black letter law" for major and defenses, but they rarely present any corresponding

exploration of the gray areas that exist beyond the basic rules of law. Conversely, casebooks present numerous edited judicial opinions, often with context. Criminal Law takes the best from each of these approaches by merging textual pedagogy and case analyses into a coherent framework that includes legal history, social context, and public policy. Taking a historical approach, legal expert Henry F. Fradella presents the law as it evolved from English common law and compares it with the modern statutory approach to crimes set forth in the American Law Institute's highly influential Model Penal Code. After providing such comparative pedagogy for each crime or defense, Criminal Law presents 1-2 edited cases that allow the reader to contrast how the "black letter law" plays out in the real world. After each case, a series of questions challenge students to engage in critical thinking about the case and its implications as precedent. Finally, chapters contain a number of additional pedagogical features that focus on public policy concerns and statutory interpretation skills using penal laws from a variety of U.S. states.
