two-year-old daughter, a membership to a boat club, and a BMW in the driveway. But underneath the surface, Scott was creatively stifled, depressed, and overworked trying to help pay for his family's beach-town lifestyle. Then one day, Scott listened to a podcast interview that changed everything. Five months later, he had quit his job, convinced his family to leave their home, and cut their expenses in half. Follow Scott and his family as they devote everything to FIRE (financial independence retire early), a subculture obsessed with maximizing wealth and happiness. Filled with inspiring case

studies and powerful advice, *Playing with FIRE* is one family's journey to acquire the one thing that money can't buy: a simpler – and happier – life. Based on the documentary *From New York Times bestselling author Linwood Barclay comes an explosive novel set in the peaceful small town of Promise Falls, where secrets can always be buried—but never forgotten... After his wife's death and the collapse of his newspaper, David Harwood has no choice but to uproot his nine-year-old son and move back into his childhood home in Promise Falls, New York. David believes his life is in free fall, and he can't find a way*

to stop his descent. Then he comes across a family secret of epic proportions. A year after a devastating miscarriage, David's cousin Marla has continued to struggle. But when David's mother asks him to check on her, he's horrified to discover that she's been secretly raising a child who is not her own—a baby she claims was a gift from an “angel” left on her porch. When the baby's real mother is found murdered, David can't help wanting to piece together what happened—even if it means proving his own cousin's guilt. But as he uncovers each piece of evidence, David realizes that Marla's mysterious child

is just the tip of the iceberg. Other strange things are happening. Animals are found ritually slaughtered. An ominous abandoned Ferris wheel seems to stand as a warning that something dark has infected Promise Falls. And someone has decided that the entire town must pay for the sins of its past...in blood. A true, bestselling story from the battlefield that faithfully portrays the horror, the madness, and the trauma of the Vietnam War More than half a million copies of Chickenhawk have been sold since it was first published in 1983. Now with a new afterword by the author and photographs taken

by him during the conflict, this straight-from-the-shoulder account tells the electrifying truth about the helicopter war in Vietnam. This is Robert Mason's astounding personal story of men at war. A veteran of more than one thousand combat missions, Mason gives staggering descriptions that cut to the heart of the combat experience: the fear and belligerence, the quiet insights and raging madness, the lasting friendships and sudden death—the extreme emotions of a "chickenhawk" in constant danger. It's cold, wet and dangerous, so why do we do it? The Complete Story

An international team of researchers studied the following aspects of training in the United Kingdom's motor vehicle repair and sales sector: structure and characteristics; institutional and social context; relationship to the labor market; changing structural, economic, and organizational conditions; and

training/recruitment and relationship to the British education system. Government statistics were analyzed, and case studies were conducted of five very different companies, including a small franchise of a major auto maker, a large dealership/service center, a vehicle electrical system repairer that is 1 of 700 outlets, and a family business. Each case study included a profile of the company, its personnel management and vocational policies, and its provisions for continuing/ongoing training. The study concluded that the British automotive industry exemplified the demise of the country's

vocational and education training system.

Although the recent national system of vocational qualifications and other initiatives have promised to improve the level and consistency of training provision in the automotive industry, the main issue now facing individual dealerships remains that of finding the resources to invest in the level of training required to produce the skilled employees demanded by vehicle manufacturers, government standards, and market pressures.

From those who insist that Barack Obama is Muslim to the European legislators who go to extraordinary lengths to ban items of clothing worn by a tiny percentage of their populations, Gary Younge shows, in this fascinating, witty, and provocative examination of the enduring legacy and obsession with identity in politics and

everyday life, that how we define ourselves informs every aspect of our social, political, and personal lives. Younge -- a black British male of Caribbean descent living in Brooklyn, New York, who speaks fluent Russian and French -- travels the planet in search of answers to why identity is so combustible. From Tiger Woods's legacy to the scandal over Danish cartoons of the Prophet Mohammed, he finds that identity is inescapable, but solidarity may not be as elusive as we fear. We are more alike than we are unlike. But the way we are unlike matters. To be male in Saudi Arabia, Jewish in Israel or white in Europe

confers certain powers and privileges that those with other identities do not have. In other words, identity can represent a material fact in itself. As Gary Younge demonstrates in this classic book, now featuring a new introduction,, how we define ourselves affects every part of our lives: from violence on the streets to international terrorism; from changes in our laws to whom we elect; from our personal safety to military occupations. Moving between fascinating memoir and searing analysis, from beauty contests in Ireland to the personal views of Tiger Woods, from the author's own terrifying student days in

Paris to how race and gender affect one's voting choices, Gary Younge makes surprising and enlightening connections and a devastating critique of the way our society really works.

The Untold Story of Driving Green

Where and how it Succeeds

Mazda MX-5

In Racing Toward Zero, the authors explore the issues inherent in developing sustainable transportation. They review the types of propulsion systems and vehicle options, discuss

low-carbon fuels and alternative energy sources, and examine the role of regulation in curbing emissions. All technologies have an impact on the environment, from internal combustion engine vehicles to battery electric vehicles, fuel cell electric vehicles, and hybrids-there is no silver bullet. The battery electric vehicle may seem the obvious path to a sustainable, carbon-free transportation future, but it's not the only, nor necessarily the best, path forward. The vast majority of vehicles today use the internal combustion engine (ICE), and this is unlikely to change anytime soon. Improving the ICE and its fuels-entering a new ICE age-must be a main route on the road to zero emissions. How do we go green? The future requires a balanced approach to transportation. It's not a matter of choosing between combustion or electrification; it's

combustion and electrification. As the authors say, "The future is eclectic." By harnessing the best qualities of both technologies, we will be in the best position to address our transportation future as quickly as possible

An English Car Designer Abroad is the humorous and personal account of a life spent working on the design of some of the world's best known cars. Commencing his career as a designer at Vauxhall Motors, Luton in 1973, Peter Birtwhistle then left the UK in 1977 to take a position abroad, at Audi in Germany, where he lived for the rest of his working life. From Audi, his career took him to Porsche in Stuttgart, and eventually, in 1988, to the Japanese company Mazda, with whom he would help develop a Design Centre close to

Frankfurt, eventually becoming Chief Designer for Mazda Motor Europe. During his career, Birtwhistle was involved in the design of some very significant cars and in his work and travels, crossed the paths of many significant personalities from the car industry. Car design has changed enormously since the time he commenced his career, and for Birtwhistle it was clear, his story needed to be documented before it was lost in time. Featuring original photographs and illustrations from the author's own
