*Praise for Leading the High-Energy Culture "If you're looking for a step-by-step guide on how to become a high-energy leader, you've found it here!" --Tom Croston, Vice President/General Manager of Corporate Shared Services, Gap, Inc. "Whether its business, sports, or even parenting, successful leaders share one thing in common--high energy! David is right; it can be developed. I find it unique for someone to identify the truly key elements of leadership. David has done this in a way that fosters success in these endeavors as well as those of family, church, and community." --Pat Williams, Senior Vice President, Orlando Magic, and author of Leadership Excellence "Jack Welch identified 'energy' as one of the critical characteristics he looked for in effective leaders but never talked about how they develop it. David Casullo's book provides the road map for how to harness your own energy while energizing those around you. Every leader can increase their effectiveness by implementing the ideas he presents." --Patrick M. Wright, William J. Conaty GE Professor of Strategic Human Resources in the ILR School*

*(Industrial and Labor Relations), Cornell University Leaders and managers today are experiencing an "energy crisis" resulting from the failure to engage and inspire their people. Yet, a handful of leaders have found an endless supply of energy to fuel their organizations. They're the ones who attract the top talent, the most loyal customers, and the public's imagination. They're leaders like Zappos's Tony Hsieh and the late Steve Jobs, who've built cultures energized at every level to innovate, grow, and succeed. Leading the High-Energy Culture: What the Best CEOs Do to Create an Atmosphere Where Employees Flourish is the handbook to powering this kind of workplace with the energy that your workforce already possesses. A change this big starts at the top. David Casullo, a leadership authority and strategic consultant to businesses large and small, explains the steps for establishing an authentic leadership presence based on your powerful personal truths. Then he shares the secrets for how to communicate your vision in order to create a sense of purpose throughout your organization and beyond, thereby spreading excitement to consumers, investors, and the media. Using his own experience, research, and demonstrated results from the leadership development program that he developed while helping transform Raymour & Flanigan from a small regional company to a billion-dollar furniture retail giant, Casullo outlines the specific steps that let you discover and unlock the latent energy in your team. Casullo organizes these practices into 10 simple principles, each illustrated and reinforced with firsthand client interviews; real-world examples from businesses such as Ford, FedEx, and GE; and thought-provoking interactive exercises. These principles illuminate the path to creating real employee engagement by giving you an actionable model to: Learn what matters to your organization and its people, and align your leadership strategy with these truths Communicate clearly, with purpose and passion, to create a resonant message Find the leaders in your workforce who give your organization a competitive advantage Leading the High-Energy Culture uses methods proven to generate results. Beyond the bottom line, however, it will reignite your own commitment and passion by giving you a fresh perspective on how to become an energized leader of a charged-up organization.*

Werner Herzog's *Nosferatu - Phantom der Nacht* (1979) is one of the masterpieces of the New German Cinema of the 1960s and 70s. Adapted from Bram Stoker's *Dracula*, and mindful too of F. W. Murnau's earlier German film version of that same novel, Herzog's film is perhaps the most compelling screen treatment of the vampire myth. In this comprehensive account of *Nosferatu*, S. S. Prawer begins with discussion of Stoker's book, the cultural fascination with vampires, and the formation and evolution of Herzog's career. Taking the production history into account, Prawer ultimately foregrounds the

cultural and aesthetic components of the film that combine to such powerful effect. This second edition features a new foreword by Brad Prager and original cover artwork by Matt Brand.

Examining 35 series of economic statistics, this volume covers a variety of topics, including: using and abusing statistics; total output, production and growth; investment and capital expenditures; employment, earnings and profits; and labour statistics.

More and more we are challenged by today's learning environment – students are different, digital tools are evolving, and instructors are continually asked to do more with less yet show greater results. With the creation of Many Europes, Choice & Chance in Western Civilization, an entirely integrated program, we recognize this changing environment and set out with the goal of better meeting the western civilization course challenges of improving student performance, critical analysis skills, and overall comprehension in a continually evolving teaching and learning environment. What does it mean – integrated program? Rather than a traditional narrative text that then has ancillary support material or supplements tacked onto it, Many Europes was constructed as a program. Each narrative section has clearly stated learning objectives that are tied to the digital tools which drive the program's assessment. A key tool in driving knowledge is McGraw-Hill's LearnSmart, an adaptive assessment tool, which has proven results of increasing student comprehension and overall course results. Yet, we realize that while history instructors want students to know basic historical facts, the actual goal of the course is improving student's critical thinking abilities. Our Critical Missions develop analysis skills through the examination of maps, primary sources and the completion of a written argument. In addition, several other assignment types within McGraw-Hill's Connect drive the development of analysis skills and are also tied directly to learning objectives. What do we mean by Choice? Unique to this program, Many Europes discusses European history as a series of choices within a set of historical circumstances, driving greater critical analysis as students realize that Europe's fate was never inevitable but instead was created by individuals with diverse voices and perspectives. Choice also means flexibility. Many Europes' flexible content including a customizable documents collection available as print or digital as well as many user options from a completely digital experience to a hybrid print and digital experience, or if you must, an all print experience. What do we mean by Chance? In history chance shows itself as a dropped letter, an unexpected storm, or surprise turn of events. Chance can also show itself as a new way, path, or direction that allows for the anticipation and expectation of something better. Many Europes' flexible content coupled with powerful digital learning tools and a customizable documents collection gives users an innovative choice for the teaching and learning of Western Civilization as well as a better chance for improved student results and course outcomes.

In one of the darker aspects of Nazi Germany, churches and universities - generally respected institutions - grew to accept and support Nazi ideology. Complicity in the Holocaust describes how the state's intellectual and spiritual leaders enthusiastically partnered with Hitler's regime, becoming active participants in the persecution of Jews, effectively giving Germans permission to participate in the Nazi regime. Ericksen also examines Germany's deeply flawed yet successful postwar policy of denazification in these institutions. Many Europes: Choice and Chance in Western Civilization, Volume 2

*This ground-breaking book is the first to describe in detail how teachers, supported by university educators and education advisers, might plan and implement innovative ideas based on sound theoretical foundations. Focusing on the teaching and learning of intercultural communicative competence in foreign language classrooms in the USA, the authors describe a collaborative project in which graduate students and teachers planned, implemented and reported on units which integrated intercultural competence in a systematic way in classrooms ranging from elementary to university level. The authors are clear and honest about what worked and what didn't, both in their classrooms and during the process of collaboration. This book will be required reading for both scholars and teachers interested in applying academic theory in the classroom, and in the teaching of intercultural competence.*

*Strategy and Management of Industrial Brands* is the first book devoted to business-to-business products and services. Looking at numerous companies, this book defines two brand objectives that are specific to the industrial and service sectors and which must be added to the traditional functions of branding: the minimization of risk as perceived by buyers, and the facilitation of the customer company's performance by the supplier brand. Different ways of classifying brands are suggested, providing a better understanding of brand strategies adopted by business-to-business companies, as well as new concepts such as brand 'printability', 'visibility', and 'purchaseability'. Five major brand categories are dealt with in separate chapters: -entering goods brands; -intermediary equipment goods brands; -equipment goods brands; -business-to-business service brands; and -industrial distributor brands. From a practical point of view, the aim of the book is to address the main concerns of managers: How to create and protect brands? What type of visual identity is appropriate? How to manage international brands? An analysis of 1,500 industrial brands as well as 40 case studies are included in this book. These brands are used in both the industrial (automotive, building, aeronautics, IT, etc.) and consumer sectors (clothing, electronics, food packaging, telecommunications, etc.). This book has been written for professors and students of universities and business schools, as well as managers and people working in industry or the service sector.
