As there are different races and people in the world, so there are different cultures - meaning that cultural diversity is inevitable.

Through human contact and association cultures meet. In such meetings every individual and culture projects itself as worthy, and should be held in high esteem. In today's world it is not encouraging to be ethnocentric -

always taking action or in actions that crystallize and project a feeling of one's own culture or racial superiority. Such attitude obstructs meaningful interaction, human relations, tolerance and cooperation. Conversely, the skill and ability to tolerate and communicate effectively with people from diverse cultures is a social activity which begins from thought to behaviour, in both spoken and non-spoken versions. With simple, versatile content that separates it from other texts on electrical machines, this book is an ideal self-study tool for advanced students in electrical and other areas of engineering. In response to the often inadequate, rushed coverage of fundamentals in most basic circuit analysis books and courses, this resource is intelligently designed, easy to read, and packed with in-depth information on crucial concepts. Topics include three-phase circuits, power measurement in AC circuits, magnetic circuits, transformers, and induction, synchronous, and direct-current machines. The book starts by reviewing more basic concepts,
