In today's changing healthcare environment, nurses continue to face many challenges and opportunities. Introductory Medical-Surgical Nursing equips LPN/LVN students with the practical knowledge and skills necessary to provide safe and effective nursing care to adult medical-surgical clients. The 12th edition of this well-respected text has been fully updated to reflect current medical and nursing practice with visually enticing photos and illustrations that bring the information to life and reinforce learning. Students fine tune their understanding of diseases, procedures, signs, symptoms, and normal vs. abnormal comparisons through dynamic visuals that replace text explanations when a picture better tells the story. Outstanding features help position students to succeed in the real world of nursing including: NEW Concept Mastery Alerts that highlight commonly misunderstood concepts and provide you with a helpful explanation to clarify it. Over 30 Nursing Care Plans that address common conditions such as Alzheimer disease, cancer, myocardial infarction, stroke, diabetes mellitus, and chronic renal failure Concept Care Maps that present a visual diagram of the client's health problems, expected outcomes, and nursing interventions Evidence-Based Practice boxes that include a Clinical Question, Evidence, and Nursing Implications illustrate how research relates to practice. And much, much more! Introductory Medical-Surgical Nursing is the book all LPN/LVN students need to build a strong foundation of adult medical-surgical nursing for a successful course of study and future practice. A comprehensive and free package of student online resources including NCLEX-PN-style chapter review questions, Watch and Learn video clips, and Concepts in Action animations rounds out the learning experience.

Get a unique, conceptual approach to nursing care in this rapidly-changing healthcare environment. Lewis's Medical-Surgical Nursing, 11th Edition gives you a solid foundation in medical-surgical nursing. This thoroughly revised text includes an increased focus on nursing concepts, strong evidence-based content, coverage of clinical trends, and an essential pathophysiology review. Content is presented in a readable format and covers every unique approach to nursing care including health promotion, acute intervention, and ambulatory care. A variety of helpful boxes and tables make it easy for you to find essential information and a building-block approach throughout make even the most complex concepts simple to grasp. Key topics such as interprofessional care, delegation, safety, and prioritization are integrated throughout.

Additionally, extensive drug therapy information and diagnostic studies tables help give you a full picture of care. Best of all - a complete collection of learning and study resources helps you learn more effectively and offers valuable, real-world preparation for clinical practice. Highly readable format offers students a strong foundation in medical-surgical nursing. Content written and reviewed by leading experts in the field ensures that information is comprehensive, current, and clinically accurate. Interprofessional Care tables and sections in all management chapters emphasize the importance of total patient care in today's health care settings and outline the role of each provider in managing disorders. Bridge to NCLEX Examination review questions at the end of each chapter reinforce key content while helping you to prepare for the NCLEX examination with both standard and alternate item format questions. Check Your Practice boxes challenge you to think critically and interact with patient data. Scenarios and in-class activity questions are provided to promote active learning. Informatics in Practice boxes discuss how technology is used by nurses and patients in healthcare settings. Evidence-based practice boxes help you understand how to apply

the latest research to real-life patient care. Safety Alerts throughout the book highlight patient safety issues and focus on the latest National Patient Safety Goals. UNIQUE! Nursing management is presented in a consistent and comprehensive format, addressing the unique approaches to nursing care. Case Studies throughout text emphasize prioritization, delegation, and concept mapping to help you learn to prioritize and delegate patient care. Separate chapter on Genetics focuses on practical application to nursing care of patients. Genetics in Clinical Practice boxes cover key topics such as genetic testing, Alzheimer's disease, sickle cell disease, and genetics-related ethics issues. Genetic Risk alerts and Genetic Link headings highlight specific genetic issues related to body system assessments and disorders. Ethical/Legal Dilemmas boxes promote critical thinking for timely and sensitive ethical and legal issues. Pathophysiology Map flow charts make it easier for you to visualize and understand changes occurring in major diseases. Focused Assessment tables reflect a realistic "assessment on the run" approach and offer brief checklists for evaluating the status of previously identified health problems and monitoring for signs of new problems. Extensive drug therapy content includes Drug Therapy tables and concise Drug Alerts highlighting important safety considerations for key drugs. Promoting Population Health tables summarize government health care goals as they relate to specific disorders and identify important strategies for the prevention and early detection of diseases. Nutritional Therapy tables summarize nutritional interventions and strategies for promoting healthy lifestyles in patients with various conditions. Promoting Health Equity boxes and a dedicated chapter on health disparities and culturally competent care highlight risk factors and important issues related to the nursing care of various ethnic groups. Complementary and Alternative Therapies boxes summarize what you need to know about the clinical uses, effects, and nursing implications of herbal remedies and complementary and alternative treatment options. Nursing interventions and nursing diagnoses are listed in order of priority. Nursing Management boxes highlight the nurse's role in working with members of the interprofessional team and also cover specific topics and skills related to delegation. Assessment Abnormalities tables alert the nurse to frequently encountered abnormalities and their possible etiologies. Core clinical content focuses on highlighting and incorporating QSEN competencies. Emergency Management tables outline the treatment of health problems most likely to create medical emergencies. Learning Outcomes and Key Terms help you identify the key content for that chapter. Health History tables present key questions to ask patients related to a specific disease or disorder. Patient and Caregiver teaching tables provide critical information to help you educate others who will be helping to care for the patient. Gerontology and chronic illness included throughout the text under Gerontologic Considerations headings and in Gerontologic Assessment tables. Nursing Assessment tables summarize the key subjective and objective data related to common diseases. Gender Differences boxes discuss how women and men are affected differently by conditions such as pain and hypertension. Diagnostic Studies tables provide details of commonly used lab tests that help assess various body systems. Over 60 nursing care plans clearly show the linkages among NIC, NOC, and nursing diagnoses, and applies them to nursing practice. Over 800 full-color illustrations and photographs clearly demonstrate disease processes and related anatomy and physiology. NEW! An increased focus on concepts throughout the text includes a new Concepts Table of Contents that lists the most common exemplars with page number references, a new Problems Related to Comfort and Coping section, and the most relevant concepts listed at the start of each chapter. NEW! Additional body map images added throughout text.

Lippincott Coursepoint for Brunner & Suddarth's Textbook of Medical-Surgical Nursing

The only book featuring nursing care plans for all core clinical areas, Swearingen's All-In-One Nursing Care Planning Resource, 4th Edition provides 100 care plans with the nursing diagnoses and interventions you need to know to care for patients in all settings. It includes care plans for medical-surgical, maternity/OB, pediatrics, and psychiatric-mental health, so you can use just one book throughout your entire nursing curriculum. This edition includes a new care plan addressing normal labor and birth, a new full-color design, new QSEN safety icons, new quick-reference color tabs, and updates reflecting the latest NANDA-I nursing diagnoses and

collaborative problems. Edited by nursing expert Pamela L. Swearingen, this book is known for its clear approach, easy-to-use format, and straightforward rationales. NANDA-I nursing diagnoses are incorporated throughout the text to keep you current with NANDA-I terminology and the latest diagnoses. Color-coded sections for medical-surgical, maternity, pediatric, and psychiatric-mental health nursing care plans make it easier to find information quickly. A consistent format for each care plan allows faster lookup of topics, with headings for Overview/Pathophysiology, Health Care Setting, Assessment, Diagnostic Tests, Nursing Diagnoses, Desired Outcomes, Interventions with Rationales, and Patient-Family Teaching and Discharge Planning. Prioritized nursing diagnoses are listed in order of importance and physiologic patient needs. A two-column format for nursing assessments/interventions and rationales makes it easier to scan information. Detailed rationales for each nursing intervention help you to apply concepts to specific patient situations in clinical practice. Outcome criteria with specific timelines help you to set realistic goals for nursing outcomes and provide quality, cost-effective care. NEW! Care plan for normal labor and birth addresses nursing care for the client experiencing normal labor and delivery. UPDATED content is written by practicing clinicians and covers the latest clinical developments, new pharmacologic treatments, patient safety considerations, and evidence-based practice guidelines. NEW full-color design makes the text more user friendly, and includes NEW color-coded tabs and improved cross-referencing and navigation aids for faster lookup of information. NEW! Leaf icon highlights coverage of complementary and alternative therapies including information on over-the-counter herbal and other therapies and how these can interact with conventional medications.

978-1-60913-691-8 LPN to RN Transitions 978-1-60913-686-4 Introduction to Community Based Nursing 978-1-4511-7277-5 Gerontological Nursing

Smeltzer & Bare,,s Textbook of Medical-Surgical Nursing is designed to help nurses prepare for their responsibilities in an increasingly complex and technologically challenging healthcare environment. By integrating and balancing the art and science of adult medical-surgical nursing, its strong focus on physiology, pathophysiology and psychosocial and cultural concepts as they relate to nursing care is supported by diverse concepts such as nutrition, pharmacology, and gerontology. The fourth edition covers the core concepts, procedures, and skills of medical-surgical nursing, emphasizing patient-centered care, as it reinforces and consolidates classroom learning. Units 1-3 introduce the theory of medical-surgical nursing, issues and trends in the healthcare system, and the role of the nurse. Organized by body system, Units 4-16 cover adult health issues systematically: the first chapter in each unit discusses the normal anatomy and physiology of the body system; subsequent chapters cover management of specific disorders, their etiology, pathophysiology, clinical manifestations, assessment and findings, and leadership and management. A wide-range of free online resources round out the learning experience. Key features include: -NEW! Cultural Considerations boxes explore issues such as diabetes and cardiovascular disease in Indigenous Australian and Maori populations. -NEW! Practice Nurse boxes illustrates real-world nursing in general practice. -The Thoughtful Practice model introduces students to person-centered care, reflective practice, and clinical reasoning. -Case Studies opening each unit provide examples of nursing problems, nursing interventions, and outcomes. -Evidence-Based Practice exercises encourage thinking about specific nursing interventions. -Nursing management and leadership issues and considerations are included throughout. -Nursing Care guidelines clarify the nurse,,s patient-care responsibilities systematically, under the headings Assessment, Nursing Interventions, and Expected Patient Outcomes. -Learning Objectives at the beginning of each chapter give an overview and focus. -Clinical Reasoning exercises foster independent critical thinking. -Risk Factor, Guidelines, and Pharmacological charts also support learning.
