This book is compiled of scientific research on melanin and copper as well as my personal experiences and understanding of them being one and the same. All pigment comes from copper and in that pigment we see the process of life in motion. Melanin is the name of the human pigment, but copper is the source.

Findings published in the international scientific literature are fully taken into account, and due consideration is also given to empirical evidence, bearing in mind that mechanisms

Beyond providing an up-to-date scientific perspective on the effects of vitamin C, the author hopes to promote human health worldwide by encouraging proper use of the vitamin. To this end, recommendations are made on the amount
