

Memorandum Of 2014 Business Paper Term 1 Grade 12

This book examines an important economic development in East Asia during the first decade of the 21st century. Whereas regional arrangements were, with the sole significant exception of ASEAN, conspicuously absent before 2000, they have proliferated since 2000 in both the monetary and trade areas. The book places this political development in the changing nature of the national economies, especially their increasing integration into regional and global value chains with the fragmentation of production processes. This is a freshly written, coherent analysis of the topic, drawing upon (updated) material from a series of articles that the author has published on the subject over the years. Although the book is based on theoretical and, especially, empirical analysis of regionalism, it is written in a non-technical style accessible to a wide range of readers. The book is likely to be adopted as supplementary reading for university courses on Asian economies, whether be it in area studies or economics/political economy disciplines.

High speed rail (HSR) is being touted as a strategic investment for connecting people across regions, while also fostering prosperity and smart urban growth. However, as its popularity increases, its implementation has become contentious with various parties

Read Book Memorandum Of 2014 Business Paper Term 1 Grade 12

contesting the validity of socioeconomic and environmental objectives put forward as justification for investment. *High Speed Rail and Sustainability* explores the environmental, economic and social effects of developing a HSR system, presenting new evaluations of the proposed system in California in the US as well as lessons from international experience. Drawing upon the accumulated experience from past HSR system development around the world, leading experts present a diverse set of perspectives as well as diverse contexts of implementation. Assessments of the California case as well as cases from Japan, France, Germany, Italy, Spain, Taiwan, China, and the UK show how governments and stakeholders have bridged the gap between the vision and the realities of connecting metropolitan regions through HSR. This is a valuable resource for academics, researchers and policy-makers in the areas of urban planning, civil engineering, transportation and environmental design.

Confronting Corruption in Business Trusted Leadership, Civic Engagement Routledge International Business is a well-established research field, in which regionalisation has recently gained significant prominence. Europe comprises marketplaces characterised by unique patterns of highly advanced economic integration. No other marketplace in the world has progressed to the same levels of harmonisation across sovereign countries and economies. European Business is a subject in its own right with its own research momentum. Contemporary research evidences that firms view Europe as a challenging, mostly \square yet not entirely \square mature market location. Yet this location, often

Read Book Memorandum Of 2014 Business Paper Term 1 Grade 12

seen from a multi-country perspective, is subject to complexities revealing strategic corporate strengths and weaknesses. Theory, concepts and models known from International Business hence often vary in their applicability and relevance in this business environment. This comprehensive reference volume brings together a global team of contributors to analyse and overview the key issues, themes and phenomena that affect business in Europe. With interdisciplinary perspectives, the book covers crucial themes that any European Business research needs to acknowledge, including business cultures and identity, entrepreneurship and innovation, M&A and institutional trends, European HRM, migration, climate change issues, Brexit, and more. The selection of authors, from 17 countries worldwide, reflects the international scope of this research field and its agenda. A unique resource, this book provides an essential guide to researchers, research students and scholars of business and the social sciences, as well as the informed business community.

Credit rating agencies play an essential role in the modern financial system and are relied on by creditors and investors on the market. In the recent financial crisis, their power and reliability were often questioned, yet a simple rating downgrade could threaten to bankrupt a whole country. This book examines the governance of credit rating agencies, as expressed by their ability to fairly, ethically and consistently assign higher rates to issuers having lesser default risks. However, factors such as the drive for increased revenue and market share, the inadequate business model, the inadequate methodology of assessing risk, opacity and inadequate internal monitoring have all been identified as critical governance failures for credit agencies. This book explores these issues, and proposes some potential solutions and improvements. This will be of interest to researchers and advanced students of corporate finance, finance, financial economics, risk management, investment management, and banking.

This report critically analyzes the complex environment for private sector development in Papua New Guinea, showing the

Read Book Memorandum Of 2014 Business Paper Term 1 Grade 12

country's potential to capitalize on its vast wealth well into the coming decades. However, to ensure sustainable and inclusive growth, Papua New Guinea needs ongoing reform so that the benefits of future resource exports benefit the entire economy. This report was produced by the Pacific Private Sector Development Initiative, a regional technical assistance facility cofinanced by the Asian Development Bank (ADB), the Government of Australia, and the New Zealand Government.

This book contains revised and extended versions of selected papers from the Sixth International Symposium on Business Modeling and Software Design, BMSD 2016, held in Rhodes, Greece, in June 2016, organized by the Institute IICREST in cooperation with BPM-D, Aristotle University of Thessaloniki, TU Delft, CTIT - University of Twente, IMI-BAS, the Dutch Research School SIKS, and AMAKOTA Ltd. BMSD 2016 received 59 paper submissions from which 27 papers were selected for publication in the BMSD'16 proceedings. Additional post-symposium reviewing was carried out reflecting both the qualities of the papers and the way they were presented. 11 best papers were selected for the current Springer edition, that were carefully revised and extended,

Read Book Memorandum Of 2014 Business Paper Term 1 Grade 12

following the reviewers' comments and recommendations. The selection considers a large number of BMSD-relevant research topics: from business-processes-related topics, such as business process management, variability of business processes, and inconsistencies risk detection, (here it is to be mentioned that several papers consider and analyze particular business process modeling formalisms and tools), through system-engineering-related topics, such as conceptual modeling, enterprise architectures, human-centered design, signs modeling, and idiosyncrasies capturing, to service-oriented-software-engineering-related topics, such as service orchestration and e-services design.

While the partnership has been a viable alternative to incorporation for centuries, the much more recent limited liability company (LLC) has increasingly become the business organization of choice for new firms in the United States. This Handbook inclu

Decision-making and the political economy of investment

From bank bailouts to austerity, Europe's and Ireland's response to the economic crisis has been engineered specifically to shift the burden of paying for the crisis onto ordinary citizens while investors, financiers, bankers and the privileged are protected. The authors expose the class-based nature of Ireland's crisis resolution. Since China adopted its 'open door' policy in 1978, which altered its development strategy from self-sufficiency to active participation in the world market, its goal has remained unchanged: to assist the readjustment of China's economy, to coordinate its modernization programs, and to improve its quality of life. With the 1997 launch of the 'Going Global' policy, an outward focus regarding foreign investment was added, to circumvent trade barriers and improve the competitiveness of Chinese firms. In order to accommodate inward and outward investment, China's participation in the international investment regime has underpinned its efforts to join multilateral investment-related legal instruments and conclude international

Read Book Memorandum Of 2014 Business Paper Term 1 Grade 12

investment agreements. This collection, compiled by award-winning scholar Professor Julien Chaisse, explores the three distinct tracks of China's investment policy and strategy: bilateral agreements including those with the US and the EU; regional agreements including the Free Trade Area of the Asia Pacific; and global initiatives, spear-headed by China's presidency of the G20 and its 'Belt and Road initiative'. The book's overarching topic is whether these three tracks compete with each other, or whether they complement one another - a question of profound importance for the country's political and economic future and world investment governance.

Transculturalism and Business in the BRIC States, edited by Yvette Sánchez and Claudia Franziska Brühwiler, is the first handbook on the BRIC States that offers a transcultural perspective, which goes beyond the typical 'how to' manuals or economic projections and provides an understanding of transculturalism as it is studied and practiced in the respective countries themselves. This unique reference book also offers insights into the relations between the corresponding states and the challenges facing those trying to foster more intense business exchanges. The reader learns to interpret cross-cultural issues from the perspectives of the BRIC states themselves and gains insight into the way scholars in the BRIC area reflect on transculturalism. Moreover, it introduces the reader to fresh

Read Book Memorandum Of 2014 Business Paper Term 1 Grade 12

visualizations that help consider transculturalism beyond the known categories. The book will appeal, on the one hand, to practitioners who are active in the BRIC states and wish to better grasp the challenges to business relations, as well as the intra-area dynamics and, on the other hand, to scholars in transcultural studies and international management, due to its insider approach. Since the book combines theoretical concepts with a clear geographic focus and a critical approach to traditional models, it is suitable for both academic audiences as well as for practitioners who appreciate a sound theoretical base and a fresh take on a subject.

How different is the sharing economy from the traditional economy? What can entrepreneurs learn from failure? Can start-ups change the world? SAGE Business Researcher's Issues in Entrepreneurship offers an in-depth and nuanced look at a wide range of today's latest issues and controversies in entrepreneurship. This new collection of timely readings delves into current topics such as learning from failure, social entrepreneurship, flat management, crowdfunding, and more. Written with the rigor and immediacy of the best explanatory journalism, each issue provides deep, balanced, and authoritative coverage on the selected topic and key research, pointing students to reliable resources for further inquiry. These articles are perfect for outside reading assignments or in-class debates for any

introductory entrepreneurship course.

This ground-breaking research represents the most complete collection yet on how the hospitality industry is addressing sustainability and ethical issues. Covering supply chain management, innovative sustainability initiatives, CSR programmes, biologically-respectful tourism and Value Creation, Sustainability in Hospitality: How Innovative Hotels are Transforming the Industry presents valuable global viewpoints on embedding sustainability into all aspects of the hospitality industry, and the impact this could have on transforming the sector into an advocate for more sustainable, eco-conscious tourism. The chapters in this edited collection span organizational governance, human rights and labour practices, environment and climate change, fair operating practices, stakeholder engagement, CSR and strategic management. The global reach of the collection brings case studies from China, the US, the UK, Mexico and Italy, while company case studies include Fairmont Luxury Hotels

and Sextantio. Sustainability in Hospitality: How Innovative Hotels are Transforming the Industry will be an essential read for academics researching the development of ethically-conscious and sustainable hospitality, and for hotel managers and group CEOs who want to know how sustainability and CSR can be embedded in their day-to-day operations.

In recent years, interest in the large group of skilled immigrants coming from India to the United States has soared. However, this immigration is seen as being overwhelmingly male. Female migrants are depicted either as family migrants following in the path chosen by men, or as victims of desperation, forced into the migrant path due to economic exigencies. This book investigates the work trajectories and related assimilation experiences of independent Indian women who have chosen their own migratory pathways in the United States. The links between individual experiences and the macro trends of women, work, immigration and feminism are explored. The authors use historical records, previously unpublished gender disaggregate immigration data, and interviews with Indian women who have migrated to the US in every decade since the 1960s to demonstrate that independent migration among Indian women has a long and substantial history. Their status as skilled independent migrants can represent a relatively privileged and empowered choice. However, their working lives intersect with the gender constraints of labor markets in both India and the US. Vijaya and Biswas argue that their experiences of being relatively empowered, yet pushing against gender constraints in two different environments, can provide a unique perspective to the immigrant assimilation narrative and comparative gender dynamics in the global political economy.

Casting light on a hidden, but steady, stream within the large group of skilled immigrants to the United States from India, this book will be of interest to researchers in the fields of political economy, anthropology, and sociology, including migration, race, class, ethnic and gender studies, as well as Asian studies.

This book explains the concepts of Ethical Business Practice (EBP) and Ethical Business Regulation (EBR), a new paradigm in compliance and enforcement based on behavioural science and ethics. EBR provides the basis for an effective relationship between a business and its regulators, resulting in better outcomes for both. EBR is attracting extensive attention from regulators and businesses around the world. The UK Government's 2017 Regulatory Futures Review draws on EBR as the foundation for its policy of 'regulatory self-assurance'. EBR draws on findings from behavioural science, responsive regulation, safety and business and integrity management to create a practical and holistic approach. Examples include the open culture that is essential for civil aviation safety, the Primary Authority agreements between regulators and national businesses, and feedback mechanisms provided by market vigilance systems and sectoral consumer ombudsmen. This book provides an essential blueprint for sustainable business and effective future regulation.

Forests are under tremendous pressure from human uses of all kinds, and one of the most significant threats to their sustainability comes from commercial interests. This book presents a comprehensive examination of the interactions between the forest products sector and the sustainability of forests. It captures the most current sustainability concerns within the

forestry sector and various sustainability-oriented initiatives to address these. Experts from around the world analyze interconnected topics including market mechanisms, regulatory mechanisms, voluntary actions, and governance, and outline their effectiveness, potential, and limitations. By presenting a novel overview of the burgeoning field of business sustainability within the forestry sector, this book paves a way forward in understanding what is working, what is not working, and what could potentially work to ensure sustainable business practices within the forestry sector,

Gender Equality and Responsible Business

Turkey

This book examines the contemporary and contentious question of the critical connections between business and human rights, and the implementation of socially responsible norms in developing countries, with particular reference to Kenya, Nigeria, South Africa. Business enterprises and transnational corporate actors operate in a complex global environment, especially when operating in high risks sectors such as oil and gas, mining, construction, banking, and health care amongst others. Understanding

human rights responsibilities, impacts and socially responsible behaviour for companies is therefore an essential component of corporate risk management in our current world. The release of the United Nations Guiding Principles on Business and Human Rights, an instrument consisting of 31 principles on this issue, has further underscored the emergence of a rapidly developing set of international law norms on human rights responsibilities of businesses and transnational corporations. It has also shaped the discourse on corporate accountability for human rights. In addition to minimizing litigation, financial and reputational risks, understanding and demonstrating corporate respect for human rights is vital to building a culture of trust and integrity amongst local communities, investors, and shareholders. While Africa has been at the receiving end of deleterious activities of corporate actors, it has failed to address corporate impunity and human rights violations by non-state actors. Questions abound revolving around the underpinnings of a corporate responsibility to respect human rights, that is, how non-western and particularly African conceptions of respect may help develop a 'beyond do no harm' approach to respect; policy discourses on human rights due diligence, human rights impact assessment; mandating corporate respect for human rights in both domestic and international law. This book examines, clarifies, and unpacks the guiding principles of a rights-based approach to development and social inclusion. It offers an excellent exposition of regulatory capacity, institutional efficacy and democratic legitimacy of governance institutions that shape development including a

Read Book Memorandum Of 2014 Business Paper Term 1 Grade 12

comprehensive analysis of how states are shaping business and human rights discourses locally to develop a critical understanding of identified issues by exploring the latest theories through comparative lenses

Confronting Corruption in Business focuses on the contextual issues that trigger corruption to give the reader a more thorough understanding of destructive leadership. It provides students with a unique, critical perspective on issues of leadership, corruption, and policy in different countries, industries, and companies. While there isn't a universally agreed upon definition of corruption in social sciences, it generally refers to efforts to secure wealth or power through misusing public power for private gain. This kind of destructive leadership is typically treated as an anomaly, but this book closes the gap in our understanding by highlighting the wider consequences of this behavior within business, and on an international level. Armed with this understanding, one also learns how to mitigate its causes and consequences. Edited by leading experts, the book includes contributions from scholars with international expertise on leadership, strategy, political science, finance, organizational change, and public policy. It is the first book to focus on corruption on the country level and within business, and students in international business, management, ethics, and leadership classes will find it a valuable read.

Straightforward, practical, and focused on realistic examples, *Business and Professional Writing: A Basic Guide* is an introduction to the fundamentals of

Good leaders walk a tightrope between doing and daring – often in the glare of the public spotlight. In *Leadership in the Headlines*, Andrew Hill, the award-winning Management Editor of the Financial Times, shares his insider insights into the who's and how's of effective leadership. Packed with practical lessons, this book divides the best of Andrew's wry and insightful columns into eight 'acts' of leadership, with new commentary enhancing each one. Whether you're new to Andrew Hill's columns or a loyal reader, you'll gain fresh perspectives on the tough job of leading and take away tips about how to refine your own management skills.

Gender Equality and Responsible Business places gender equality at the heart of the responsible business agenda with the aim of contributing to CSR practice as well as research. Discussion about gender issues in the field of corporate responsibility has focused on workplace issues and corporate boards, which are important areas of work. However, the great benefit of exploring gender issues through a responsible business lens is that this requires us to also examine the wider gender impacts of business in the marketplace – for example, with regard to suppliers, supply chains, and consumers, and with respect to the communities where business operates, and the wider ecological environment – indeed throughout corporate value chains. Through contributions from practitioners in business and civil society, as well as academia, this book broadens the agenda, opening the field to new voices, and facilitates dialogue among and between practitioners and researchers. Contributions within the edited collection elucidate current practice, bring new perspectives, and help us to expand the

field of responsible business with regard to gender equality, and beyond.

This book examines the legitimation of Private Military and Security Companies (PMSCs), focusing on the controversy between PMSCs and nongovernmental organizations (NGOs).

While existing studies disproportionately emphasizes the ability for companies and their clients to dominate and shape perceptions of the industry, this book offers an alternative explanation for the oft-cited normalization of PMSCs and the trend to privatize security by analyzing the changing relationship between PMSCs and NGOs. It uses the concept of 'norm entrepreneurship' to elucidate the legitimation game between these two dissimilar actors.

Starting from the 1990s, the book shows that the relationship between PMSCs and NGOs has undergone a transition by literally moving from 'the barricades to the boardrooms'. After years of fierce advocacy and PR campaigns against PMSCs, today both actors increasingly collaborate in multi-stakeholder initiatives, elevating the status of PMSCs

from a scorned actor to a trusted partner in the regulation of the industry. The work offers a comprehensive explanation of when and why this kind of collective norm entrepreneurship is likely to occur. This book will be of interest to students of PMSCs, critical security studies, global governance, international norms, and International Relations.

Defense Technological Innovation describes the emerging paradigm for innovation at the US Department of Defense, and the consequent impacts on its stakeholders. Leveraging a combination of prior research, archival data, first-person observations and interviews, the authors identify practices and themes characterizing the key trends in defense innovation, describe current organizational approaches and practices, and develop a theoretical framework that elucidates the competencies required to underwrite defense innovation objectives. The findings therein are relevant to any large, technology-driven organization contending with the implications of rapid change in the high-tech landscape.

High-Speed Rail and Sustainability

In the context of growing public interest in sustainability, Corporate Social Responsibility (CSR) has not brought about the expected improvement in terms of sustainable business. Self-regulation has been unable to provide appropriate answers for unsustainable business frameworks, despite empirical proof that sustainable behaviour is entirely in corporate enlightened self-interest. The lack of success of the soft law approach suggests that hard law regulation may be needed after all. This book discusses these options, alongside the issue of shareholder primacy and its externalities in corporate, social, and natural environment. To escape the "prisoner's dilemma" European corporations and their global counterparts have found themselves in, help is needed in the form of EU hard law to advocate sustainability through mandatory rules. This book argues that the necessity of these laws is based on the first-mover's advantage of such corporate law approach towards sustainable development. In the current EU law environment, where codification

of corporate law is sought for, forming and defining a general EU policy could not only help corporations embrace this self-enlightened behaviour but could also build the necessary "EU corporate citizenship" atmosphere. Considering the developments in the field of CSR as attempts to mitigate negative externalities resulting from inappropriate shareholder primacy use, the book is centred around a discussion of the shareholder primacy paradigm, its legal position and its (un)suitability for modern global business. Going beyond solely legal analysis, juxtaposing legal principles and argumentation with economic theoretic approaches and, more importantly, real-life examples, this book is accessible to both professionals and academics working within the fields of business, economics, corporate governance and corporate law.

It is often assumed that shareholders have rights, not duties. In recent years, however, this assumption has come under intense scrutiny in all aspects of company law and capital market law -legislation, the courts, soft law, and scholarship - and, in Europe especially, major changes are under way across a diverse spectrum all the way from revised contractual arrangements to mandatory statutory provisions. Such a shift has important implications for the fundamentals of European company law, and there is a need to examine shareholders' duties and to consider where this trend is taking shareholders and their stance in law. This focused collection of essays by twenty notable scholars addresses this complex subject from a highly informative and useful variety of

perspectives. Examining shareholders' duties along three axes - types of investee companies, types of shareholders, and types of business situations - the essays deal with such topics and issues as the following: - shareholders' duties as reflections of the interests they are intended to safeguard; - shareholders' duties to society; - shareholders' disclosure obligations; - duties of parent companies; - institutional investor's fiduciary duty; - how regulatory duties constrain value-reducing forms of opportunism; - the state's continuing duties in the transformation of state-owned companies; - significant shareholders' duties in transactions with the company; and - powerful shareholders' duty not to abuse right. Examining the implications of this shift in discourse - how shareholders' duties are coming to the fore under the impetus of legislation, legal doctrine, case law, and enforcement strategies - as well as its ideological underpinnings, this book offers a comprehensive and in-depth consideration of this rapidly developing field. It will prove of inestimable value not only to policymakers and academics, but also to investors and practitioners committed to creating conditions favourable to sustainable economic growth and responsible business behaviour.

The Drone Debate offers a thorough investigation of the where, why, how, and when of the U.S.'s use of UAVs. Beginning with a historical overview of the use of drones in warfare, it then addresses whether targeted killing operations are strategically wise, whether they are permissible under international law, and the related ethical issues. It also

looks at the political factors behind the use of drones, including domestic and global attitudes toward their use and potential issues of proliferation and escalation. Finally, the use of drones by other countries, such as Israel and China, is examined. Each chapter features a case study that highlights particular incidents and patterns of operation in specific regions, including Yemen, Somalia, Pakistan, and Libya and strike types (signature strikes, personality strikes, etc.).

As Matthew Pressman's timely history reveals, during the turbulent 1960s and 70s the core values that held the news industry together broke apart and the distinctive characteristics of contemporary American print journalism emerged. Simply reporting the facts was no longer enough as reporters recognized a need to interpret events for their readers.

Running a small business provides opportunity for greater success, increased growth, and potentially the chance to move to the global business arena, yet also much more risk. Small businesses not only have less employment, but also less annual revenue than a regular-sized business. With the growth of large corporations and chain businesses, it has become harder to maintain the survival of a small business. The COVID-19 pandemic has also brought more pressure onto the already unsteady survival of small businesses, due to forced closures, decreased agility, fewer technological innovations, and smaller customer bases. The Research Anthology on Small Business Strategies for Success and Survival offers current strategies for small businesses that can be utilized in order to maintain equal footing during challenging times. With the proper strategies available to small business owners, small businesses could not only survive, but also excel despite the environment that surrounds them. Covering topics including decision management, new supportive technologies, sustainable development, and micro-financing, this text is ideal for small business owners, entrepreneurs, startup companies, family-owned and operated businesses, restaurateurs, local retailers, managers, executives, academicians, researchers, and students.

Accurate valuation is an absolute prerequisite for any transfer of assets. It provides a buyer and seller with a good starting place to negotiate the terms of a sale. And in an estate setting, accurate valuation is vital when computing federal and state death tax liabilities. But arriving at valuations that are

acceptable to all parties can be quite difficult, particularly where the asset is, for example, an ownership share in a closely-held company. Valuation Handbook meets this need by providing a guide to valuation that is comprehensive, up-to-the-minute, and authoritative. Valuation Handbook features:

- Coverage of the full range of asset classes-- stocks, bonds, artwork, real estate, intellectual property, and closely-held businesses, to name just a few-- illustrated with in-depth examples that lead the reader step-by-step through their valuation.*
- Guidance on calculating a minority discount or control premium when selling an interest in a closely-held company.*
- Analysis of such issues as selecting expert appraisers and resolving valuation disputes.*
- Complete coverage of statutory and case law pertaining to all areas of valuation, including disputes with the IRS over estate tax valuation.*

• Copious practice tips that alert the reader to areas of complexity and suggest strategies for avoiding valuation audits. Written by Professor Joni Larson (assistant director of the Graduate Tax Program at Thomas M. Cooley Law School in Auburn Hills, Michigan), formerly with the Office of Chief Counsel at the Internal Revenue Service, Valuation Handbook is an authoritative guide to this complex area.

Entrepreneurship is very important for both entrepreneurs and economic development. It helps boost innovation and competitiveness in every country and facilitates the creation of new jobs and new opportunities, especially for family businesses and small and medium enterprises (SMEs). Both entrepreneurship and innovation constitute a subject that is both topical and timeless, since institutions and the various institutional processes have always affected a country's sustainability. Entrepreneurial Development and Innovation in Family Businesses and SMEs is an essential scholarly publication that contributes to the understanding, improving and strengthening of entrepreneurial development, and innovation's role in family businesses and SMEs by providing both theoretical and applied knowledge in order to find how and why entrepreneurship and innovation can produce inefficient and

dysfunctional outcomes. Featuring a wide range of topics such as women entrepreneurship, internationalization, and organizational learning, this book is ideal for researchers, policymakers, entrepreneurs, executives, managers, academicians, and students.

Building the New Cuban Economy

Deepening Neoliberalism, Austerity, and Crisis

Building a Dynamic Pacific Economy

An expert guide to Cuba's economic opening to the outside world. Ninety miles across the Straits of Florida, an exciting new revolution is afoot. This time, instead of guerillas marching down the streets of Havana, it is a global economy that will upend Cuba. Now opening to the world, what new shape will this nascent economy likely to take? *Open for Business: The New Cuban Economy*, Richard E. Feinberg's new book, examines the Cuban economy as it makes its early steps into developing a dynamic market economy. He examines key issues like the role foreign investors will play, how Cubans will forge a path to entrepreneurship, and the roadmaps suggested by other emerging economies. As Cuba's economy awakens from the post-Castro dream, it will do so with a flavor uniquely Cuban. Feinberg's book—enriched by interviews and in-depth field research conducted over the last five years—speaks both to Cuba's legacy and to its new horizons on the world stage. Over the last ten years mobile payment systems have revolutionised banking in some countries in Africa. In Kenya the introduction of M-Pesa, a new financial services model, has transformed

Read Book Memorandum Of 2014 Business Paper Term 1 Grade 12

banking and financial services industry. Giving the unbanked majority access to the financial market it has attracted over 18 million subscribers which is remarkable given that fewer than 10 million people in Kenya have bank accounts. This book addresses the legal and regulatory issues arising out of the introduction of M-Pesa in Kenya and its drive towards financial inclusion. It considers the interaction between regulation and technological innovation with a particular focus on the regulatory tools, institutional arrangements and government decisional processes through a detailed examination as a whole of its regulatory capacity. This is done with a view to understanding the regulatory capacity of Kenya in addressing the vulnerabilities presented by technological innovation in the financial industry for consumers after financial inclusion. It also examines the way that mobile payments have been regulated by criticising the piecemeal approach that the Central Bank of Kenya has taken in addressing the legal and regulatory issues presented by mobile payments. The book argues there are significant gaps in the regulatory regime of mobile banking in Kenya.

This book explores the relations between the EU and the BRICS in the areas of politics, economic development, trade and security. The contributions cover topics such as the position of the EU and BRICS in the global order and the EU as a "normative power," as well as the evolution, characteristics and institutionalization of BRICS and the roles of its member countries Brazil, India, China, South Africa. The book will appeal to researchers and scholars interested in the relations between BRICS and the resulting challenges and opportunities for the European Union and Global Governance.

International economic law, with its traditional focus on large multinational enterprises, is only slowly waking up to the new reality of small and medium-sized enterprises (SMEs), entering the global marketplace. In the wake of the digital revolution, smaller companies now play an impor-

Read Book Memorandum Of 2014 Business Paper Term 1 Grade 12

role in the global economic landscape. In 2015 the UN expressly called for SMEs to have greater access to international trade and investment, and it is increasingly recognized that the integration of SMEs provides one of the keys to creating a more sustainable and inclusive global economy. As SMEs increasingly permeate transnational supply chains, so interactions between these companies and international economic law and policy proliferate. Small and Medium-sized Enterprises in International Economic Law offers the first comprehensive analysis of the interaction between international trade and international economic law. This book presents a broad international perspective, gathering together contributions by leading experts from academia, legal practice, and international organizations. It opens up a field of enquiry into this so far unexplored dynamic and provides a touchstone for future debate. The analysis covers a broad spectrum of international trade and investment law focusing on issues of particular interest to SMEs, such as trade in services, government procurement, and trade facilitation. Diverse perspectives illuminate regional developments (in particular within the EU) and the implications of mega-regional free trade agreements. The essays also examine questions of legitimacy of global economic governance; in particular, concerns surrounding the threat posed to the interests of domestic SMEs by the liberalization of international trade and investment. These essays constitute essential reading for practitioners and academics seeking to navigate a previously neglected trend in international economic law.

A Premier on Corporate Governance: Turkey takes an in-depth and comprehensive assessment of corporate governance in Turkey at a cross section in time when the country is going through major multidimensional transformations. Structural characteristics of its economy and the historical antecedents of corporate governance are provided to the readers as a background in the first part of the book. External and internal mechanisms of corporate governance are built on this background. Legal system of the country, its company laws, regulatory authorities and the state of the market for corporate control as well as the socio-cultural norms, ways of doing business, and the Turkish code of good governance are examined as the external mechanisms shaping the corporate governance practices of companies in the context. Internal control mechanisms analyzed in this book include the characteristics of the board of directors, ownership structure, and management teams of Turkish companies. In conclusion, the authors discuss current and future corporate governance challenges in the Turkish business context.

Our organizations are flooded with empty talk. We are constantly "going forward" to lands of "deliverables", stopping off on the "journey" to "drill down" into "best practice". Being an expert at using management speak has become more important in corporate

life than delivering long lasting results. The upshot is that meaningless corporate jargon is killing our organizations. In this book, management scholar the author argues we need to call this empty talk what it is: bullshit. The book looks at how organizations have become vast machines for manufacturing, distributing and consuming bullshit. It follows how the meaningless language of management has spread through schools, NGOs, politics and the media. Business Bullshit shows you how to spot business bullshit, considers why it is so popular, and outlines the impact it has on organizations and the people who work there. It also outlines what we can do to minimise bullshit at work. The author makes a case for why organizations need to avoid empty talk and reconnect with core activities.

Chapter 7 WILL REVAMPED FINANCIAL REGULATIONS WORK? -- Upgrading the Basel Rules -- Moving Toward a Euro Area Banking Union -- Taming the US Shadow Banks -- Charting the Post-Crisis Changes in the Financial System -- The Road Ahead -- Chapter 8 MAKING MACROECONOMICS MORE RELEVANT -- The Way We Were -- Expanding the Focus of Macroeconomics -- Strengthening Domestic Policy Cooperation -- A More Inclusive Approach to Macroeconomic Theory -- Toward a More Encompassing View of Macroeconomics -- Chapter 9 WHITHER EMU? -- The Institutional Response to the Euro Area Crisis -- What Makes a Good Currency Union? -- How Fast Is EMU Integrating? -- The Future of EMU -- FINAL THOUGHTS -- NOTES -- REFERENCES -- INDEX
