How do otherwise considerate human beings do cruel things and still live in peace with themselves? Drawing on his agentic theory, Dr. Bandura provides a definitive exposition of the psychosocial mechanism by which people selectively disengage their moral self-sanctions from their harmful conduct. They do so by sanctifying their harmful behavior as serving worthy causes; they absolve themselves of blame for the harm they cause by displacement and diffusion of responsibility; they minimize or deny the harmful effects of their actions; and they dehumanize those they maltreat and blame them for bringing the suffering on themselves. Dr. Bandura’s theory of moral disengagement is uniquely broad in scope. Theories of morality focus almost exclusively at the individual level. He insightfully extends the disengagement of morality to the social-system level through which wide-spread inhumanities are perpetrated. In so doing, he offers enlightening new perspectives on some of the most provocative issues of our time, addressing: Moral disengagement in all aspects of the death penalty—from public policy debates, to jury decisions, to the processes of execution The social and moral justifications of major industries—including gun manufacturers, the entertainment industry, tobacco companies, and the world of “too big to fail” finance Moral disengagement in terrorism, and how terrorists rationalize the use of violence as a means of social change Climate change denial, and the strenuous efforts by some to dispute the overwhelming scientific consensus affirming the impact of human behavior on the environment “Al Bandura is the most cited individual in the history of psychology for the depth, breadth and originality of his ideas and writings. Now with his ground-breaking new contribution, Moral Disengagement, his reach extends not only to teachers and students but also to the general public --making them aware of everyday evils in many spheres of daily life that must be counteracted by mindful moral engagement.” ----Phil Zimbardo, Ph.D. Author, The Lucifer Effect; President, The Heroic Imagination Project “The authoritative statement by the world’s most-cited living psychologist, laying out his influential theory. Plunge into these fascinating historical and modern case studies of moral disengagement—morality tales for all time, illuminated by the psychology of how people do harm to themselves and others.” -- Susan T. Fiske, Psychology and Public Affairs, Princeton University “If you have wondered why good people do bad things, and even terrible and horrible things, then this is the only book you ever will have to read.” ----Robert J. Sternberg, Professor of Human Development, Cornell University “Dr. Albert Bandura is one of the great behavioral scientists of our time. His superb contributions include a deep analysis of human morality, its fundamental importance and the complexity of its development.” ----David A. Hamburg, MD, Visiting Scholar, American Association for the Advancement of Science; DeWitt Wallace Distinguished Scholar, Weill Cornell Medical College; President Emeritus, Carnegie Corporation of New York

"Alif had never set foot outside of West Sumatra. He passed his childhood days searching for fallen durian fruit in the jungle, playing soccer on rice paddies, and swimming in the blue waters of Lake Maninjau. His mother wants him to attend an Islamic boarding school, a pesantren, while he dreams of public high school. Haltheartedly, he follows his mother’s wishes. He finds himself on a grueling three-day bus ride from Sumatra to Madani Pesantren (MP) in a remote village on Java. On his first day at MP, Alif is captivated by the powerful phrase man jadda wajada. He who gives his all will surely succeed. United by punishment, he quickly becomes friends with five boys from across the archipelago, and together they become known as the Fellowship of the Manara. Beneath the mosque’s minaret, the boys gaze at the clouds on the horizon, seeing in them their individual dreams of far-away lands, like America and Europe. Where would these dreams take them? They didn’t know. What they did know was: never underestimate dreams, no matter how high they may be. God truly is The Listener. The Land of Five Towers is the first book in a trilogy written by A. Fuadi—a former TEMPO & VOA reporter, photography buff, and a social entrepreneur. He went to George Washington University and Royal Holloway, University of London for his masters. A portion of the royalties from the trilogy are intended to build Komunitas Menara, a volunteer-based social organization which aims to provide free schools, libraries, clinics and soup kitchens for the less fortunate. Ethno-religious violence in Indonesia illustrates in detail how and why previously peaceful religious communities can descend into violent conflict. From 1999 until 2000, the conflict in North Maluku, Indonesia, saw the most intense communal violence of Indonesia’s period of democratization. For almost a year, militias waged a brutal religious war which claimed the lives of almost four thousand lives. The conflict culminated in ethnic cleansing along lines of religious identity, with approximately three hundred thousand people fleeing their homes. Based on detailed research, this book provides an in depth picture of all aspects of this devastating and brutal conflict. It also provides numerous examples of how different conflict theories can be applied in the analysis of real situations of tensions and violence, illustrating the mutually reinforcing nature of mass level sentiment and elite agency, and the rational and emotive influences on those involved. This book will be of interest to researchers in Asian Studies, conflict resolution and religious violence.

What kinds of childbearing practices foster the development of helping, sharing, and other prosocial behaviours? What roles do biology and culture play in the development of prosocial behaviour? In this book, Nancy Eisenberg and Paul Mussen review and summarize scholarly research that has been devoted to the development of prosocial behaviour in children, and examine the variety of influence of media, parents, peers, biology, culture, personal characteristics, as well as situational determinants. The authors argue that prosocial behaviour can be learned and is modifiable, and they suggest ways that parents, teachers, and other can enhance prosocial development. In addition, the authors attempt to communicate the advances in the study of prosocial development that have taken place or addressed adequately by researchers, and suggests areas for future work.

Freud’s early lectures on psychoanalysis treat such topics as dreams, occultism, anxiety, femininity, and instinct.

Why do people act the way they do? How do their desires and fears become known to us? When are our opinions of others correct, and when are they likely to be mistaken? These are questions which attribution theory tries to answer. Originally published in 1975, this title provides an informal introduction to the field of attribution, with the theoretical principles and issues illustrated in everyday life. The inference process are examined. The intellectual debt owed to social psychology by the attribution theory is acknowledged, and an exploration of the interpersonal and social consequences of attribution is included.

The 14th century Javanese epic poem, Sutasoma, relates the life of a prince, born an incarnation of the Jina-Buddha Wairocana. Kate O ’ Brien ’ s new translation delivers to the reader a highly approachable and lively rendition of this Buddhist epic, comparable in both complexity and scale to that of the Ramayana, yet significantly less known or understood.

An Introduction to Attribution Processes

This edition was conceived and compiled to meet the need for a comprehensive book for practitioners, academics, and students on the research of emotions in organizational behavior. The book is the first of its kind to incorporate organizational behavior and bounded emotionality. The editors’ primary aim is to communicate the research presented at the bi-annual International Conference on Emotions and Organizational Life to a wider audience. This edition looks at the range of research on emotions within an organizational behavior framework; organized in terms of the individual, interpersonal, and organizational levels. Particular emphasis has been placed on obtaining the leading research in the international sphere. This book is intended to be useful to the student of organizational behavior, as well as to the managers of organizations.

Organizational Citizenship Behavior: Its Nature, Antecedents, and Consequences examines the vast amount of work that has been done on organizational citizenship behavior (OCB) in recent years as it has increasingly evoked interest among researchers in organizational psychology. No doubt some of this interest can be attributed to the long-held intuitive sense that job satisfaction matters. Authors Dennis W. Organ, Philip M.

Podsakoff, and Scott B. MacKenzie offer conceptual insight as they build upon the various works that have been done on the subject and seek to update the record about OCB.

Experience and Education is the best concise statement on education ever published by John Dewey, the man acknowledged to be the pre-eminent educational theorist of the twentieth century. Written more than two decades after Democracy and Education (Dewey’s most comprehensive statement of his position in educational philosophy), this book demonstrates how Dewey reformulated his ideas as a result of his intervening experience with the progressive schools and in the light of the criticisms his theories had received. Analyzing both “traditional” and “progressive” education, Dr. Dewey here insists that neither the old nor the new education is adequate and that each is misguided because neither of them applies the principles of a carefully developed philosophy of experience. Many pages of this volume illustrate Dr. Dewey’s ideas for a philosophy of experience and its relation to education. He particularly urges that all teachers and educators looking for a new movement in education should think in terms of the deeper and larger issues of education rather than in terms of some divisive “ism” about education, even such an “ism” as “progressivism.” His philosophy, here expressed in its most essential, most readable form, predicates an American educational system that respects all sources of experience, on that offers a true learning situation that is both historical and social, both orderly and dynamic.

Kode etik adalah norma-norma yang harus diindahkan oleh setiap profesi didalam hidupnya di masyarakat. Kode etik juga diartikan sebagai suatu ciri profesi yang bersumber dari nilai-nilai internal dan eksternal suatu disiplin ilmu dan merupakan pengetahuan komprehensif suatu profesiyang memberikan tuntunan bagi anggota dalam melaksanakan pengabdian profesinya. Hukum berhubungan erat dengan moral. Hukum membutuhkan moral. Hukum tidak mempunyai arti, kalau tidak dijiwai oleh moralitas. Sebaliknya moral juga berhubungan dengan hukum. Moral hanya sebatas hal yang abstrak saja tanpa adanya hukum. Contohnya mengambil barang yang bukan milik kita atau dengan kata lain mencuri adalah moral yang tidak baik, supaya prinsip etis ini berakar di masyarakat maka harus diatur dengan hukum.
