"As enjoyable as a day at the beach." That's how USA TODAY summed up this hilarious and big-hearted romp in the Florida sunshine. When Murray Zemelman, a.k.a. The Bra King, pops another Prozac and heads to the Keys, he has nothing much in mind beyond a quixotic hope of winning back his first wife, Franny, whom he dumped years before. But when he forms an unlikely friendship with Tommy Tarpon, the last remaining member of an obscure Indian tribe, another plan also starts shaping up in his fevered brain. Why not open up Key West's first casino? Why not? Well, how about because the Mafia, in league with some of the nastiest politicians you will ever meet, is determined to kill anyone who tries? Somehow, Murray, Tommy, and Franny didn't think of that until they were in way too deep. Laugh along as they improvise a manic and ever more desperate campaign to keep their casino dreams--and themselves--alive.

*Dry Heat is the debut novel by indie author Steven Eggleton. A dirty, angry, and often painfully funny read, Dry Heat explores the angst and confusion people in their early twenties frequently feel. Written in Eggleton's skeptical, sardonic, and bluntly frank narrative voice, the book chronicles a little over a year in the life of Vincente Vasquez, a disillusioned grocery-store clerk living in Tucson, Arizona. Chiefly concerned with escaping the drudgery of work, social equality, and the pursuit of sex; Dry Heat is a visceral and raw novel that's sure to leave an impression.*

*Best-selling LDS author Joni Hilton brings us another heart-warming novel, this time about Jana and Ethan Waterson, their family, and the spookiest house in town. Ethan is actually more terrified of his calling as bishop than of the "Witch House." He impulsively takes on the elderly residents and their dark mansion as a ward project. Jana holds guilt in her heart for an earlier decision, and they both have their hands full with three challenging children. There's life-and-death drama, spiritual anguish, arcs of growth, and plenty of humor as well, in an inspiring story unlike any you've read before.*

*Presently, marketing has undergone serious change. Marketers have faced increasing demand to provide quantitative data representative of their work, particularly focusing on sales growth in correlation with a narrow target audience. As marketers strive to cultivate new customers directly, they have turned to a growing area of interest: lead generation - a marketing activity aimed at acquiring direct contacts of prospective customers that have demonstrated some interest in the seller's goods and services. This book has a purely practical purpose, serving as an introductory resource to principles and methods that will enable marketing professionals to raise the number of potential customers and multiply the number of sales typically received. The book describes: - lead generation theory, its basic concepts, and methods of evaluating a return on marketing investments; - customer detection techniques (cold calls, pay-per-click, mailings, events, etc.); - peculiarities and challenges of lead generation campaigns and methods to overcome obstacles; - real stories about the way companies do lead generation and calculate its results. Outstanding Features of the Book - 14 real life case studies. - New trends of lead generation: cadence, market places, content management. - Up-to-date statistics for 2015 and plans for 2016. - Based on multi-industry experience (IT, automotive, education and even public organizations). - The style of the book is simple, charismatic and with humor (contains caricatures, jokes, wise quotes of great businessmen). - Applicable to both B2B and B2C. - The author explains all the lead generation concepts but also gives reasons why they should not be treated rigorously, as every company has its own business features and, thus, ROI and lead criteria. - A special section is dedicated to the challenge of lead generation outsourcing. - As lead generation is based on constant testing and statistics, the author also speaks about software tools helping to run your campaigns and calculate ROI efficiently. The book presents the results of a global benchmark report: "Lead Generation: Strategies and tactics for 2016". This survey covered 259 respondents from information and telecommunication technologies, consulting, banking, wholesale, insurance, auto-dealers, etc.*

As a diesel, liberty, and self-reliance enthusiast, Mark A. Billy wanted the family and load hauling capabilities of a full sized truck without the horrible fuel economy or the excessive price. As an engineer, he understood the efficiency and torque that turbodiesel engines provide. He knew that his goals were achievable if the right decisions were made. So, he decided to build a practical hauler for his family that wouldn't break the bank. He started with an unusual host for an efficiency project: a large, heavy, brick-shaped 1999 Suburban. He integrated a 3.9 liter Isuzu turbodiesel engine and a five-speed manual transmission into this vehicle, creating a cavernous family conveyance that cruises at highway speeds while achieving 26 mpg. The Suburban retains functional four wheel drive, cruise control, and air conditioning. Because a mechanically-injected engine and a manual transmission were used, the drivetrain of the vehicle is EMP-proof. With a 40 gallon fuel tank, the vehicle can achieve a range of over 1000 miles without refueling. This book describes the author's decision-making process as he chose, modified, and installed the components in his conversion process. He shares a number of lessons he learned the hard way, in the hopes that sharing his experience will make it easier for others to pursue similar projects.

\* Outboard motor repair for the average guy \* Fix up an old outboard and SAVE \$1000 or more compared to buying a new motor! With a little know-how and a few common tools, you can fix an old motor—bring it back from the dead. Sometimes all it takes is a squirt of WD-40 into the cylinder and a new spark plug. Or a new set of points and condensers—which do not require expert knowledge or black magic to install. Maybe the carburetor needs cleaning and adjusting. You can do it! Max E. Wawrzyniak III is an outboard motor guru. He advises you to find an old motor at a yard sale for \$100 or so (and he tells you exactly which ones to look for), and fix it up—rather than spending \$1500 or more on a new motor. He is a big fan of “cheap power.” Get on the water with money left in your pocket. With a basic understanding of how these motors work, a little logical thinking, and a few hours’ work, you can go boating for a fraction of what everyone else has to pay. Also—for the boater who already owns an outboard motor of any age—this book demystifies these internal-combustion marvels that can bring such frustration if they malfunction. You’ll learn how they work, and the simple things you can do to keep them running forever. What Max teaches are not only money-saving skills, but can also be life-saving, as you will no longer be helpless in the face of engine trouble on the water. His clear instructions and over one hundred color photographs will make anyone into a capable outboard mechanic.
