

Mercy Dogs

Mercy hovered in the back of the cage at the shelter. She knew people were coming through the shelter looking for the perfect dog! Why put herself through more pain? Mercy had accepted the fact that no one was going to choose her long ago. All of the other dogs made fun of her homely face and wide-set-apart eyes. She didn't have any friends. The keeper of the shelter tried to encourage Mercy, telling her that one day just the right family would come and take her home. Aidan was born blind. Today was his eighth birthday. His father had promised him he could get a dog for his birthday. His father wanted a service dog, but Aidan wanted a dog to love. As Aidan came to the

end of the shelter, he was disappointed. He asked the owner, "Is this all the dogs you have?" "We have Mercy," he said unenthusiastically. "Bring her to me!" As soon as Mercy stood before Aidan, he knew she was the one. She was trembling and afraid. "Don't you see, Mom and Dad?" he said, smiling. "I can't see what Mercy looks like, and she doesn't care that I'm blind." Follow Mercy and Aidan on their great adventure, proving once again, love truly is blind.

Years back, Melissa Holbrook Pierson brought home a border collie named Mercy, without a clue of how to get her to behave. Stunned after hiring a trainer whose immediate rapport with Mercy seemed magical, Pierson began delving into the techniques of positive reinforcement. She made her way to B. F. Skinner, the behavioral psychologist who started it all,

the man who could train a pigeon to dance in minutes and whose research on how behavior is acquired has ramifications for military dolphin trainers, athletes, dancers, and, as he originally conceived, society at large. To learn more, Pierson met with a host of fascinating animal behaviorists, going behind the scenes to witness the relationships between trainers and animals at the National Zoo in Washington, DC, and to the in-depth seminars at a Clicker Expo where all the dogs but hers seemed to be learning new tricks. The often startling

Pierson draws surprising connections in her exploration of how kindness works to motivate all animals, including the human one.

Only 150 years ago, most animals in America were subject to horrific treatment. They needed a champion to protect them from abject cruelty, and that person was Henry Bergh. After witnessing the beating

He became an enforcer of animal rights and founded the ASPCA, as well as created many animal cruelty laws. He even expanded his advocacy to children. Military working dogs gained widespread attention after the highly trained canine Cairo participated in the SEAL Team Six mission that led to Osama bin Laden's death. Before that, few civilians realized that dogs served in combat, let alone that they could parachute from thirty-thousand feet up. And as astounding as that talent is, it's only one of the many things our four-legged soldiers can do. Dogs have had a place in the U.S.military from as early as the nineteenth century, but their importance and our treatment of them has evolved since then. In the aftermath of 9/11, their numbers have

increased exponentially. The Dogs of War surveys the amazing range of jobs that military working dogs now perform, such as explosives detection, patrol, and hunting for enemy combatants. Lisa Rogak discusses the dogs' training, their equipment, and sets the record straight on those rumors of titanium teeth. In this book you'll find heart-warming stories of the deep bond that dogs and their handlers share, including missions both heroic and tragic that show the courage and devotion that human and canine soldiers have displayed on the battlefield. Rogask also writes about the physical and mental dangers

There are two types of human being - "wolves" (aggressive, assertive dominants who are

determined to get what they want) and “dogs” (timid, domesticated, submissives, continually at the mercy of the wolves). Capitalism is a wolf ideology. Christianity, Islam and Judaism are dog religions - intent on forcing you onto your knees and making you obey endless commandments. The capitalist wolves can prey on the Christian dogs who simply “turn the other cheek.” Democracy is another perfect vehicle for wolves. The people - the dogs - are given the illusion that they are in control, yet all democracies are just oligarchies and plutocracies. The wolves decide the political agenda and the

In a lyrical love letter to guide dogs everywhere, a blind poet shares his delightful story of how a guide dog changed his life and helped him discover a newfound appreciation for travel and independence. his blindness in order to "pass" as sighted. Stephen attended public school, rode a bike, and read books pressed right up against his nose. As an adult, he coped with his limited vision by becoming a professor in a small college town, memorizing routes for all of the places he needed to be. Then, at the age of thirty-eight, he was laid off. With no other job opportunities in his vicinity, he would have to travel to find work. This is how he found himself at Guiding Eyes, paired with a Labrador named Corky. In this vivid and lyrical memoir, Stephen Kuusisto recounts how an incredible partnership with a guide dog changed his life and the heart-stopping, wondrous adventure that began for him in midlife. Profound and deeply moving, this is a spiritual journey, the story of discovering that life with a guide dog is both a method and a state of mind.

A primary mission of universities is promoting student success and well-being. Many college and university personnel have implemented initiatives that offer students the documented

benefits of positive human-animal interaction (HAI). Accumulating evidence suggests that assistance dogs, therapy dogs, and shelter dogs can support student wellness and learning. The best programs balance the welfare of humans and canines while assessing students' needs and complying with all laws and regulations. Contributors to this edited volume have drawn upon research across many disciplines as well as their extensive practical

experiences to produce a timely and valuable resource—for administrators and students. Whether readers are just getting started or striving to improve well-established programs, The Canine-Campus Connection provides authoritative, evidence-based guidance on bringing college students and canines together in reciprocally beneficial ways. Part one examines the interactions between postsecondary students and canines by reviewing the

literature on the human-canine bond. It establishes what necessarily must be the top priority in canine-assisted activities and therapy: the health and safety of both. Part two highlights four major categories of dogs that students are likely to interact with on and off campus: service dogs, emotional support animals (ESAs), therapy dogs, and homeless dogs. Part three emphasizes ways in which dogs can influence student learning during

classes and across aspects of their professional development. Part four considers future directions. Authors take the stance that enriching and enlarging interactions between college students and canines will require university personnel who plan and evaluate events, projects, and programs. The book concludes with the recommendation that colleges and universities move toward more dog-friendly campus cultures.

Dog Is My Copilot tells the story of Pilots N Paws, a high-flying animal-rescue operation founded "accidentally" in 2008 when a private pilot offered to fly a mission of mercy to save an abused dog for a friend. Since that time, Pilots N Paws has grown to include thousands of pilots who have transported tens of thousands of "death-row dogs" (and a fair amount of cats and other animals), sometimes more than 1,000 miles away to new homes or no-kill shelters, where they have a much higher chance of adoption. The true heart of Dog Is My Copilot are the 24 real-life rescue stories collected from pilots and their animal-rescue counterparts on the

These dogs are the lucky ones, and most of the pilots will tell you

These abilities may seem magical or mysterious, but author Cat Warren shows the science, the rigorous training, and the skilled handling that underlie these creatures’ amazing abilities. Cat Warren is a university professor and journalist who had tried everything she could think of to harness her dog Solo’s boundless energy and enthusiasm...until a behavior coach suggested she try training him to be a “working dog.” What started out as a

Warren interviews cognitive psychologists, historians, medical examiners, epidemiologists, and forensic anthropologists, as well as the breeders, trainers, and handlers who work with and rely on these intelligent and adaptable animals daily. Along the way, Warren discovers story after story that prove the capabilities—as well as the very real limits—of working dogs and their human partners. Clear-eyed and unsentimental, Warren explains why our partnership with working dogs is woven into the fabric of society, and why we keep finding new uses for the wonderful noses of our four-legged friends.
