Microsoft FrontPage 2002 Unleashed

In today's highly connected world, almost everybody has a web site, from local sewing circles to the world's largest corporations. If you're ready for one of your own, Microsoft's FrontPage 2003 has everything you need to create Web pages. It's true. Your geek friends may howl in contempt if you use FrontPage, but that's because the program has a reputation for spitting out cookie-cutter Web pages with messy, overloaded HTML code that takes forever to load. Not any more. After listening to complaints, Microsoft has given FrontPage 2003 some pretty advanced features, including an HTML cleanup tool that helps alleviate bloated code, and new support for Macromedia Flash and XML. Now, savvy Web veterans can control as much of the process as they want, and even collaborate on a site with developers who use Dreamweaver, GoLive or other Web authoring tools. Yet, unlike those other tools, FrontPage 2003 still has automated

features for beginners who don't know where to start. There's still one flaw, though. Microsoft's idea of a user manual is a flimsy pamphlet. But that's easily solved. FrontPage 2003: The Missing Manual offers you everything from the basics to meaty sections on advanced tasks. Our book puts the program's features in context, with clear and thorough chapters that provide valuable shortcuts, workarounds, and just plain common sense, no matter where you weigh in on the technical scale. With it, you can learn to build simple Web pages, or sophisticated ones with tables and Cascading Style Sheets, and find out how to manage and publish a Web site. You'll also learn to create forms, work with databases, and integrate FrontPage with Microsoft Office. If you haven't worked with Web pages before, each chapter provides "Up to Speed" sidebars with useful background information. If you do have experience, the "Power Users' Clinic" sidebars offer advanced tips and insights. You won't find tips like those in the pamphlet, or even in the Help file. FrontPage: The Missing Manual gives you the complete lowdown on the program above and beyond any book on the market.

FrontPage 2002 - Level 2
This book is designed to help students on an 'A' Level, Advanced VCE or similar course to design and implement a Web site using Microsoft FrontPage 2002. FrontPage is a suitable software package for the project component in 'AS' level and Advanced VCE courses. Parts 1 to 2 of the book take the reader through the steps in creating and publishing a Web site both with and without the use of a wizard. Part 3 gives advice on all stages of project work from the definition of a suitable problem through to documentation. The book was written primarily for 'AS' and 'A' Level Information and Communication Technology students and contains in Appendix B the AQA mark scheme for 'AS' Module 3: Coursework. It will also be suitable for

students on many other courses at different levels since the mark scheme, with minor variations, is one which applies to projects in many ICT courses. For a second year project in an 'A' Level course, data collected from a Web site can be exported and used in an Access database. This aspect could be developed further to fulfil the requirements of, for example, Module 6 of the AQA ICT specification.A sample project is included to show students how a complete project report may be laid out.

Every 3rd issue is a quarterly cumulation.

Annotation A reference designed to quickly explain in ten minutes or less the most common beginning and intermediate level tasks a Visio user would need to create better looking and more communicative diagrams to augment their Word docs and PowerPoint presentations. This book offers

straightforward, practical answers for fast results. Each 10-minute lesson allows the user to quickly learn the fundamentals necessary to accomplish their goals. Covers the most commonly referenced topics. Because most people don't have the luxury of sitting down uninterrupted for hours at a time to learn Visio, this 10 Minute Guide focuses on the most often used features, covering them in lessons designed to take 10 minutes or less to complete. Without jargon, this guide teaches the user how to use Visio by providing straightforward, easy-to-follow explanations and lists of numbered steps. Eric Infanti is the Director of Training and Performance at GreenTree International. He has trained, put on seminars and developed curriculum at institutions such as Sacred Heart University and Manchester, Tunis, Capital, and Middlesex Community-Technical colleges. Eric has been a user of Visio since its launch back in the early 90's in his IT realm with Dime Financial Corporation as well as usage of it during his Marine Corps tour. Since then, Eric has supported, coached, and trained hundreds of people across Connecticut, and is now training nationally with Microsoft?. Soon Eric begins the infrastructure for delivering Visio courses online as well. Some of his current clients are The META Group, The Hartford Insurance Group, and ABB to name a few.
