The world economy is experiencing a very strong but uneven recovery, with many emerging market and developing economies facing obstacles to vaccination. The global outlook remains uncertain, with major risks around the path of the pandemic and the possibility of financial stress amid large debt loads. Policy makers face a difficult balancing act as they seek to nurture the recovery while safeguarding price stability and fiscal sustainability. A comprehensive set of policies will be required to promote a strong recovery that mitigates inequality and enhances environmental sustainability, ultimately putting economies on a path of green, resilient, and inclusive development. Prominent among the necessary policies are efforts to lower trade costs so that trade can once again become a robust engine of growth. This year marks the 30th anniversary of the Global Economic Prospects. The Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on emerging market and developing economies, on a semiannual basis (in January and June). Each edition includes analytical pieces on topical policy challenges faced by these economies.

The Ability Hacks is the story of two Microsoft hackathon teams, one in the summer of 2014 and one the following summer of 2015. The first would pioneer new software to revolutionize the mobility of tens of thousands of people who live with severe paralysis caused by ALS, Parkinson's, cerebral palsy and traumatic neurological injuries. The second team would pioneer software to help kids with dyslexia read and love learning for the first time in their lives. This is the story of two small groups of driven, focused and passionate software engineers, program managers, marketers and advocates. It's the story of realizing the transformative power of technology for people with disabilities, not just for traditional consumer and industrial markets. It's the story of doing something truly great -- improving outcomes for everyone, discovering a design ethos and blazing a new trail for accessibility. Read more:More than one billion people around the world live with a disability of some kind, and it's estimated two-thirds of us know someone with a disability. Almost everyone will be temporarily or permanently impaired at some point in life, and those who survive to old age will experience increasing difficulties in functioning, according to the World Health Organization. This book explores an optimistic belief that computer software and hardware can empower people with disabilities in a multitude of scenarios. As one engineer interviewed for The Ability Hacks said, "It's not about the technology. It's about the people."

One of the challenges of administering and supporting Microsoft® Outlook 2003 is that it stores settings in so many different places - in the Windows registry, as files in the user's profile folders, and in the information store itself. Configuring Microsoft® Outlook 2003 pulls together in one volume the information that administrators in organizations of all sizes need to understand, deploy, and manage settings for Microsoft Outlook 2003. It covers configuration issues for environments where Microsoft Exchange is the mail server and also for those using IMAP4 or POP3. The book gives special attention to security issues, including recommended configuration of Outlook's built-in security features and methods for locking down Outlook with Group Policy Objects and other techniques. Configure the new Cached Exchange mode and RPC over HTTP connections in Outlook 2003 Discover undocumented settings for Microsoft Exchange Server and use them to deploy or modify Outlook mail profiles Migrate both user data and settings to a new machine Use tools such as MFCMAPI and Outlook Spy to explore Outlook's data and settings Configure an archive .pst file in the new Unicode format that supports up to 20GB of data Use scripts to handle challenging configuration tasks such as granting Reviewer access to a Calendar folder, or adding a second Exchange mailbox to an Outlook profile
