The essence of France, its history, character, culture and beauty, captured in colorful words and pictures.

"A witty, engaging narrative style...[Robb's] approach is particularly engrossing." —New York Times Book Review A narrative of exploration—full of strange landscapes and even stranger inhabitants—that explains the enduring fascination of France. While Gustave Eiffel was changing the skyline of Paris, large parts of France were still terra incognita. Even in the age of railways and newspapers, France was a land of ancient tribal divisions, prehistoric communication networks, and pre-Christian beliefs. French itself was a minority language. Graham Robb describes that unknown world in arresting narrative detail. He recounts the epic journeys of mapmakers, scientists, soldiers, administrators, and intrepid tourists, of itinerant workers, pilgrims, and herdsmen with their millions of migratory domestic animals. We learn how France was explored, charted, and colonized, and how the imperial influence of Paris was gradually extended throughout a kingdom of isolated towns and villages. The Discovery of France explains how the modern nation came to be and how poorly understood that nation still is today. Above all, it shows how much of France—past and present—remains to be discovered. A New York Times Notable Book, Publishers Weekly Best Book, Slate Best Book, and Booklist Editor's Choice.

The Midi, between the Massif Central and the Mediterranean, is the region of France that is richest in archaeological treasures, and these are described in the OAG to South France. The earliest of these date back to the Palaeolithic period, some twenty thousand years ago, when our ancestorswere decorating caves and rock shelters with dramatic depictions of hunting and ritual. Later human cultural evolution in the region is represented by strongly defended hilltop settlements and by impressive funeral mounds and dolmens. Greek colonists arrived around 600 BC and set up towns along thecoast, trading with the local peoples, and these are the origins of the main towns of the present day, such as Marseilles, Nice, and Arles. The region was annexed by Rome in the 2nd century BC and the prosperous new province was endowed with many fine public buildings, such as the amphitheatres and theatres at Arles, Nîmes, and Orange, the network of roads, and massive towns walls, as at Carcassonne. In addition, there is plenty ofevidence of more mundane aspects of daily life, such as the water-mill at Barbagel, the potteries of La Graufesenque, and the houses of the town dwellers at Vaison-la-Romaine.
