Reinforcement

learning is a learning

paradigm concerned

with learning to

control a system so

as to maximize a

numerical

performance

Get Free Midterm Exam Solution

Introduction To

measure that

expresses a long-

term objective. What

distinguishes

reinforcement

learning from

supervised learning

is that only partial

feedback is given to

the learner about the

learner's predictions.

Further, the

Get Free Midterm Exam Solution

Introduction To Healthcare Management

predictions may have long term effects through influencing the future state of the controlled system. Thus, time plays a special role. The goal in reinforcement learning is to develop efficient
