Minecraft Fortezza Medievale

Taryn Clark thought she'd outgrown the need to find her birth mother. She thought that a successful career and a comfortable life in the city were enough to be happy. Did she really need to know about the woman who had given her away? Adopted at birth, her first few years were happy. It hadn't mattered that she didn't know her heritage; she had parents who loved her and wanted her. But divorce, and then death, ripped their tiny family apart, and at the tender age of six, she entered the foster care system. Over the next dozen years, she shuffled from home to home. Finding her roots seemed an impossible dream. But dreams are resilient. An unexpected discovery awakens old yearnings of belonging to a family, of being part of something bigger than herself. Finding the brief, ambiguous note from her birth mother is enough to unfurl the ribbons of hope still binding her heart. Her quest takes her to Lancaster County, Pennsylvania and the heart of the Plain community. Aided by her unique eye color, a healthy dose of luck, and the private investigator she hires, Taryn finds her birth family easily enough, but finding the truth is another matter. In all her musings, she never imagined a scenario where her mother might be Amish. She never imagined that the fabric of her life might be a patchwork of faith and fear, stitched together with a dark family secret. Taryn is determined to trace her roots, even if it means digging in the mud to do so. Now she's caught in the quicksand of a shocking discovery and the consequences of choices made, almost forty years ago. She'll risk everything to uncover the truth and to claim the family--and the roots--she so desperately craves.

Things have changed for Task Force X. As Peacemaker takes over as field leader, there will be no more avenging or defending for the government's top-secret task force of killers, thieves, and criminals. Amanda Waller-now back in control of the Squad-sends a new Squad into Arkham Asylum to "recruit" the deadly Court of Owls assassin Talon while she interviews another new candidate: Superboy.

An innovative examination of heritage politics in Japan, showing how castles have been used to re-invent and recapture competing versions of the pre-imperial past and project possibilities for Japan's future. Oleg Benesch and Ran Zwigenberg argue that Japan's modern transformations can be traced through its castles. They examine how castle preservation and reconstruction campaigns served as symbolic ways to assert particular views of the past and were crucial in the making of an idealized premodern history. Castles have been used to craft identities, to create and erase memories, and to symbolically join tradition and modernity. Until 1945, they served as physical and symbolic links between the modern military and the nation's premodern martial heritage. After 1945, castles were cleansed of military elements and transformed into public cultural spaces that celebrated both modernity and the pre-imperial past. What were once signs of military power have become symbols of Japan's idealized peaceful past.

Theo's domain has expanded and his partnership with Siluca has deepened, but will it be enough to keep their enemies at bay? Siluca's renegade political maneuvering results in brutal consequences as they are forced to defend their territory against ally and enemy alike. Siluca's ready to continue her master plan, but it may be much too late for diplomacy to have any effect. -- VIZ Media

The History of the Jews in Early Modern Italy

Leon Krier is one of the best-known—and most provocative—architects and urban theoreticians in the world. Until now, however, his ideas have circulated mostly among a professional audience of architects, city planners, and academics. In The Architecture of Community, Krier has reconsidered and expanded writing from his 1998 book Architecture: Choice or Fate. Here he refines and updates his thinking on the making of sustainable, humane, and attractive villages, towns, and cities. The book includes drawings, diagrams, and photographs of his built works, which have not been widely seen until now. With three new chapters, The Architecture of Community provides a contemporary road map for designing or completing today's fragmented communities. Illustrated throughout with Krier's original drawings, The Architecture of Community explains his theories on classical and vernacular urbanism and architecture, while providing practical design guidelines for creating livable towns. The book contains descriptions and images of the author's built and unbuilt projects, including the Krier House and Tower in Seaside, Florida, as well as the town of Poundbury in England. Commissioned by the Prince of Wales in 1988, Krier's design for Poundbury in Dorset has become a reference model for ecological planning and building that can meet contemporary needs.

This atlas presents normal and pathologic findings observed on CT angiography with 3D reconstruction in a diverse range of clinical applications, including the imaging of cerebral, carotid, thoracic, coronary, abdominal and peripheral vessels. The superb illustrations display the excellent anatomic detail obtained with CT angiography and depict the precise location of affected structures and lesion severity. Careful comparisons between normal imaging features and pathologic appearances will assist the reader in image interpretation and treatment planning and the described cases include some very rare pathologies. In addition, the technical principles of the modality are clearly explained and guidance provided on imaging protocols. This atlas will be of value both to those in training and to more experienced practitioners within not only radiology but also cardiovascular surgery, neurosurgery, cardiology and neurology.

This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, Angels and Demons in Art will delight readers with an interest in art or religious symbolism.

"Challenging traditional historiographical approaches, this book offers a new history of Italian Jews in the Early Modern age. The fortunes of the Jewish communities of Italy in their various aspects-demographic, social, economic, cultural, and religious-can only be understood if these communities are integrated into the picture of a broader European, or better still, global, system of Jewish communities and populations; and, secondly, that this history should be analyzed from within the dense web of relationships with the non-Jewish surroundings that enveloped the Italian communities. The book presents new approaches on such essential issues as ghettoization, antisemitism, the Inquisition, the history of conversion and Jewish-Christian relations. It sheds light on the autonomous culture of the Jews in Italy, focusing on case studies of intellectual and cultural life using a micro-historical perspective. First published in Italy in 2014 by one of the leading scholars on Italian Jewish history. This book will appeal to students and scholars alike studying and researching Jewish History, Early Modern Italy, Early Modern Jewish and Italian culture, and Early Modern society"--

A life of Matilda--empress, skilled military leader, and one of the greatest figures of the English Middle Ages Matilda was a daughter, wife, and mother. But she was also empress, heir to the English crown--the first woman ever to hold the position--and an able military general. This new biography explores Matilda's achievements as military and political leader, and sets her life and career in full context. Catherine Hanley provides fresh insight into Matilda's campaign to claim the title of queen, her approach to allied kingdoms and rival rulers, and her role in the succession crisis. Hanley highlights how Matilda fought for the throne, and argues that although she never sat on it herself her reward was to see her son become king. Extraordinarily, her line has continued through every single monarch of England or Britain from that time to the present day.

It is an acknowledged if not accepted fact that all European societies are being fundamentally transformed, and indeed perceptively unsettled, by increased migrations across nations and by the asserted presence of established minorities within their borders. The scale and speed at which these transformations have taken place have brought in their wake considerable social impacts and no small measure of fear and anxiety. Encounters wi
diversity are part and parcel of the social work task, and learning how to negotiate them should be a de facto aspect of the training and continuous professional development of social workers and other social professions. However, the moral and political dimensions of the role, scope and nature of the social work task in responding appropriately to these changed and changing realities are rather more contested. This volume addresses mar
dimensions of the response to issues of race and ethnicity in social work practice in Europe. It extends the debates on inter-cultural and race equality practice in social work through a stimulating and innovative collection of contributions. This book was originally published as a special issue of the European Journal of Social Work.

Transect Urbanism: Readings in Human Ecology is the definitive reference on the Rural-to-Urban Transect, a compilation of the most important essays, diagrams, and images on the subject. It provides historical, practical, and theoretical insights into one of the most effective urban planning methodologies developed in the 20th Century. The Transect is a unifying theory, serving as a framework for the various fields of urban design. The editors selected the most important previously published essays and commissioned preeminent academics and professionals to write on the use of the Transect in their areas of expertise, including retail, zoning, thoroughfare design, environmental sustainability, and philosophy. As diagrams and drawings are essential to the understanding and use of the Transect, this book also contains the most complete collection of Transect images ever published. Transect Urbanism will serve as a primary reference source for academics, students, and practitioners interested in creating great places. Andrés Duany is the author of numerous essays and articles and co-author of several books, including Suburban Nation: the Rise of Sprawl and the Decline of the American Dream, The Smart Growth Manual, Garden Cities: Agricultural Urbanism, and The New Civic Art. His work has been recognized with numerous awards, including the Richard H. Driehaus Prize, the Jefferson Medal, The Vincent Scully Prize and several honorary doctorates. He is a co-founder of DPZ CoDesign, which has been a leader in planning, urban design, and architecture for more than 30 years, as well as a co-founder of the Congress for the New Urbanism. The nonprofit Center for Applied Transect Studies supports interdisciplinary research, publication, tools, and training for the design, coding, building and documentation of resilient Transect-based communities. It has supported the publication of numerous essays, papers, and books, including The Architecture of Community, The Smart Growth Manual, the Sprawl Repair Manual, The Language of Towns and Cities, Visions of Seaside, and The New Pioneers.
