The goldfields have been a powerful influence on both Australian and Western Australian history. Gold has driven development in many parts of Australia. A great number of family lives have been shaped by migration to and from the fields. Reminiscences, and family and local histories have produced powerful and oft-repeated narratives. This book moves beyond the oft-told. It tells of Aboriginal history, of people who have 'always been

here, and we always will be here'. Women's and children's lives are explored as well as those of prospectors and miners, the settlement of 'Afghans' and the story of pastoralism.

This open access book aims to provide a comprehensive but practical overview of the knowledge required for the assessment and management of the older adult with or at risk of fragility fracture. It considers this from the perspectives of all of the settings in which this group of patients receive nursing care.

Globally, a fragility fracture is estimated to occur every 3 seconds. This amounts to 25 000 fractures per day or 9 million per year. The financial costs are reported to be: 32 billion EUR per year in Europe and 20 billion USD in the United States. As the population of China ages, the cost of hip fracture care there is likely to reach 1.25 billion USD by 2020 and 265 billion by 2050 (International Osteoporosis Foundation 2016).

Consequently, the need for nursing for patients with fragility fracture across the world is immense. Fragility fracture is one of the foremost challenges for health care providers, and the impact of each one of those expected 9 million hip fractures is significant pain, disability, reduced quality of life, loss of independence and decreased life expectancy. There is a need for coordinated, multi-disciplinary models of care for secondary

fracture prevention based on the increasing evidence that such models make a difference. There is also a need to promote and facilitate high quality, evidence-based effective care to those who suffer a fragility fracture with a focus on the best outcomes for recovery, rehabilitation and secondary prevention of further fracture. The care community has to understand better the experience of fragility fracture from the perspective of the patient so that direct improvements in care can be based on the perspectives of the users. This book supports these needs by providing a comprehensive approach to nursing practice in fragility fracture care.

The International Encyclopedia of Information and Library Science was published to widespread acclaim in 1996, and has become the major reference work in the field. This eagerly

awaited new edition has been fully revised and updated to take full account of the many and radical changes which have taken place since the Encyclopedia was originally conceived. With nearly 600 entries, written by a global team of over 150 contributors, the subject matter ranges from mobile library services provided by camel and donkey transport to search engines, portals and the World Wide Web. The new edition retains the successful structure of the first with an alphabetical organization providing the basic framework of a coherent collection of connected entries. Conceptual entries explore and explicate all the major issues, theories and activities in information and library science, such as the economics of information and information management. A wholly new entry on information systems, and enhanced entries on the

information professions and the information society, are key features of this new edition. Topical entries deal with more specific subjects, such as collections management and information services for ethnic minorities. New or completely revised entries include a group of entries on information law, and a collection of entries on the Internet and the World Wide Web.

By the time the Colorado Central Railroad extended its

tracks into Boulder County in 1873, much of the land along the foothills was already under cultivation. As rails were laid between Boulder City and Longmont to the northeast, they crossed land belonging to settlers who had first come to the region as prospectors with the Pikes Peak Gold Rush of 1858. At that time, the area was still the hunting and fishing grounds of Southern Arapaho Indians and their tribal leader, Chief Niwot, translated as "left hand" in the Arapaho language. Two ranchers, Porter Hinman and Ambrose Murray, whose land was traversed by the new railroad, platted the town of Niwot in 1875 as a shipping point for transporting local farm goods and livestock to distant markets. Thus the only authentic railroad town in Boulder County was founded.

A quirky club in small-town North Carolina holds the keys to health, happiness, friendship—and even solving a murder—all to be found within the pages of the right book... Strangers flock to Miracle Springs hoping the natural hot springs, five-star cuisine, and renowned spa can cure their ills. If none of that works, they often find their way to Miracle Books, where, over a fresh-baked “ comfort ” scone, they exchange their stories with owner

Nora Pennington in return for a carefully chosen book. That ' s Nora ' s special talent—prescribing the perfect novel to ease a person ' s deepest pain. So when a visiting businessman reaches out for guidance, Nora knows exactly how to help. But before he can keep their appointment, he ' s found dead on the train tracks. Stunned, Nora forms the Secret, Book, and Scone Society, a group of damaged souls yearning to earn redemption by helping others. To join, members must divulge their darkest secret—the terrible truth that brought

each of them to Miracle Springs in the first place. Now, determined to uncover the truth behind the businessman ' s demise, the women meet in Nora ' s cozy bookstore. And as they untangle a web of corruption, they also discover their own courage, purpose, and a sisterhood that will carry them through every challenge—proving it ' s never too late to turn the page and start over... “ Adams kicks off a new series featuring strong women, a touch of romance and mysticism, and both the cunning present-day mystery and the slowly revealed

secrets of the intriguing heroines ' pasts. " —Kirkus Reviews
