

## Mining Tsar The Life And Times Of Leslie Urquhart

The years of the late nineteenth and early twentieth centuries, aptly described by Mark Twain as the 'Gilded Age' witnessed an unprecedented level of technological change, material excess, untrammled pursuit of profit and imperial expansion. Within this dynamic and often ruthless environment many colorful characters strode across the world stage, among them the great mining tycoons, who constituted one of the major spearheads of global capitalistic expansion and colonial exploitation. This volume, which carries the epic story to the mid-twentieth century, provides a truly international perspective on the role of mining entrepreneurs, investors and engineers in shaping the economic and political map of the globe, in testing management techniques and in setting a vogue for extravagant displays of wealth among the world's rich.

This three volume set presents papers from the first collaborative global metallurgy conference focused exclusively on extractive topics, including business and economic issues. Contributions examine new developments in foundational extractive metallurgy topics and techniques, and present the latest research and insights on emerging technologies and issues that are shaping the global extractive metallurgy industry. The book is organized around the following main themes: hydrometallurgy, pyrometallurgy, sulfide flotation, and extractive metallurgy markets and economics.

White reassesses Anglo-American trade with Soviet Russia immediately following the Bolshevik Revolution to show that, unlike diplomatic relations, commercial ties were not severed by ideological differences. She argues that British and American trade with Russia resumed soon after the Bolsheviks' rise to power and that this period of trade had a significant effect on future commerce. The Tsar's Dwarf

History of Pretenders for the Crown, Civil War, and Foreign Invasion in Seventeenth-Century Russia

***In this international bestseller investigating the murder of the Russian Imperial Family, Helen Rappaport embarks on a quest to uncover the various plots and plans to save them, why they failed, and who was responsible. The murder of the Romanov family in July 1918 horrified the world, and its aftershocks still reverberate today. In Putin's autocratic Russia, the Revolution itself is considered a crime, and its anniversary was largely ignored. In stark contrast, the centenary of the massacre of the Imperial Family was commemorated in 2018 by a huge ceremony attended by the Patriarch of the Russian Orthodox Church. While the murders themselves have received major attention, what has never been investigated in detail are the various plots and plans behind the scenes to save the family—on the part of their royal relatives, other governments, and Russian monarchists loyal to the Tsar. Rappaport refutes the claim that the fault lies entirely with King George V, as has been the traditional claim for the last century. The responsibility for failing the Romanovs must be equally shared. The question of asylum for the Tsar and his family was an extremely complicated issue that presented enormous political, logistical and geographical challenges at a time when Europe was still at war. Like a modern day detective, Helen Rappaport draws on new and never-before-seen sources from archives in the US, Russia, Spain and the UK, creating a powerful account of near misses and close calls with a heartbreaking conclusion. With its up-to-the-minute research, The Race to Save the Romanovs is sure to replace outdated classics as the final word on the fate of the Romanovs.***

***A tale by the Francophonian Literature Prize-winning author of Le Front Chantilly finds female dwarf Soerine given as a gift to Tsar Peter the Great and taken against her will to St. Petersburg to become a court jester, an appointment that sparks her relationship with a fellow dwarf and the judgmental attentions of an ignorant priest. **African gold interests, the company invested widely during the following century. This included investments in the Western Australian gold sector from the 1920s and exploration and mining activities elsewhere in Australia and the Territory of New Guinea. In the 1960s, Consolidated Gold Fields Australia (CGFA) was formed. CGFA had ambitious plans and the financial backing from London to establish itself as one of the main diversified mining companies in Australia. Investments were held in the historic Mount Lyell Mining and Railway Company, in Renison, and it was one of the first groups to develop iron ore deposits in the Pilbara of Western Australia. It also acquired a major interest in mineral sands. While the London-based Consolidated Gold Fields ceased to exist in 1989, taken over and dismembered by renowned corporate raider Hanson Plc, its Australian subsidiary, renamed Renison Goldfields Consolidated (RGC), continued for another nine years as a diversified mining group before it suffered its own corporate demise, facilitated by Hanson. CGFA and RGC were important participants in Australia's post-World War II mining sector. This book is a history of a once great British mining-finance house and its investments in Australia. Consolidated Gold Fields had a rich and broad history in Australia; its ultimate fate did not demonstrate its potential as an Australian mining company.**

*The Prize recounts the panoramic history of oil -- and the struggle for wealth power that has always surrounded oil. This struggle has shaken the world economy, dictated the outcome of wars, and transformed the destiny of men and nations. The Prize is as much a history of the twentieth century as of the oil industry itself. The canvas of this history is enormous -- from the drilling of the first well in Pennsylvania through two great world wars to the Iraqi invasion of Kuwait and Operation Desert Storm. The cast extends from wildcatters and rogues to oil tycoons, and from Winston Churchill and Ibn Saud to George Bush and Saddam Hussein. The definitive work on the subject of oil and a major contribution to understanding our century, The Prize is a book of extraordinary breadth, riveting excitement -- and great importance.*

*The Eurasianist movement was launched in the 1920s by a group of young Russian émigrés who had recently emerged from years of fighting and destruction. Drawing on the cultural fermentation of Russian modernism in the arts and literature, as well as in politics and scholarship, the movement sought to reimagine the former imperial space in the wake of Europe's Great War. The Eurasianists argued that as an heir to the nomadic empires of the steppes, Russia should follow a non-European path of development. In the context of rising Nazi and Soviet powers, the Eurasianists rejected liberal democracy and sought alternatives to Communism and capitalism. Deeply connected to the Russian cultural and scholarly milieus, Eurasianism played a role in the articulation of the structuralist paradigm in interwar Europe. However, the movement was not as homogenous as its name may suggest. Its founders disagreed on a range of issues and argued bitterly about what weight should be accorded to one or another idea in their overall conception of Eurasia. In this first English language history of the Eurasianist movement based on extensive archival research, Sergey Glebov offers a historically grounded critique of the concept of Eurasia by interrogating the context in which it was first used to describe the former Russian Empire. This definitive study will appeal to students and scholars of Russian and European history and culture.*

Explore a pictorial history of the working life of Wallsend and its people over the last century and more.

In the early 17th century, Russia went through a foreign invasion and the nations first civil war a time so horrible that it acquired its own name in Russian history: The Times of Troubles. Internal and external forces came together to create a storm of such magnitude that it threatened the very existence of the nation. The country lay in ruins and a foreign army occupied Moscow. For a while it seemed that Russia would never become an independent nation again, but the Russian people found enough strength and courage to stop the civil war and unite against foreign invaders. Two young people played a most important role in these events a pretender to the Russian throne who called himself Tsarevich Dmitry, son of the late Russian Tsar Ivan the Terrible, and Marina Mnishek, the girl with whom he fell in love while on the run from then Russian Tsar, Boris Godunov. Dmitry invaded Russia with a small band of adventurers and defeated Godunov. He and Marina were married and crowned in the Kremlin. Two weeks after their marriage, Dmitry was killed in a riot and Marina was exiled to the far North. But she escaped, and took part in a civil war herself. Twice she came to the walls of Moscow with an army and two different men by her side, fighting for her crown. This is a true story how a young man of uncertain ancestry and a young woman from a family of Polish nobility forced history to engrave their names into the list of Tsars families of Russia. In their adventures, fights, travels, love stories, and turns of fate throwing them into the depths of despair and raising them to the heights of power and wealth, this couple lived more exciting lives than millions of other human beings put together.

The Truth Behind the Secret Plans to Rescue the Russian Imperial Family

The field of business history has changed and grown dramatically over the last few years. There is less interest in the traditional 'company-centred' approach and more concern about the wider business context. With the growth of multi-national corporations in the 1980s, international and inter-firm comparisons have gained in importance. In addition, there has been a move towards improving links with mainstream economic, financial and social history through techniques and outlook. The International Bibliography of Business History brings all of the strands together and provides the user with a comprehensive guide to the literature in the field. The Bibliography is a unique volume which covers the depth and breadth of research in business history. This exhaustive volume has been compiled by a team of subject specialists from around the world under the editorship of three prestigious business historians. The collapse of the centrally planned systems of the former Soviet Union undoubtedly stands out as one of the most important global events of the twentieth century. The transformation from a centralized economic system to a market system created major opportunities for Western corporations to enter markets that had formerly been closed to them. In this book E.K.Dosmukhamedov employs a distinctive approach to the study of post-communist transition by analyzing Foreign Direct Investment (FDI) from a political, legal and economic standpoint. Kazakhstan, the second largest country of the former USSR, is used as a case study to illustrate the role of FDI in restructuring the economy of the former Soviet Union countries in the Post-Communist era.

A collection of essays taking a new look at social and cultural aspects of the 1950s in Australia. Research presented here suggests a much more complex cultural period, drawing out themes such as sexuality, modernism, suburbanism and popular and public culture.

An illustrated history of mining and metallurgy in Australia, New Zealand, Fiji and Papua New Guinea; Newcastle - Coal and steel from the Illawarra - Cobar copper - Broken Hill - Coal from the Bowen Basin - Copper and lead - Manganese from Groote Eylandt - Gold and copper from Tennant Creek - Gold brings prosperity to Western Australia - Murchison gold - Iron ore, oil and gas from the Pilbara - Coal and mineral sands - South Australia's wealth in copper - Port Pirie - Iron and steel from Whyalla - Victoria's gold - Brown coal - Fijian gold - Copper and gold from Ok Tedi.

This book covers a broad spectrum of issues shaping the current paradigm of minerals sector governance. The ultimate aim of the book is to understand trends and developments in mineral law and policy occurring at international, regional, cross-border and in some selected cases at national level and also to identify some of the challenges lying ahead. With these objectives in view, the book brings together a representative selection of the most knowledgeable authors on the subject. The contributions deal with a diverse range of issues tackled from interdisciplinary perspectives. Topics are divided into five main chapters: international and comparative aspects of mineral law; actors and policies in the minerals industry; investment prospects, financial and fiscal issues; sustainable development and regional outlooks. The book aspires to serve as a useful reference for scholars, practitioners, students and all those with an interest in current developments in the areas reviewed.

Elizabeth Bastida is the Rio Tinto Research Fellow and the Director of the Mineral Law and Policy Programme at the Centre for Energy, Petroleum, Mineral Law and Policy at the University of Dundee (CEPMLP/Dundee).

Thomas W?lde is the Professor of International Economic, Natural Resources and Energy Law and was (until 2001) the Executive Director of CEPMLP/Dundee. He currently runs TWA, his private consultancy firm, which provides advisory services in natural resources and energy law, regulatory reform, investment promotion, state enterprise/agency appraisal and restructuring, privatisation, contract assessment, negotiation and dispute management. Janeth Warden-Fern?ndez is a Research and Teaching Fellow, an advisor of the Mineral Law and Policy Programme and the Manager of the Distance Learning Programme at CEPMLP/Dundee.

From the New York Times bestselling author of A Constellation of Vital Phenomena—dazzling, poignant, and lyrical interwoven stories about family, sacrifice, the legacy of war, and the redemptive power of art. This stunning, exquisitely written collection introduces a cast of remarkable characters whose lives intersect in ways both life-affirming and heartbreaking. A 1930s Soviet censor painstakingly corrects offending photographs, deep underneath Leningrad, bewitched by the image of a disgraced prima ballerina. A chorus of women recount their stories and those of their grandmothers, former gulag prisoners who settled their Siberian mining town. Two pairs of brothers share a fierce, protective love. Young men across the former USSR face violence at home and in the military. And great sacrifices are made in the name of an oil landscape unremarkable except for the almost incomprehensibly peaceful past it depicts. In stunning prose, with rich character portraits and a sense of history reverberating into the present, The Tsar of Love and Techno is a captivating work from one of our greatest new talents.

People and Industries Through the Years

The Epic Quest for Oil, Money & Power

The Rise and Decline of a British Mining House, 1926–1998

A riveting account of the last eighteen months of Tsar Nicholas II's life and reign from one of the finest Russian historians writing today. In March 1917, Nicholas II, the last Tsar of All the Russias, abdicated and the dynasty that had ruled an empire for three hundred years was forced from power by revolution. Now, on the hundredth anniversary of that revolution, Robert Service, the eminent historian of Russia, examines Nicholas's life and thought from the months before his momentous abdication to his death, with his family, in Ekaterinburg in July 1918. The story has been told many times, but Service's deep understanding of the period and his forensic examination of previously untapped sources, including the Tsar's diaries and recorded conversations, as well as the testimonies of the official inquiry, shed remarkable new light on his troubled reign, also revealing the kind of Russia that Nicholas wanted to emerge from the Great War. *The Last of the Tsars* is a masterful study of a man who was almost entirely out of his depth, perhaps even willfully so. It is also a compelling account of the social, economic and political ferment in Russia that followed the February Revolution, the Bolshevik seizure of power in October 1917 and the beginnings of Lenin's Soviet socialist republic.

Tomas and Anastasia have settled in the model village of Oakdale in the Sirhowy Valley in Monmouthshire, South Wales, and have assumed the names of Thomas and Ann Thomas who are the owners of Tommy Twicer's Amazing Animal Dance Circus. It is the continuation of Tomas's desire to become a great showman and he is set to create the best circus in the world with his troupe of amazing animals. He will promote Kanga Bruce, the boxing kangaroo, who will certainly get a shot at the world title. All is going to plan, especially as he now has the help of Merlin, the magician. Read and enjoy and please help save Abercwmzoo.

Well after the disintegration of the Communist Party and the Soviet state--and through several years of economic collapse--industrial workers in almost every sector of the former Soviet Union have remained quiescent and the same ineffective and unpopular trade unions still hold a virtual monopoly on worker's representation. Why? While many argue that labor is a central variable in the development of economic and political systems, little is known about workers in the states of the former Soviet Union since the fall of Communism. In a comparative study of two groups of industrial workers--the coal miners and steelworkers--at the end of the Soviet era, Stephen Crowley sheds light on where these workers have been and where they are going. Coal miners in the final years of the Soviet Union effectively organized and led strikes which supported the end of Communism, even though their heavy subsidies would be threatened by capitalism. Steel workers, in contrast, did not effectively organize and strike. This pattern has continued under the new governments, with the coal miners effectively organized and seeking protection from the worst consequences of marketization, while the steel workers remain weakly organized despite deteriorating economic conditions. Based on extensive on-site research including interviews with miners and steelworkers, labor leaders and plant managers, Crowley develops a detailed picture of the conditions under which workers organize. His findings have application beyond the conditions of post-Communist Russia and Ukraine to other societies undergoing fundamental change. This book will be of interest to sociologists and political scientists interested in the role of labor in transitional societies, the patterns of organization of labor, as well as area specialists. Stephen Crowley is Associate Professor of Political Science, Oberlin College.
