This book provides an in-depth study of the moral economies emerging from within conditions of precarity in rural communities in contemporary Myanmar. James C. Scott's seminal work on 'The Moral Economy of the Peasant' argued that peasant notions of subsistence and expectations of reciprocity formed the basis for subsequent rebellion as economic conditions changed and new market forces were introduced. Now, nearly a century on, Michael Griffiths argues that the conditions faced by rural communities in Myanmar remain precarious, but different forms of moral economy shape their responses. In the contemporary context, the moral economy of rural communities is characterized by the emergence of localized, self-organized community welfare associations which adopt a sophisticated iteration of self-help framed by the Buddhist concept of parahita (altruism). This book analyses the performative nature of these welfare organizations as a form of politics, asking how notions of citizenship expressed in these organizations promote more inclusive, or more exclusive practices towards non-Buddhist minorities. At a time when discourse on identity in Myanmar has been dominated by practices of othering and exclusion, this book provides an important analysis of what citizenship and reciprocity means in contemporary rural Myanmar. This book is a critical resource for researchers working on rural development and the social sciences in Southeast Asia.

Community Welfare Organisations in Rural Myanmar
Radically Elementary Probability Theory

This book introduces students to complexities of the teaching profession. This is designed for the course of Introduction to teaching 120 in Curtin University.

BNF 78 (British National Formulary) September 2019

Challenges and Dilemmas

Using only the very elementary framework of finite probability spaces, this book treats a number of topics in the modern theory of stochastic processes. This is made possible by using a small amount of Abraham Robinson's nonstandard analysis and not attempting to convert the results into conventional form.

Introduction to Teaching

Learning about Dance

Provides an introduction to the theory and practice of teaching and is an invaluable guide to students as they learn how to become primary school teachers. Australian authors.

Bitch in Heat

The Ethics of Teaching, 5th Edition

Written in a style that speaks directly to today's teacher, The Ethics of Teaching, Fifth Edition uses realistic case studies of day-to-day ethical dilemmas. The book covers such topics as: punishment and due process intellectual freedom equal treatment of students multiculturalism religious differences democracy teacher burnout professional conduct parental rights child abuse/neglect sexual harassment.

Growth Factors as Drugs for Neurological and Sensory Disorders

Degeneration of sensory receptors or of the nerves innervating them leads to a sensory deficit. Various strategies have been tried for promoting regrowth of sensory receptors, particularly in the eye and ear. The latest data from experimental studies in animals are presented in the book including applications of BDNF and CNTF in the eye and epidermal growth factor in the ear.

An Introduction to Dance as an Art Form and Entertainment
Compiled with the advice of clinical experts and continually updated to reflect the latest evidence from credible sources worldwide, the new edition of the British National Formulary 78 (BNF) provides up-to-date guidance on prescribing, dispensing, and administering medicines. Access to the latest edition of the BNF is vital for healthcare professionals, as it reflects current best practice as well as legal and professional guidelines relating to the uses of medicines. NICE has accredited the editorial process used by the British National Formulary to produce its resources.
