This book offers a broad perspective on important topics in earthquake geotechnical engineering and gives specialists and those that are involved with research and application a more comprehensive understanding about the various topics. Consisting of eighteen chapters written by authors from most seismic active regions of the world, such as USA, Japan, Canada, Chile, Italy, Greece, Portugal, Taiwan, and Turkey, the book reflects different views concerning how to assess and minimize earthquake damage. The authors, a prominent group of specialists in the field of earthquake geotechnical engineering, are the invited lecturers of the International Conference on Earthquake Geotechnical Engineering from Case History to Practice in the honour of Professor Kenji Ishihara held in Istanbul, Turkey during 17-19 June 2013.

This book is a collection of fictional anecdotes referring to my time spent at the National Defence Academy, the Indian Navy and post retirement from the Navy. The anecdotes are not contiguous. Therefore, they can be read in any order. I would also like to mention that I've used hyperbole extensively to accentuate humour. So, if you're looking for historical accuracy, truths and correctness, or are trying to figure out who the characters in the anecdotes could be, then this is not meant for you. Spare yourself the torture of reading it and spoiling your day! I've tried, as far as possible, to avoid personalities and names of actual people, except in cases where they have asked me to do so.
