Patterns of Interaction

*Filling a gap in a field with very few teaching books available, Childhood in World History provides a much-needed historical overview. Studying childhood historically greatly advances our understanding of what childhood is about, and a world history focus permits broad questions to be asked. Peter N. Stearns, an esteemed name in the field, focuses on childhood in several ways: childhood across change – the shift from hunting and gathering to an agricultural society, the impact of civilization, and the emergence of major religions new and old debates about the distinctive features of Western childhood, including child labour the emergence of a modern, industrial pattern of childhood in the West, Japan and communist societies, focusing on education and economic independence globalization and the spread of child-centred consumerism. Highlighting the gains, the divisions, and the losses for children across the millennia, this fascinating book will appeal to students across the board, and will prove an excellent teaching resource.*

Cross-Cultural Encounters in Modern World History explores cultural contact as an agent of change. It takes an encounters approach to world history since 1500, rather than a political one, to reveal different perspectives and experiences as well as key patterns and transformations. It studies the spaces between cultures historically to help us transcend human differences today in a rapidly globalizing world. The text focuses on first encounters that suggest long-term developments and particularly significant encounters that have changed the direction of world history. Because of the complexities of these encounters, the author takes a user-friendly approach to keep the text accessible to students with varying backgrounds in history.
