Have you ever used Dr. Google to diagnose your own illness? I have and trust me it doesn't work. How about taking it a step further and researching your own treatment for that same self-diagnosed illness? I have done that too and it doesn't work either. In fact it just makes matters a whole lot worse. The problem is that sometimes when you need help and nobody seems to know the answers it's the only logical thing left to do. Well, after years of self-diagnosis and multiple doctors visits, I was finally and officially diagnosed with Ulcerative Colitis. Having never heard those words before, never mind understanding what it was, I was left a little bit clueless. My problem was that every piece of information I was given was medical-based and I couldn't find a single thing that was personally relatable. I mean the medical facts were great, but I had nothing to prepare me for the psychological stress, social awkwardness or unforeseen accidents that were about to barge their way into my life, changing me forever. So I have decided to share my experiences, some personal stories and a few tips on what helped me, in the hope that someone who is suffering from Ulcerative Colitis can find some comfort that what they are going through is normal, can be overcome and that there really is a light at the end of the tunnel. Join a hot dog named Dog and a chicken nugget named Nugget as they go to summer camp in this hilarious third book in the Level 2 Ready-to-Read Graphics series by Jason Tharp! Nugget and Dog are going to summer camp with their friends. Everyone is excited for ghost stories, hiking, and-best of all-s'mores! Especially Dijon. He's going to see his cousin, Honey Mustard, and he has an evil plan like no other! Will it go his way, or will things get a little bit sticky? Ready-to-Read Graphics books give readers the perfect introduction to the graphic novel format with easy-to-follow panels, speech bubbles with accessible vocabulary, and sequential storytelling that is spot-on for beginning readers. There's even a how-to guide for reading graphic novels at the beginning of each book.

Bishop Brian Raymond Tamaki leads one of the fastest growing church movements in New Zealand. As the founder and senior minister of Destiny Church, Tamaki's message has challenged the traditional parameters of Christian influence, using the Gospel to break new ground in social, religious and political spheres. Written on the twenty-seventh anniversary of Tamaki and his wife Hannah's conversion to Christianity, Bishop Brian Tamaki - More than meets the eye offers the reader a unique opportunity to go beneath the surface and read about Tamaki in his own words. A descendant of the Ngati Ngawaeoro and Ngati Maniapoto tribes, both part of the Tainui confederation, Brian Tamaki grew up in Te Awamutu. He speaks directly to the reader, describing his journey up to now, from his rural upbringing to his adolescence in Tokoroa where he was a forestry worker by day and rock musician by night. He also describes the development of his relationship with his wife Hannah, raising a family, and his conversion to Christianity. Tamaki provides a context to his well-known beliefs on family values (including same-sex marriages and the role of the father), and a background to the inspiration behind the hugely publicised 'Enough is Enough' march on Parliament Grounds in 2004; the formation of the Destiny New Zealand political party; Destiny Television; and the development of his ministry. Tamaki's unwavering conviction is that there is one God, and the church and the advance of the kingdom of God is the only hope for society.

"For award-winning science writer Margie Patlak, exploring the unique nature of the Maine coast opens a door to deeper ties and insights. Watching a striped monarch caterpillar transform into a chatrireuse pendant dabbbed with gold, she realizes the limits of life and what passes between generations. She explores the violent geologic collisions that thrust up and fractured Maine's mountains; digs into the latest scientific thinking on how animals navigate; reflects on the dizzy dance of plankton under the microscope and the dogfish heart that continued to beat while held in the palm of her hand. She looks at moose, fox, fishers, and the tides as well, and shares a chapter about cleaning up the Maine coast by kayak. These facets of the natural world speak a hidden language that is translated by scientific knowledge and reflection. Nature begins to speak about the nature of life"--S'more Than Meets the Eye!

Joan Brock seems to have the perfect life: a deep faith in God, a happy marriage, a beautiful young daughter, and a satisfying career teaching blind students how to adapt to a seeing world. Then Joan's own eyesight begins to fail due to a rare and an incurable condition. Her world becomes shrouded in shadows, where familiar objects, such as an out-of-place chair or a door left ajar, prove perilous. As Joan struggles to adapt to her new reality, she receives another harsh blow: her husband is diagnosed with terminal cancer. How can I do this alone? She wonders. What will happen to my daughter? More Than Meets the Eye is the powerful story of meeting hardships head-on with resilience and a resolute faith that turns sorrow into joy and tragedy into triumph. It is also a story of unexpected romance. In 2003 Joan's remarkable story was the basis of a television movie, More Than Meets the Eye: The Joan Brock Story, which premiered on the Lifetime network and was distributed internationally by Hallmark.

A rare look at the role of special effects in creating fictional worlds and transmedia franchises From comic book universes crowded with soaring superheroes and shattering skyscrapers to cosmic empires set in far-off galaxies, today's fantasy blockbusters depend on visual effects. Bringing science fiction from the studio to your screen, through film, television, or video games, these special effects power our entertainment industry. More Than Meets the Eye delves into the world of fantastic media franchises to trace the ways in which special effects over the last 50 years have become central not just to transmedia storytelling but to worldbuilding, performance, and genre in contemporary blockbuster entertainment. More Than Meets the Eye maps the ways in which special effects build consistent storyworlds and transform genres while traveling from one media platform to the next. Examining high-profile franchises in which special effects have played a constitutive role such as Star Trek, Star Wars, The Matrix, and The Lord of the Rings, as well as more contemporary franchises like Pirates of the Caribbean and Harry Potter, Bob Rehak analyzes the ways in which production practices developed alongside the cultural work of industry professionals. By studying social and cultural factors such as fan interaction, this book provides a context for understanding just how much multipatform storytelling has come to define these megahit franchises. More Than Meets the Eye explores the larger history of how physical and optical effects in postwar Hollywood laid the foundation for modern transmedia franchises and argues that special effects are not simply an adjunct to blockbuster filmmaking, but central agents of an entire mode of production.

Presents biographies and statistics of various Autobots and Decepticons, with entries describing storyline elements such as Cybertron, Guardian Robots, and Energon cubes.

More Than Words Can Say (A Patchwork Family Novel Book #2)

In More Than Meets the Eye, Georgina Kleege explores the ways that ideas about visual art and blindness are linked in many facets of the culture. While it may seem paradoxical to link blindness to visual art, western theories about art have always been haunted by the specter of blindness. Theideal art viewer is typically represented as possessing perfect vision, an encyclopedic knowledge of art, and a photographic memory of images, all which allow for an unmediated wordless communion with the work of art. This ideal viewer is defined in polar opposition to a blind person, presumed to be oblivious to the power of art, and without the cognitive capacity to draw an analogous experience. Kleege begins her study with four chapters about traditional representations of blindness, arguing that traditional theories of blindness fail to take into account the presence of other senses, or the ability of blind people to draw analogies from non-visual experience to develop concepts aboutvisual phenomena. She then shifts focus from the tactile to the verbal, beginning with Denis Diderot's remarkable range of techniques to describe art works for those who were not present to view them for themselves, and how his criticism offers a powerful warrant for bringing the specter ofblindness out of the shadows and into the foreground of visual experience. Through both personal experience and scholarly treatment, Kleege dismantles the traditional denigration of blindness, contesting the notion that viewing art involves sight alone and challenging traditional understandings of blindness through close reading of scientific case studies and literarydepictions. More Than Meets the Eye introduces blind and visually impaired artists whose work has shattered stereotypes and opened up new aesthetic possibilities for everyone.

As Rodimus leads his crew to the gates of heaven, an ancient plan comes to fruition and larger forces close in.

***After fulfilling a pledge to a dying friend, Zacharias Hamilton is finally free. No family entanglements. No disappointing those around him. Just the quiet bachelor existence he's always craved. Until fate snatches his freedom away when the baker of his favorite breakfast bun is railroaded by the city council. Despite not wanting to get involved, he can't turn a blind eye to her predicament . . . or her adorable dimples. Abigail Kemp needs a man's name on her bakery's deed. A marriage of convenience seems the best solution . . . if it involves a man she can control. That person definitely isn't the stoic lumberman who oozes silent confidence whenever he enters her shop. Control Zacharias Hamilton? She can't even control her pulse when she's around him. When vows are spoken, Abigail's troubles should be over. Yet threats to the bakery worsen, and darker dangers hound her sister. Can she put ever more trust in Zach without losing her dreams of independence?***

***Many consider Evangeline Hamilton cursed. Orphaned at a young age and possessing a pair of mismatched eyes—one bright blue, the other dark brown—Eva has fought to find her way in a world that constantly rejects her. Yet the support of even one person can help overcome the world's judgments, and Eva has two—Seth and Zach, two former orphans she now counts as brothers. Seeking justice against the man who stole his birthright and destroyed his family, Logan Fowler arrives in 1880s Pecan Gap, Texas, to confront Zach Hamilton, the hardened criminal responsible for his father's death. Only instead of finding a solitary ruthless gambler, he discovers a man not much older than himself with an unusual family. When Zach's sister, Evangeline, insists on dousing Logan with sunshine every time their paths cross, Logan finds his quest completely derailed. Who is truly responsible for his lost legacy, and will restoring the past satisfy if it means forfeiting a future with Evangeline?***

Blindness and Visual Art

The adventurers aboard the starship "Lost Light" continue to search for the Knights of Cybertron and they are all headed into dangerous territory.

From Victoria Powers' poverty-stricken upbringing, the only thing her mother passed down to her was this spiteful prophecy: "Nobody will remember you fifteen minutes after your funeral . . ." Now a world-class architect, Victoria is determined to prove her mother wrong. But life isn't simple as she juggles a daughter's resentment, a son's weakness, and a socialite's vendetta. To make matters worse, she has never allowed a man to dictate her world, but now two men command her thoughts. When her past and present collide, neither the sanctity of Mont Saint Michel, nor the pastoral simplicity of Switzerland can rectify the damage. Protecting all she holds dear and preserving her legacy will require More Than Meets the Eye.

Comedy / 5m, 6f / Int. When produced in summer stock at Dorset, Vermont, this comedy broke all records. It concerns Stanley Nichols who writes successful children's stories under the pen name of Grandma Letty. He is voted "Grandmother of the Year" and his house is besieged by reporters and photographers. Afraid that exposure as a juvenile writer will jeopardize the chances of his serious new novel, Stanley has to produce a Grandma. After all else fails, he impersonates the lady.

Focusing on cases involving major military action, foreign aid authorization, and key controversial votes in both legislative branches, Hinckley shows that—appearances to the contrary—Congress more often than not votes with the President, and has done so for the last few decades. Despite occasional flurries of activity on carefully chosen symbolic issues, most foreign policy issues never even make the Congressional agenda. Those that do are often dispatched with demands for reports that are left unread or with tough restrictions having built-in "escape provisions." Both branches, Hinckley argues, encourage this image of conflict and profit from the symbolic political capital it produces. This process comes to light in her analysis of aid to Nicaragua. What Hinckley reveals is sharply at odds with conventional wisdom and unflattering to both the executive and the legislative branches of government. More than a critical reassessment, this book also proposes reforms than might result in real congressional participation in the making of foreign policy. With its insight into how our system of checks and balances works—and doesn't—this book takes a first step toward making the peoples' representatives accountable for crucial American interests in foreign matters.
