Two ITians have teamed up to conjure 100 tips and tricks to crack the IIT. Their only mantra is 'Smart work will trump hard work'. It not only answers questions about all things physics, chemistry and maths but also addresses issues that students worry about and don't know whom to ask: Night owls vs early risers What does one do in class 11? Writing a formula 84 times to remember it Using WWE-style cards to make learning fun Colour-coded notebooks Getting the most out of lab experiments If tutorials and textbooks are professors, this book is that clever friend whom you meet outside the classroom and ask all your questions.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. BlackwellAssistant Secretary for Maritime Affairs

100 Tips to Crack the IIT

Is there a secret space program that is connected in some way to UFOs? In this booklet, historian Richard Dolan delves into this question, one of the most discussed in ufology today. Providing a wealth of data and context for the reader, he offers his own conclusion: yes, there is indeed such a program. But this program is not a simple extension of the normal operations of the U.S. government or military, much less of NASA. Instead, it seems to be the product of what Dolan has previously termed a "breakaway civilization," a radically advanced and increasingly separate structure that has access to classified science and data denied to the rest of us.Adapted from his classic lecture at the Secret Space Program and Breakaway Civilization conference in San Mateo, this is now offered as a volume in the Richard Dolan Lecture Series.

A Fresh Guide to an Ancient Mystery

*History that doesn't suck: Smart, crude, and hilariously relevant to modern life. Those who don't know history are doomed to repeat it. Too bad it's usually boring as sh*t. Enter The Captain, the ultimate storyteller who brings history to life (and to your life) in this hilarious, intelligent, brutally honest, and crude compendium to events that happened before any of us were born. The entries in this compulsively readable book bridge past and present with topics like getting ghosted, handling haters, and why dog owners rule (sorry, cat people). Along the way you'll get a glimpse of Edith Wharton's sex life, dating rituals in Ancient Greece, catfishing in 500 BC, medieval flirting techniques, and squad goals from Catherine the Great. You'll learn why losing yourself in a relationship will make you crazy--like Joanna of Castile, who went from accomplished badass to Joanna the Mad after obsessing over a guy known as Philip the Handsome. You'll discover how Resting Bitch Face has been embraced throughout history (so wear it proudly). And you'll see why it's never a good idea to f*ck with powerful women--from pirate queens to diehard suffragettes to Cleo-f*cking-patra. People in the past were just like us--so learn from life's losers and emulate the badasses. The Captain shows you how.*

Deep coverage and rigorous examination of international corporate finance Multinational Finance offers an advanced exploration of international corporate finance concepts and operations. Despite its status as one of the most rigorous texts on the topic, this book remains accessible and readable without sacrificing depth of coverage. Sidebars, key terms, essays, conceptual questions, and problems with solutions help aid in the learning process, while suggested readings and PowerPoint handouts reinforce the material and offer avenues for further exploration. This new sixth edition includes Excel templates that allow students to use real-world tools in a learning environment, and the modular structure facilitates course customization to individual objectives, interests, and preparatory level. The emphasis is on the basics of financial management, but coverage includes unique chapters on treasury management, asset pricing, hedging, options, and portfolio management in addition to traditional finance topics. International finance is a diverse field with myriad specialties and a vast array of possible interests. This book allows students to view the field through the lens of a financial manager with investment or financial options in more than one country to give them a practical feel for real-world application. Understand the nature and operations of international corporate finance Evaluate opportunities, costs, and risks of multinational operations See beyond the numbers and terminology to the general principles at work Learn the markets, currencies, taxation, capital structure, governance, and more Comprehensive, adaptable, and rigorously focused, this book gives students a solid foundation in international corporate finance, as well as a sound understanding of the tools and mechanics of the field. Designed for MBA and advanced undergraduate courses, Multinational Finance provides the deep coverage so essential to a solid education in finance.

I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

This book explains how our monetary system works and how commercial banks create money. The effects of this are examined, along with an alternate monetary system that is vastly superior - which we term Fair Money. Topics covered include: how commercial banks create money, the importance of seigniorage, how quantitative easing works, what monetary policy really means, how inter-bank payments work, the distraction of fractional reserve banking, the Guernsey experiment, the Chicago Plan, the 5 different money classes, why depositors are creditors, the war on cash, how banks buy currency notes, how bank balance sheets work, constraints on money creation, consequences of debt monetisation, the use of misleading terminology, the historical role of gold, the benefits of an asset-based currency, and the transition to a better monetary system. Extracts are provided from the Bank of England, the Federal Reserve System, the International Monetary Fund and the Reserve Bank of Australia.

Confusing Textbooks? Missed Lectures? Tough Test Questions? Fortunately for you, there's Schaum's Outlines. More than 40 million students have trusted Schaum's to help them succeed in the classroom and on exams. Schaum's is the key to faster learning and higher grades in every subject. Each Outline presents all the essential course information in an easy-to-follow, topic-by-topic format. You also get hundreds of examples, solved problems, and practice exercises to test your skills. This Schaum's Outline gives you Practice problems with full explanations that reinforce knowledge Coverage of the most up-to-date developments in your course field In-depth review of practices and applications Fully compatible with your classroom text, Schaum's highlights all the important facts you need to know. Use Schaum's to shorten your study time-and get your best test scores! Schaum's Outlines-Problem Solved.

Crime Types and Criminals is an essential introduction to the study of criminology, focusing on crime types in particular. This book provides broad coverage of all major crime types, as well as coverage of research methods and theory. This book can be used both as a stand-alone and supplementary text in courses such as introduction to criminology, crime and society, deviant behaviour, crime profiling, and many other courses within the criminology and criminal justice discipline. Unlike many of the current criminology books on the market, this is a brief book that really talks about all kinds of crime and criminals in detail in a way to capture and retain student interest.

3rd Quarter Wrap Up 2020 -

The War on Populism

Of the many books on UFOs and aliens, this one may be unique. Richard Dolan, one of the world's leading historians of the UFO subject, has analyzed the different alien types and agendas based on longstanding patterns observed by witnesses. This is both a careful review of the best evidence we have of human-alien interaction, as well as a bold speculation of just who the aliens are and what they want. Dolan's analysis starts with our ancient pre-history and potential genetic modifications and monitoring by extraterrestrials. He also studies the long history of interaction with perfectly human-looking beings who somehow did not seem as though they were "from here." Such interactions have continued through the present day. Who are these beings? He also analyzes reports of gray aliens and other types, including reptilian types, insectoid types, hybrid beings, and a range of others. With a view toward understanding their psychology, their technological capabilities, and the nature of their interactions with people, he speculates as to what ultimate plans may be. He argues that the alien presence is especially important now. This is because of the rapid transformation of human civilization into something we have never before experienced. We still don't have a proper name for what we are going through, but it includes a combination of radical new technologies with a new social order that ultimately might make human civilization much more like the societies that these other beings already have. One that combines a tightly centralized and controlled social order with sophisticated science and technology.

In this second volume of his Consent Factory essays, C. J. Hopkins continues his irreverent coverage of the mainstream media and political establishment's reaction to the presidency of Donald Trump and the so-called "new populism" that put him in office. "Hilarious ... furious ... required reading ..." (Matt Taibbi, Rolling Stone), the essays in this collection cover the insanity of 2018 and 2019. Russiagate, mass "fascism" hysteria, the new McCarthyism, the war on dissent, the Hitlerization of Jeremy Corbyn, the demonization of the working classes, identity politics, and all the rest of the establishment's "war on populism." In this time of extreme political polarization and enforced conformity on both the Left and the Right, Hopkins' political satire and commentary presents a refreshingly unorthodox analysis of the forces at play in the world today -- global capitalism, neo-nationalism, populism, neo-fascism, etc. -- and cuts through the official propaganda, sensationalism, and disinformation that often passes for mainstream news. Featuring popular Hopkins essays like Who Doesn't Love Identity Politics?, Down with the Working Classes!, A Russiagate Requiem, and Trumpenstein Must Be Destroyed!, The War on Populism is an infuriating yet hilarious account of the establishment's attempts to crush the "populist rebellion" that began in the summer of 2016, and over the next four years brought America to the brink of civil war, or perhaps a "color revolution."

When the Romans retreated from northern Europe, they left behind lands of barbarians at the very edge of the known world. Yet a thousand years later the countries surrounding the North Sea were at the heart of scientific, mercantile and artistic enlightenments and controlled the first truly global empires. In The Edge of the World, Michael Pye explains how a small but treacherous body of water inspired the saints, spies, fisherman, pirates, traders and marauders who lived beside and journeyed across the North Sea to give birth to our modern world. Hugely enjoyable.' Tom Holland, Guardian 'Pye is a wonderful historian.' Terry Jones 'Astonishing. A treasure chest.' The Times 'A dazzling historical adventure.' Daily Telegraph 'Extraordinary ... fascinating.' Observer

This is the new must-have UFO book. For beginners and experienced researchers alike, historian Richard Dolan covers the full range of this incredibly complex topic in his uniquely engaging style. He offers fresh insights on everything connected to UFOs: ancient aliens, modern encounters, abductions, channelers, the politics and cover-up, the black budget world, the bizarre science, the social dimensions (read YouTube and Facebook), the future, and much more. Toward that end, Dolan gives practical insights on how to distinguish and investigate UFOs in today's world, where we are flooded with claims and videos and data of all types. In addition, as one of ufology's pioneers in the deep analysis of the cover-up, he offers an original perspective on how it all works and why the cover-up, despite being so entrenched and insidious, is nevertheless bound to end. He also writes on the nature of contact, speculating on who these "Others" might be. Finally, Dolan takes the reader through the "weird science" of UFOs, covering everything from propulsion to spacetime to consciousness and more. UFOs for the 21st Century Mind is a roadmap pointing the way forward in a field filled with uncertainty and obfuscation. In so doing, it is set to reposition an ancient phenomenon into a contemporary state of mind, reminding you just why the greatest mystery of our time is also one of the most important. Contents: Introduction 1. What Are UFOs? 2. Theories of Ancient Visitation 3. Into Modernity: Airships, Foo Fighters, and Flying Saucers, 1896 to 1969 4. UFO Secrecy and Those Who Fought It 5. Digging Deeper-The Breakaway Civilization 6. High Strangeness-UFOs from 1970 to 1990 7. UFOs, 1991 to the Present 8. Contact and Abduction 9. The Growth of Ufology 10. Who Are They? What Do They Want? 11. Weird Science: Propulsion, Energy, Spacetime, and Consciousness 12. Into the Future, Into Ourselves Conclusion 486 p. Illustrated Endorsements: "In a field that can be so confusing, so complex, Richard Dolan has taken his many years of thinking about UFOs and written a completely fresh overview of the entire subject. . . . This is an ambitious work that truly ties the many different aspects of the subject together. It's rare to find something like this, especially considering the care and thoroughness that went into it." -- George Noory, host of Coast to Coast AM. "As a follow-up to his previous books exploring the relationship between UFOs and the National Security State, historian Richard Dolan widens his perspective to explore all aspects of this provocative phenomenon. In this role, he takes us on a journey that brings to life the subtlety and depth of this rich subject, a truly captivating read." --H. E. Puthoff, Ph.D., Director, Institute for Advanced Studies at Austin "UFOs For the 21st Century Mind represents a new kind of book - one that clearly and intelligently addresses literally every aspect and implication of the most maligned, misunderstood and compelling subject in human history. Richard Dolan's newest work is perfect reading for serious students of ufology as well as the absolute beginner. Inspired, particularly well written, and the product of a first class mind for this or any other century." --Peter Robbins, coauthor of the U.K. bestseller, Left At East Gate: A First-Hand Account of the Rendlesham Forest UFO Incident, Its Cover-up and Investigation "This is an invaluable treatment of the known facets and seemingly endless implications regarding UFOs, with a much-appreciated focus on the human experience. A job well done, Richard." -- Sam Maranto, Investigative Researcher
