Rhys never expects that moving on actually means reconnecting with Charlie. Or that her big news changes everything. Becoming a father now, under these circumstances, never factored into his plans. Yet he's not as upset as he thought. Because now he has the opportunity to explore that glimpse of forever...and turn it into reality.

'This volume contains many excellent chapters on some of the most cutting edge topics in competition law today. Among the contributions are assessments of new approaches to competition law analysis, analyses of central and controversial topics in the relationship between competition law and intellectual property, and explorations of new transnational developments in China and elsewhere. The chapters range from studies of specific cases to broad interpretations of major trends. I found many of them to be highly insightful and very useful.' - David J. Gerber, Chicago-Kent College of Law, US 'This fresh collection of essays by scholars from around the world lives up to its title: it stakes out more common ground for the competition law systems of nations. The chapters result from the fourth annual conference of the Academic Society for Competition Law (ASCOLA). The essays cover major issues that reverberate around the world today, including: How should we think about the economic foundations of competition law in view of new research on behavioral economics and consumer choice? What is the future of the treatment of resale price maintenance? What is the proper fit of intellectual property with competition law? And how do we promote competition law and policy across borders? The collection offers insight from law, economics, political science, business strategy, and history.' - Eleanor Fox, New York University, US In recent years, an impressive proliferation of competition laws has been seen around the world. Whilst this development may lead to greater diversity of approaches, economic arguments may promote convergence. The contributions to this book look at a number of most topical issues by asking whether the competition world is turning more towards convergence or diversity. These issues include, among others, the changing role of economics in times of economic crises and political change, the introduction of criminal sanctions, resale-price maintenance, unilateral conduct and the application of competition law to intellectual property and state-owned enterprises. More Common Ground for International Competition Law will appeal to academics, PhD students, and postgraduate students law and economics, members of competition agencies, legal practice and international business.

To Rory Yates being a Texas Ranger is about justice, but all of that changes when he is brought to a small southern town to help uncover the mysteries behind a local woman's death—only to discover corruption and lies. Texas Ranger Rory Yates is not keen for hero status. But it's unavoidable once his girlfriend, country singer Willow Davies, writes a song about his bravery. Rory escapes his newfound fame when he's sent to the remote West Texas town of Rio Lobo, a municipality with two stoplights. And now, according to the Chief of Police, Rio Lobo Detective Ariana Delgado is the one who requested Rory, and the only person who believes a local councilwoman's seemingly accidental death is a murder. Then Rory begins to uncover a tangle of small-town secrets, favors, and lies as crooked as Texas law is straight. To get to the truth before more people die, Rory is forced to take liberties with the investigation. The next ballad of Rory Yates may not be about a hero, but rather an outlaw song.

Mad Libs After Dark

These thirteen tales are populated by an assortment of fictional as well as real characters, all of them vividly sketched and true-to-life: the botanist Linnaeus, the composer Offenbach, the poet Hart Crane, the visionary horror writer H. P. Lovecraft, a southern sheriff, a dealer in rare books, a country singer, an old maid (and her suitor), and a mathematician. Whether these stories are deemed disquieting, comic, prophetic, or tall in the telling, they show us worlds where the truth reveals itself in many shapes. Throughout the writings comprising More Shapes Than One, Fred Chappell's storytelling magic transforms the commonplace.

In 2008, Christopher Niquet, a well-known French stylist, spotted the 1960s supermodel Peggy Moffitt in a Beverly Hills restaurant. Never an autograph chaser, he nonetheless felt compelled to ask for hers. This candid moment ignited an obsessive, ongoing quest. Niquet began to reach out to the models he considered quintessential figures in his industry, for their epic beauty and remote auras. Deploying a sleuth's methods to locate these models around the globe, he collected 100 signatures, most of which are framed along with an iconic portrait. "My original purpose was to get beyond the abstract, incorporeal beauty of these icons, and bring back a sense of their physicality. For me, each signature restored a womanly reality to the intangible being." This book highlights the unique personalities of celebrated or forgotten women from the late 1950s to the 1990s and what they all have in common: the power to awaken creativity in the people who see them. Through generations of cover stories, Models That Matter explores a multi-layered history of feminine beauty, from Jean Shrimpton to Jerry Hall, from Lauren Bacall to Linda Evangelista, from Anita Pallenberg to Naomi Campbell, muses for extraordinary fashion lensmen like Steven Meisel—who wrote the preface to Irving Penn or Richard Avedon.

Describes the feelings of a little girl after her dog dies and features information for parents on helping a child cope with grief.

This compilation of medical and forensic science questions from crime writers around the world provides insight into medical and forensic science as well as a glimpse into the writer's creative mind. How long does it take blood to dry? Can DNA be obtained from a half-eaten bagel? D. P. Lyle, MD, answers these and many more intriguing questions. The book is a useful and entertaining resource for writers and screenwriters, helping them find the information they need to frame a situation and write a convincing description. TV viewers, readers who enjoy crime fiction, and those who want to know more about forensic science can keep up with the news and understand the science behind criminal investigation. From traumatic injuries to the coroner's office, the questions and answers are divided into five parts, making it a compendium of the incredible information that lies within the world of medicine and forensics.

Mothers in the twenty-first century confront us, both in clinical practice and in theory, with fascinating challenges that to some extent subvert the traditional maternal ideal: the motherhood of single women, motherhood in which the mother-child relationship seems minimal (in the case of very busy working mothers), teenage motherhood in which there is no true awareness of the maternal function, motherhood in couples of homosexual women, men who take upon themselves the maternal function (men-mothers), complex motherhood by virtue of the multiple variants that have nowadays become possible thanks to new reproductive techniques, shared motherhood, surrogate motherhood, sublimated motherhood, perverse motherhood. Psycho-history, the accumulation and variety of psychoanalytic theories of femininity and motherhood, the contribution of gender studies, cross-disciplinary research, and listening to what our patients have to say - all this has yielded, in the past few decades, much controversial data that challenges orthodox classical thinking with respect to the role and function of women as mothers.

As Kurt Vonnegut once said, "True terror is to wake up one morning and discover that your high school class is running the country." When it comes down to it, work—with its know-it-alls, gossips, and brown-noser—is a lot like high school. This clever and useful book helps readers identify and better communicate with these and other common types we all remember from the days when report cards, not business reports, were our concern, and when the big social event was the prom, not the company picnic. You don't need to dig out your yearbook to get a glimpse of these types—just take a look around your office: the Teacher's Pet, the Player, the Cheerleader, the Go-Getter, the Underachiever, the Class Clown, and many more. With wit and uncanny accuracy, corporate coaches Wilma Davidson and Jack Dougherty outline all the members of the "class," offering tips on working efficiently with each type, whether they're your boss, your client, or a colleague. The book also delivers advice on handling authority, conformity, looks, popularity, "sex education," and other indignities from high school that live on in the workplace. Whether you're still the same as you were in high school, a combination of types, or a reformed Rebel turned Class President, you will delight in and learn from this unique guide.

Crime Writers' Morbidly Curious Questions Expertly Answered

Hans Fallada was a drug addict, womanizer, alcoholic, jailbird and thief. Yet he was also one of the most extraordinary storytellers of the twentieth century, whose novels, including Alone in Berlin, portrayed ordinary people in terrible times with a powerful humanity. This acclaimed biography, newly revised and completely updated, tells the remarkable story of Hans Fallada, whose real name was Rudolf Ditzen. Jenny Williams chronicles his turbulent life as a writer, husband and father, shadowed by mental torment and long periods in psychiatric care. She shows how Ditzsen's decision to remain in Nazi Germany in 1939 led to his self-destruction, but also made him a unique witness to his country's turmoil. More Lives Than One unpicks the contradictory, flawed and fascinating life of a writer who saw the worst of humanity, yet maintained his belief in the decency of the 'little man'.

This revised and expanded Black Theatre USA broadens its collection to fifty-one outstanding plays, enhancing its status as the most authoritative anthology of African American drama with twenty-two new selections. This collection features plays written between 1935 and 1996.

During the past quarter century, free-market capitalism was recognized not merely as a successful system of wealth creation, but as the key determinant of the health of political and cultural democracy. Now, renowned British journalist and historian Godfrey Hodgson takes aim at this popular view in a book that promises to become one of the most important political histories of our time. More Equal Than Others looks back on twenty-five years of what Hodgson calls "the conservative ascendancy" in America, demonstrating how it has come to dominate American politics. Hodgson disputes the notion that the rise of conservatism has spread affluence and equality to the American people. Quite the contrary, he writes, the most distinctive feature of American society in the closing years of the twentieth century was its great and growing inequality. He argues that the combination of conservative ideology and corporate power and dominance by mass media obsessed with lifestyle and celebrity have caused America to abandon much of what was best in its past. In fact, he writes, income and wealth inequality have become so extreme that America now resembles the class-stratified societies of early twentieth-century Europe. More Equal Than Others addresses a broad range of issues, with chapters on politics, the new economy, immigration, technology, women, race, and foreign policy, among others. A fitting sequel to the author's critically acclaimed America In Our Time, More Equal Than Others is not only an outstanding synthesis of history, but a trenchant commentary on the state of the American Dream.

Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging,race/racism and health, mental health, and healers and healing.
