

Movie Ing System Documentation

The 9th International Conference on Database Systems for Advanced Applications (DASFAA 2004) was held during March 17-19, 2004 on the beautiful Jeju island of Korea. The DASFAA conference provides an international forum for technical discussions among researchers, developers, and users of database - stems from academia, business, and industry. The main focus of DASFAA is on research in database theory, development of advanced DBMS technologies, and their advanced applications. A premier database conference in the Asia/Pacific region, DASFAA has been held every two years, and in many countries in the region. To promote the area further and to answer the needs of many participants, the steering committee decided to hold the conference annually. DASFAA 2004 was the first such annual conference. The conference was organized by the Special Interest Group on Databases (SIGDB) of the Korea Information Science Society and the Advanced Information Technology Research Center (AITrc) at KAIST - an engineering research center of excellence (ERC) supported by the Korea Science and Engineering Foundation (KOSEF). We had a number of sponsors who made generous contributions to make the conference successful. They are Oracle Korea, Samsung SDS, Korea Telecom Data, Inc., the United States Air Force Office of Scientific Research, the Asian Office of Aerospace Research & Development, the Army Research Office-Far East, and the Korea Advanced Institute of Science and Technology (KAIST).

This book constitutes the proceedings of the 14th International Workshop on Knowledge Management and Acquisition for Intelligent Systems, PKAW 2016, held in Phuket, Thailand, in August 2016. The 16 full papers and 5 short papers included in this volume were carefully reviewed and selected from 61 initial submissions. They deal with knowledge acquisition and machine learning; knowledge acquisition and natural language processing; knowledge acquisition from network and big data; and knowledge acquisition and applications.

DEXA 2004, the 15th International Conference on Database and Expert Systems Applications, was held August 30 ? September 3, 2004, at the University of Zaragoza, Spain. The quickly growing spectrum of database applications has led to the establishment of more specialized discussion platforms (DaWaK Conference, EC-Web Conference, EGOVConference, Trustbus Conference and DEXA Workshop: Every DEXA event has its own conference proceedings), which were held in parallel with the DEXA Conference also in Zaragoza. In your hands are the results of much effort. The work begins with the preparation of the submitted papers, which then go through the reviewing process. The accepted papers are revised to final versions by their authors and are then arranged within the conference program. All culminates in the conference itself. For this conference 304 papers were submitted, and I want to thank to all who contributed to it; they are the real base of the conference. The program committee and the supporting reviewers produced altogether 942 referee reports, in average 3,1 reports per paper, and selected 92 papers for presentation. At this point we would like to say many thanks to all the institutions that actively supported this conference and made it possible. These were: • University of Zaragoza • FAW • DEXA Association • Austrian Computer Society

PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and

iPhoto '11: The Missing Manual

Database and Expert Systems Applications

Multimedia Database Systems: Design and Implementation Strategies is a compendium of the state-of-the-art research and development work pertaining to the problems and issues in the design and development of multimedia database systems. The chapters in the book are developed from presentations given at previous meetings of the International Workshop on Multi-Media Data Base Management Systems (IW-MMDBMS), and address the following issues: development of adequate multimedia database models, design of multimedia database query and retrieval languages, design of indexing and organization techniques, development of efficient and reliable storage models, development of efficient and dependable retrieval and delivery strategies, and development of flexible, adaptive, and reliable presentation techniques.

HUMANITY: AN INTRODUCTION TO CULTURAL ANTHROPOLOGY, Eleventh Edition, offers a solid framework centered on globalization and culture change. The text's engaging narrative provides new ways of looking at many of the challenges facing the world in this century, as students examine ethnic conflicts, globalization of culture and language, recent debates about gay marriage, increasing inequalities, population growth, hunger, and the survival of indigenous cultures. Throughout this highly acclaimed work, Peoples and Bailey explore the diversity of humanity and clearly demonstrate why an appreciation and tolerance of cultural differences is critical today. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. Explains how to maximize use of Word, Excel, PowerPoint, and Entrourage in the Macintosh environment, covering installation, power techniques, and under-utilized applications.

The LNAI series reports state-of-the-art results in computer science research, development, and education, at a high level and in both printed and electronic form. Enjoying tight cooperation with the R&D community, with numerous individuals, as well as with prestigious organizations and societies,

LNAI has grown into the most comprehensive computer science research forum available. The scope of LNAI spans the whole range of artificial intelligence and intelligent Information processing including interdisciplinary topics in a variety of application fields. In parallel to the printed book, each new volume is published electronically in LNCS Online.

Antisemitism in Film Comedy in Nazi Germany

Interactive Multimedia Documents

Confidential Documents

Weekly Compilation of Presidential Documents

Today many Germans remain nostalgic about "classic" film comedies created during the 1930s, viewing them as a part of the Nazi era that was not tainted with antisemitism. In *Antisemitism in Film Comedy in Nazi Germany*, Valerie Weinstein scrutinizes these comic productions and demonstrates that film comedy, despite its innocent appearance, was a critical component in the effort to separate "Jews" from "Germans" physically, economically, and artistically. Weinstein highlights how the German propaganda ministry used directives, pre- and post-production censorship, financial incentives, and influence over film critics and their judgments to replace Jewish "wit" with a slower, simpler, and more direct German "humor" that affirmed values that the Nazis associated with the Aryan race. Through contextualized analyses of historical documents and individual films, Weinstein reveals how humor, coded hints and traces, absences, and substitutes in Third Reich film comedy helped spectators imagine an abstract "Jewishness" and a "German" identity and community free from the former. As resurgent populist nationalism and overt racism continue to grow around the world today, Weinsteins study helps us rethink racism and prejudice in popular culture and reconceptualize the relationships between film humor, national identity, and race.

This volume contains the papers presented at the Third International Conference on Scalable Uncertainty Management, SUM 2009, in Washington, DC, September 28-30, 2009. It contains 21 technical papers which were selected out of 30 submitted papers in a rigorous reviewing process. The volume also contains extended abstracts of two invited talks. The volume reflects the growing interest in uncertainty and inconsistency and aims at bringing together all those interested in the management of

uncertainty and inconsistency at large.

This three-volume set constitutes the refereed proceedings of the International Conference on Computational Science and its Applications. These volumes feature outstanding papers that present a wealth of original research results in the field of computational science, from foundational issues in computer science and mathematics to advanced applications in almost all sciences that use computational techniques.

Introduced by Apple in January 2005, iWork '05 is an innovative new suite of document and presentation software that's the same caliber as Apple's groundbreaking digital media applications and that's wholly dedicated to what Mac users like you care about most: artistry and creativity. iWork '05 isn't about "office productivity"--it's about creating slick and stylish documents and cinema-quality digital presentations that say precisely what you want them to say. While iWork '05 helps you create stunning documents and presentations, the suite doesn't come with any in-depth documentation of its own. That's where iWork '05: The Missing Manual comes in. The book that should have been in the box, it gives you everything you need to master iWork '05. Seamlessly integrated with the wildly popular iLife '05 and designed to take advantage of the advanced typography and graphics engine of Mac OS X, iWork is actually two separate programs: Pages and Keynote 2. Pages is a brand-new, streamlined word processor and page layout program that allows nonprofessionals to quickly and painlessly produce gorgeous brochures, newsletters, letters, invitations, product data sheets, and more. You can start documents from scratch or use one of the 40 professionally designed templates as a starting point. Keynote 2 is a significant upgrade to Keynote, Apple's PowerPoint-like presentation software that allows you to build unique presentations, demonstrations, storyboard animations, interactive slideshows, and more. Like every Missing Manual, this one is refreshingly entertaining and scrupulously detailed. iWork '05: The Missing Manual gives you all the essentials of Pages and Keynote 2, including an objective look at each program's capabilities, its advantages over similar programs, and its limitations. The book delivers countless goodies that you won't find anywhere else: undocumented tips, tricks, and secrets for getting the very best results from both exciting new applications. With the iWork '05 suite and iWork '05: The Missing Manual, you are totally equipped to give your work the style it deserves.

Developing Application Frameworks in .NET

Office 2001 for Macintosh: The Missing Manual

Macromedia Dreamweaver MX Unleashed

A Database Perspective

Database Systems for Advanced Applications

Maximum PC is the magazine that every computer fanatic, PC gamer or content creator must read. Each and every issue is packed with punishing product reviews, insightful and innovative how-to stories and the illuminating technical articles that enthusiasts crave.

XML has become the lingua franca for representing business data, for exchanging information between business partners and applications, and for adding structure— and sometimes meaning—to text-based documents. XML offers some special challenges and opportunities in the area of search: querying XML can produce very precise, fine-grained results, if you know how to express and execute those queries. For software developers and systems architects: this book teaches the most useful approaches to querying XML documents and repositories. This book will also help managers and project leaders grasp how “querying XML fits into the larger context of querying and XML. Querying XML provides a comprehensive background from fundamental concepts (What is XML?) to data models (the Infoset, PSVI, XQuery Data Model), to APIs (querying XML from SQL or Java) and more. * Presents the concepts clearly, and demonstrates them with illustrations and examples; offers a thorough mastery of the subject area in a single book. * Provides comprehensive coverage of XML query languages, and the concepts needed to understand them completely (such as the XQuery Data Model). * Shows how to query XML documents and data using: XPath (the XML Path Language); XQuery, soon to be the new W3C Recommendation for querying XML; XQuery's companion XQueryX; and SQL, featuring the SQL/XML * Includes an extensive set of XQuery, XPath, SQL, Java, and other examples, with links to downloadable code and data samples.

This two-volume set LNCS 12656 and 12657 constitutes the refereed proceedings of the 43rd European Conference on IR Research, ECIR 2021, held virtually in March/April 2021, due to the COVID-19 pandemic. The 50 full papers presented together with 11 reproducibility papers, 39 short papers, 15 demonstration papers, 12 CLEF lab descriptions papers, 5 doctoral consortium papers, 5 workshop abstracts, and 8 tutorials abstracts were carefully reviewed and selected from 436 submissions. The accepted contributions cover the state of the art in IR: deep learning-based information retrieval techniques, use of entities and knowledge graphs, recommender systems, retrieval methods, information extraction, question answering, topic and prediction models, multimedia retrieval, and much more.

This book presents the latest developments in both qualitative and quantitative computational methods for reliability and statistics, as well as their applications. Consisting of contributions from active researchers and experienced practitioners in the field, it fills the gap between theory and practice and explores new research challenges in reliability and statistical computing. The book consists of 18 chapters. It covers (1) modeling in and methods for reliability computing, with chapters dedicated to predicted reliability modeling, optimal maintenance models, and mechanical reliability and safety analysis; (2) statistical computing methods, including machine learning techniques and deep learning approaches for sentiment analysis and recommendation systems; and (3) applications and case studies, such as modeling innovation paths of European firms, aircraft components, bus safety analysis,

performance prediction in textile finishing processes, and movie recommendation systems. Given its scope, the book will appeal to postgraduates, researchers, professors, scientists, and practitioners in a range of fields, including reliability engineering and management, maintenance engineering, quality management, statistics, computer science and engineering, mechanical engineering, business analytics, and data science.

Flexible Query Answering Systems

Computational Science and Its Applications - ICCSA 2007

XQuery, XPath, and SQL/XML in context

Intelligent Computer Mathematics

The Missing Manual

Adobe FrameMaker 7.0 Classroom in a Book

Several works on multimedia storage appear in literature today, but very little if any, have been devoted to handling long duration video retrieval, over large scale networks. Distributed retrieval of multimedia documents, especially the long duration documents, is an imperative step in rendering high-quality, high-fidelity, and cost-effective services for network service providers. Distributed Multimedia Retrieval Strategies for Large Scale Networked Systems presents an up-to-date research status in the domain of distributed video retrieval. This professional book will include several different techniques that are in place for long duration video retrieval. An experimentally tested technology under the JINI platform, demonstrates a practical working system which serves as a feasibility study, as well as the first step in realizing such a technology.

Multimedia information systems is a rapidly growing area of research and development, attracting increasing interest from a variety of application fields including business, entertainment, manufacturing, education, CAD, CAE, medicine, etc. Due to the diverse nature of the information dealt with and the increased functionality (e.g., user interaction), the capabilities and system requirements of multimedia information systems dramatically exceed those of conventional databases and database management systems. This book presents an integrated approach to interactive multimedia documents. After summarizing the prerequisites and background information, the author develops an IMD model taking into account interaction and spatiotemporal composition. Based on this model, the author develops an integrated framework covering most of the steps during the life cycle of an IMD, namely data modeling, authoring, verification and querying, execution and rendering, and indexing.

Macromedia Dreamweaver MX Unleashed is the first complete reference guide to cover Dreamweaver

MX's new and powerful features that aid in server-side programming, as well as strategies for designing, managing and developing sophisticated Web sites. A reference for advanced users on complex application development techniques, this book guides developers into the realm of dynamic sites enabling a richer experience for the end user. Developers learn how to collect information from a user and personalize their Web experience and how to use Dreamweaver MX management tools that aren't thoroughly covered in other intermediate-level Dreamweaver books. With better ways to get your photos online and new options for creating printed projects, iPhoto '11 makes it easier than ever to transfer photos from a digital camera, organize them, and publish, print, or share them in maps—but there's still no printed manual for the program. Fortunately, David Pogue and Lesa Snider team up in this witty, authoritative book that should have been in the box. Organize your collection. Discover all of the options for grouping your pictures—by events, in albums, or based on who's in the photo or where it was taken. Sharpen your editing skills. Learn how to use iPhoto's beefed-up editing options, including its Photoshop-like adjustments panel. Share images online. Get your photos to everyone on your list by publishing them to Flickr, Facebook, and MobileMe. Dive into creative projects. Have fun building slideshows (with music), gift books, calendars, and cards.

Adobe FrameMaker has long been the software of choice for technical documentation and large-scale document publishing because of its versatility and ability to handle the entire publishing process--from word processing and page layout to electronic distribution. Now, with the introduction of version 7.0, the popular publishing program has gone even further to accommodate businesses' growing need for multi-format publishing by adding the ability to automatically reformat the same document for delivery in a number of formats, including Web pages, Acrobat print files, Palm handheld devices, and more. And that's just the beginning: Adobe's official Classroom in a Book training series guides you through all of the program's features, tools, and techniques--both old and new--using hands-on projects and end-of-chapter review questions to make sure the newly acquired knowledge sticks! If you're a beginner, you'll want to

read the book from cover to cover for a start-to-finish explanation of how it all works; all of you FrameMaker experts can skip right to the information you need. From the basics (such as character and paragraph formatting) to more advanced tasks (like cross-referencing text and creating indexes)--Adobe FrameMaker 7.0 Classroom in a Book covers it all. The area of content-based video retrieval is a very hot area both for research and for commercial applications. In order to design effective video databases for applications such as digital libraries, video production, and a variety of Internet applications, there is a great need to develop effective techniques for content-based video retrieval. One of the main issues in this area of research is how to bridge the semantic gap between low-level features extracted from a video (such as color, texture, shape, motion, and others) and semantics that describe video concept on a higher level. In this book, Dr. Milan Petkovi6 and Prof. Dr. Willem Jonker have addressed this issue by developing and describing several innovative techniques to bridge the semantic gap. The main contribution of their research, which is the core of the book, is the development of three techniques for bridging the semantic gap: (1) a technique that uses the spatio-temporal extension of the Cobra framework, (2) a technique based on hidden Markov models, and (3) a technique based on Bayesian belief networks. To evaluate performance of these techniques, the authors have conducted a number of experiments using real video data. The book also discusses domains solutions versus general solution of the problem. Petkovi6 and Jonker proposed a solution that allows a system to be applied in multiple domains with minimal adjustments. They also designed and described a prototype video database management system, which is based on techniques they proposed in the book.

This volume constitutes the proceedings of the Sixth International Conference on Flexible Query Answering Systems, FQAS 2004, held in Lyon, France, on June 24–26, 2004. FQAS is the premier conference for researchers and practitioners concerned with the vital task of providing easy, ?exible, and intuitive access to information for every type of need. This multidisciplinary conference draws on several research areas, including databases, information retrieval, knowledge representation, soft computing, multimedia, and human-computer interaction. With FQAS 2004, the FQAS conference series celebrated its tenth anniversary as it has been held every two years since 1994. The overall theme of the FQAS conferences is innovative query systems aimed at providing easy, ?exible, and intuitive access to information. Such systems are intended to facilitate retrieval from information repositories such as databases, libraries, and the Web. These repositories are typically equipped with standard query systems that are often inadequate for users. The focus of FQAS is the development of query systems that are more expressive, informative, cooperative, productive, and intuitive to use.

Mac OS X Snow Leopard is the newest Mac operating system, with even better performance and more efficient use of hard drive space as well as cool features like MobileMe, the iWork productivity suite, and improved media technology. And Mac OS X Snow Leopard All-in-One For Dummies is your one-stop reference for all its features. Eight self-

contained minibooks cover OS X basics, customizing and sharing your Mac, the digital hub, iWork, Internet features, networking, expanding your system, and advanced Mac OS X (for those with more techie inclinations). You'll learn to: Determine whether your hardware can handle upgrading to Snow Leopard Navigate Snow Leopard, find things with Spotlight, control your Mac with Front Row, and make backups Explore the digital hub and its applications: iPhoto, iMovie, iDVD, iTunes, GarageBand, QuickTime, and iWeb Create cool-looking documents with Pages, crunch numbers with Numbers, and build awesome slide presentations with Keynote Set up your Internet connection and e-mail, connect with iChat, sync up with MobileMe, and share large files via iDisk Build a wireless network with AirPort Extreme Keep your Snow Leopard happy with regular maintenance Mac OS X Snow Leopard All-in-One For Dummies also shows you a little of what's under the hood, in case you're interested in doing a little AppleScript programming or learning a bit more about UNIX. Whatever your level of involvement with OS X Snow Leopard, this complete guide covers what you need to know.

"The Sublimity of Document: Cinema as Diorama is a collection of in-depth, substantive interviews with filmmakers devoted to documenting places and events that most of us never get to see--often, places and events that have considerable influence on our lives. The 27 interviews offer an engaging panorama of the recent history and geography of cinema devoted to documenting the world around us, as well as an in-depth look at the challenges and accomplishments of filmmakers willing to go anywhere on the planet (or on the internet!) to document what they believe we need to see"--

* Provides ready-to-run code for some of the most common tasks that .NET applications need to perform, which readers can incorporate directly into their own applications * Shows how to develop an extensible application framework that will greatly simplify development using the Microsoft .NET Framework * Provides examples of advanced object-oriented techniques such as design patterns in the context of real applications * The complete source code for SAF, which is ready for use and can be modified freely, is available for download * Deepens knowledge of .NET by showing many different .NET technologies (e.g. Remoting) in action, in a real application – not just illustrative samples

Introduces the features of the latest version of WordPerfect for the Macintosh and shows how to create, edit, format, and print text, and work with graphics, printing options, macros, and file merges

The authoritative guide to producing, directing, shooting, editing, and distributing your video or film. Whether you aspire to be

a great filmmaker yourself or are looking for movie gifts, this comprehensive guide to filmmaking is the first step in turning a hobby into a career. Widely acknowledged as the “ bible ” of video and film production, and used in courses around the world, The Filmmaker ’ s Handbook is now updated with the latest advances in HD and digital formats. For students and teachers, professionals and novices, this indispensable handbook covers all aspects of movie making. • Techniques for making dramatic features, documentaries, corporate, broadcast, and experimental videos and films • Shooting with DSLRs, video, film, and digital cinema cameras • In-depth coverage of lenses, lighting, sound recording, editing, and mixing • Understanding HDR, RAW, Log, 4K, UHD, and other formats • The business aspects of funding and producing your project • Getting your movie shown in theaters, on television, streaming services, and online

Use an Approach Inspired by Domain-Driven Design to Build Documentation That Evolves to Maximize Value Throughout Your Development Lifecycle Software documentation can come to life, stay dynamic, and actually help you build better software. Writing for developers, coding architects, and other software professionals, Living Documentation shows how to create documentation that evolves throughout your entire design and development lifecycle. Through patterns, clarifying illustrations, and concrete examples, Cyrille Martraire demonstrates how to use well-crafted artifacts and automation to dramatically improve the value of documentation at minimal extra cost. Whatever your domain, language, or technologies, you don't have to choose between working software and comprehensive, high-quality documentation: you can have both. · Extract and augment available knowledge, and make it useful through living curation · Automate the creation of documentation and diagrams that evolve as knowledge changes · Use development tools to refactor documentation · Leverage documentation to improve software designs · Introduce living documentation to new and legacy environments

This book brings all of the elements of database design together in a single volume, saving the reader the time and expense of making multiple purchases. It consolidates both introductory and advanced topics, thereby covering the gamut of database design methodology ? from ER and UML techniques, to conceptual data modeling and table transformation, to storing XML and querying moving objects databases. The proposed book expertly combines the finest database design material from the Morgan Kaufmann portfolio. Individual chapters are derived from a select group of MK books authored by the best and brightest in the field. These chapters are combined into one comprehensive volume in a way that allows it to be used as a reference work for those interested in new and developing aspects of database design. This book represents a quick and efficient way to unite valuable content from leading database design experts, thereby creating a definitive, one-stop-shopping opportunity for customers to receive the information they would otherwise need to round up from separate sources. Chapters contributed by various recognized

experts in the field let the reader remain up to date and fully informed from multiple viewpoints. Details multiple relational models and modeling languages, enhancing the reader's technical expertise and familiarity with design-related requirements specification. Coverage of both theory and practice brings all of the elements of database design together in a single volume, saving the reader the time and expense of making multiple purchases.

"Dan Frakes' Mac OS X Power Tools is an essential (and approachable) guide for getting the most from Mac OS X." —Christopher Breen, Mac 911 Columnist, MacWorld Magazine
Mac Expert Dan Frakes' Turns You Into a Power User
The latest version of Mac OS X (v10.3, Panther) is here, and noted expert Dan Frakes has once again worked day and night to discover and document the best ways for Mac users of all levels of experience to get things done. This completely revised and updated second edition of Mac OS X Power Tools provides tips, shortcuts, and step-by-step solutions to equip you with the most essential insights and knowledge. With this book at your side and your Mac in front of you, you'll understand Mac OS X like never before, saving time, avoiding headaches, and transforming OS X into one very productive cat. Coverage includes: Understanding user accounts and permissions Taking control of the startup and login processes Embracing and extending Finder functionality Using the Dock and Dock replacements Working with applications Streamlining Mac OS and third-party installations Making the most of Classic Improving Web surfing and network connectivity Sharing files and connecting to servers Taking advantage of OS X's advanced printing architecture Strengthening system security Keeping Mac OS X in tip-top shape Controlling your Mac remotely Taking advantage of OS X's Unix base Visit the author's website at www.macosxpowertools.com/

This book constitutes the refereed proceedings of the 11th International Conference on Database and Expert Systems Applications, DEXA 2000, held in London in September 2000. The 92 revised full papers presented together with one invited paper were carefully reviewed and selected from a total of 183 submissions. The book offers topical sections on object-oriented and relational databases, multimedia databases, fundamentals, workflow management systems, database security, XML, advanced databases, queries, knowledge-based systems, data warehouses, database design and analysis, data mining and knowledge discovery, web database systems, indexing, and distributed database systems.
