MRCPCH

Best of Five MCQs for the MRCP Part 1 volumes 1-3 offers a comprehensive and trustworthy solution to anybody wishing to sit, pass, and excel at the Membership of the Royal College of Physicians Part 1 examination. Presented as a unique three-volume set, each volume features 375 high-quality practice questions on each of the medical systems and specialties in alphabetical order. Volume 1 features 375 Best of Five questions on clinical sciences, clinical haematology and oncology, cardiology, and clinical pharmacology, therapeutics and toxicology. All 375 questions contain questions written and reviewed by successful candidates and previous examiners, and are accompanied by detailed explanations and further reading, ensuring complete and successful revision for this challenging exam. Matched to the latest Royal College curricula in coverage and format, this dedicated resource provides readers with an accurate, authoritative and evidence-based companion to the MRCP Part 1.

Complete practice papers of 60 MCQs particularly geared towards the MRCP Part 1 and for candidates in the adult medicine option, especially in the basic science areas. Detailed answers are accompanied by revision notes. The inclusion of an index allows revision by subject as well.

MCQs are now an established part of higher examinations and form a useful means of revision for the candidate. The questions in this book have been compiled as a result of the restructuring of the MRCP examination to allow for earlier specialization in paediatrics. Clearly laid out in the familiar MCQ format and containing approximately 350 questions grouped according to topic, this book covers all areas in paediatrics including statistics and pharmacology. Neurology, neonatology, growth and development, cardiology, respiratory medicine, gastrointestinal medicine and genetics are given particular attention. This book will give the student valuable practice in answering multiple choice questions and testing his knowledge of paediatrics. It should prove a valuable purchase for the MRCP Part 1 candidate as well as any student with an interest in the subject area.

National Library of Medicine Current Catalog

*This collection of authentic MRCP Part 1 Paediatric practice papers reflects the true content of the Royal College examination. Each exam contains a representative selection of questions on general medicine and on paediatric specialties. There are 360 MCQs based on an analysis of past questions, all with correct answers and detailed explanatory teaching notes. Six practice exams containing questions on paediatrics and general medicine, similar to the official Royal College examination.*

*The questions used in this book have been developed and continuously updated over 15 years. 'MCQs in Paediatrics' includes questions and detailed answers submitted by paediatricians in all specialties, and covers the widest range of clinical skills and paediatric knowledge. The questions have been used in both undergraduate and postgraduate examinations at the DCH and MRCP level. All questions have been reviewed and refined following the analysis of examination results, and are designed to test the application of knowledge rather than just the facts. The answers are accompanied by detailed explanations which allow the book to be used both for self-assessment and as a guide for further study.*

A comprehensive guide

Part 1 Paediatric Mcq Revision Book for Mrcp and Mrcpch

Pediatric MCQ Revision Book

MRCP Part1

Paediatric MCQ Revision for MRCP and MRCPCH

This book established itself in its first edition as the definitive 'one-stop-shop' revision aid; the only one available to encompass all elements of the MRCOG Part 2 examination in a single volume. Now incorporating practice EMQs as well as the standard question types, this second edition will ensure that it retains its place on the 'must-have' list for every candidate preparing for this exam.

Concentrating on testing the candidate's theoretical and practical knowledge as recommended in the current MRCOG syllabus, the book tests the trainee with questions in obstetrics and gynaecology and those aspects of medicine, surgery and paediatrics relevant to the practice of both. The book is divided into four key parts, one for each style of question, each of which opens with an introductory section on how to approach the exam and, crucially, how to fail it. # Part 1 provides a series of short answer practice papers. Common mistakes are highlighted as well as a list of key points required to get full marks. A sample answer is given for each question # Part 2 contains a mock paper for the MCQ part of the exam, containing 225 questions with answers and helpful annotations # Part 3 introduces the EMQ, giving the reader 40 questions in the style of the examination, together with answers and explanatory notes # Part 4 is devoted to the OSCE, with descriptions of 20 sample stations assessing different aspects of clinical practice, advice on how to tackle these, and suggested marking schemes. Throughout, questions have been designed to test factual knowledge and understanding, problem-solving ability, and clinical and communication skills.

Notes and CD examination aids, for the Part 1 MCQ papers from the Royal College of Physicians examinations.

In this second edition, new questions have been added and existing material has been updated. The book's hybrid format bridges the gap between standard MCQ books and textbooks. It contains 280 exam-based paediatric MCQs written by a team of subject specialists. Each question is accompanied by the correct answer, plus a page-long subject summary focusing on the specific topics likely to occur in the examination, including lists, mnemonics and bullet points. This new format is a response to requests from exam candidates for longer teaching notes to counteract the need to refer to unnecessarily detailed textbooks.

MRCP (Paediatrics)

Volume 2: Practice Examinations

For MRCP (part 1) & Arab Board Examination

Extensive and repetitive practice in answering sample MCQs provides the examination candidate with both a good reflection of current knowledge as well as an invaluable understanding of examination technique. The use of this volume of paediatric MCQs will provide a good framework for revision and highlight any areas where the MRCP candidate will need to refer back to the comprehensive reference texts. 'Paediatric MCQs for Postgraduate Examinations' provides the candidate for the MRCP Part 1 Paediatrics with a comprehensive review of the subject: Volume 1 covers the entire body system and Volume 2 provides some mock examinations. Used together, these two books offer a complete revision plan and should be an essential purchase for any student wishing to sit the higher Membership examination in Paediatrics.

This text contains authentic MRCP Part 1 Paediatric practice papers which reflect the true content of the Royal College examination. Each exam contains a representative selection of questions on general medicine and on paediatric specialties.

Comprising five exam papers, each with a random selection of 60 questions which allow readers to assess their knowledge of a wide range of topics, this text is aimed at students who will be sitting the Part 1 Examination for the Paediatric Membership of the Royal College of Physicians. The answers to the questions are given, along with explanations to assist with filling in the gaps of the reader's knowledge. A PC disk is included for self-assessment purposes.

The SRT Collection of 600 Questions with Explanatory Answers

MCQs for the MRCP Part 1 - Paediatrics

QNotes for the MRCP with CD-ROM, Part 1

H, H & Z MCQs in Paediatric

This book provides 300 MCQs for the MRCPCH, together with referenced explanatory notes. The free QBase CD-ROM included with the book considerably enhances its versatility and utility and makes this package much more than just a book of MCQs. The CD-ROM can be installed in seconds and gives the reader an incredible range of options. Not only can the reader practice the set exams, but the program will mark these exams, allow the reader to customize exams to focus in on areas req uiring further revision, shuffle the question stems (A-E) to prevent the candidate from memorising 'patterns' of answers and advise on examination strategy. It also has the facility to print out and store test results and provide helpful notes on each question. The CD-ROM also now gives a subject-based as well as an overall analysis of each exam.

This new edition lists topics that have occurred in the MRCP Part 1 Paediatric examinations in the six years since publication of the first edition. The book is designed to enable candidates to structure their revision efficiently, concentrating on the topics which recur most frequently. Exam topics in every subject category are listed in chronological order and revision checklists, grouping essential revision topics into easy groups for study, are provided for every subject. Also included is an MCQ practice paper with 60 questions and teaching notes.

This book is the unique book with combination of colour atlas of Paediatric surgery and MCQs in Paediatric surgery. In Colour Atlas patient's photos, X-rays, CT scan and MRI can be seen. Among patient's photos there are pre-operative and per-operative photos, as well as photos of complications. My other book "MCQs in Paediatric surgery" also has been merged in this book. This MCQs book is unique in sense, that it provides lot of specific paediatric surgical knowledge directly in MCQs with short and to the point explanations. Atlas gives classical features of disease in images that helps in spot diagnosis of disease. Little explanation about the image is given at side. Nearly all the paediatric surgical cases are gathered at one place. In most of the clinical examination discussion starts from apparent finding, in this regards, this atlas greatly helps in spot diagnosis of the cases.

MCQs help in passing theoretical examination. This book is beneficial for all paediatric Surgery examination, general surgical examination to cover portion of pediatric surgery and pediatric medicine examination to cover differential diagnosis of surgical conditions. This Atlas also gives an idea to general practitioner about clinical spot diagnosis of paediatric surgical cases and medical students about awareness of paediatric surgical conditions

Matched to the latest Royal College curricula in coverage and format, this dedicated resource provides readers with an accurate, authoritative and evidence-based companion to the MRCP Part 1.*

*This hybrid text aims to bridge the gap between standard MCQ books and textbooks. Each question is accompanied by the correct answer plus a page-long subject summary focusing on the specific topics likely to occur in the examination, including lists, mnemonics and bullet points. There are 300 MCQs on paediatric topics which recur in the official examination, with correct answers and page-long summary sections for every question. A selective reading list highlights the most relevant textbooks and there is also a revision checklist for structured revision planning. The MCQ Revision Index provides easy access to questions relating to specific topics. Single best answer (SBA) questions have been introduced into the FRCR Part 2A examination of the Royal College of Radiologists in the UK for the first time. This book of 600 SBA questions and explanatory answers has been written to aid students preparing for the exam by current trainees in clinical radiology, coordinated through The Society of Radiologists in Training (SRT). Questions are grouped by topic and each topic is split into three papers of 70 questions, with explanations separated into chapters to enable readers to either attempt a whole mock exam paper or to browse question by question. The book is a bridge between a pure revision aid and a reference text, including a bibliography of useful references for further information. Candidates for other professional exams in Radiology will find the text useful, as will and those from other specialties wishing to explore the radiological aspects of their syllabus in greater depth. This is a companion volume to Final FRCR Part A Modules 4-6 Single Best Answer MCQs by the same team.*

Part 1 Paediatric MCQs with Individual Subject Summaries

QBase Paediatrics: Volume 1, MCQs for the MRCPCH

Designed for people taking the diploma leading to membership of the Royal Colleges of Physicians of the UK, this second edition features multiple-choice questions on general medicine and paediatrics to assist candidates' revision for the papers available in the two subjects from October 1993.

This is an indispensable companion to the 'Sunflower book' - the highly acclaimed Illustrated Textbook of Paediatrics (6th Edition). It is essential for those who wish to test or improve their learning, or for exam revision for undergraduate or early postgraduate speciality exams. It includes high quality questions, some including images or diagrams, on important topics covering the paediatrics and child health curriculum. Explanations about both correct and incorrect answers are provided. The authors are highly experienced examiners and question writers, ensuring that the questions are similar to those encountered in exams or help explain difficult topics. Over 250 Single Best Answer questions Over 200 question stems for Extended Matching questions Explanations provided not only of the correct but also of incorrect answers Clinical photographs included to ask questions about clinical signs

Here is a collection of multiple-choice questions for the Membership of The Royal College of Paediatrics and Child Health Part 1 examination. There are over 300 questions organised into 10 sections and the mixture of questions attempts to reflect the wide range of topics in the current syllabus. Each question has an explanatory answer, making this book an ideal revision guide for the MRCPCH examination.
