Bringing much-needed specificity to the study of neoliberalism, 'Logics of Empowerment' fosters a deeper understanding of development and politics in contemporary India.

This book presents the structure of Hindi keeping in view the sociolinguistic context of language use. It includes descriptions of sounds, devices of word formation, rules of

phrase and sentence construction and conventions of language use in spoken and written texts incorporating the insights gained by application of recent linguistic theories. The account presented here, however, is free from abstruse technical vocabulary and modes of presentation that aim at justifying a particular linguistic model. This volume is primarily designed as a source of reference for linguists and educators who want to be better informed about the forms and functions of Hindi, and a resource for students and teachers of Hindi. Hindi, the official language of the Republic of India, is the second most widely spoken language with approximately three hundred and fifty million speakers. In its diasporic contexts, it is spoken in Africa, Australia, Europe, Fiji, Guyana, Surinam, Trinidad, United Arab Emirates, United Kingdom and United States. An Indo-European language by genetic affiliation, Hindi shares many characteristics with Austro-Asiatic, Dravidian, and Sino-Tibetan languages of the subcontinent. In addition, Hindi has assimilated features of Arabic, Persian and English in a variety of its functionally determined styles.
