In light of the curious compulsion to stress Protestant dominance in America's past, this book takes an unorthodox look at religious history in America. Rather than focusing on the usual mainstream Protestant churches--Episcopal, Congregationalist, Methodist, Baptist, and Lutheran--Moore instead turns his attention to the equally important "outsiders" in the American religious experience and tests the realities of American religious pluralism against their history in America. Through separate but interrelated chapters on seven influential groups of "outsiders"--the Mormons, Catholics, Jews, Christian

Scientists, Millennialists, 20th-century Protestant Fundamentalists, and the African-American churches--Moore shows that what was going on in mainstream churches may not have been the "normal" religious experience at all, and that many of these "outside" groups embodied values that were, in fact, quintessentially American.

Reflections on President Barack Obama
By: Dr. Ray C. Minor This compelling critique offers fresh and impartial commentary on former President Barack Obama and the politics surrounding him as the first president of color of the United States. It praises the President when warranted and scolds him and his political foes when appropriate. A critical comparison is made between Obama and Lincoln and Obama and Johnson. The essay questions the hope and change promised by candidate Obama, and also casts doubt on the new Trump

In this volume some of the leading scholars working in Native North America explore contemporary perspectives on Native culture, history, and representation. Written in honor of the anthropologist Raymond D. Fogelson, the volume charts the currents of contemporary scholarship while offering an invigorating challenge to researchers in the field. The essays employ a variety of theoretical and methodological approaches and range widely across time and space. The introduction and first section consider the origins and legacies of various strands of interpretation, while the second part examines the relationship among culture, power, and creativity. The third part focuses on the cultural construction and experience of history, and the volume closes with essays on identity, difference, and appropriation in several historical and cultural

contexts. Aimed at a broad interdisciplinary audience, the volume offers an excellent overview of contemporary perspectives on Native peoples.

This exciting and much-anticipated Second Edition of *Interracial Communication: Theory into Practice* guides readers in applying the valuable contributions of recent communication theory to improving everyday communication among the races. Authors Mark P. Orbe and Tina M. Harris offer a comprehensive, practical foundation for dialogue on interracial communication, as well as a resource that stimulates thinking and encourages readers to become active participants in the solution process. Part I of the book provides a foundation for studying interracial communication and includes chapters on the history of race and racial categories, the importance of language, the development of racial and cultural identities, and current and classical theoretical approaches. Part II applies these concepts and theories to interracial communication practices in specific, everyday contexts: friendships; romantic relationships; organizational, public, and group settings; and the mass media.

Reflections on President Barack Obama

As president of Shell Oil, John Hofmeister was known for being a straight shooter, willing to challenge his peers throughout the industry. Now, he's a man on a mission, the founder of Citizens for Affordable Energy, crisscrossing the country in a grassroots campaign to change the way we look at energy in this country. While pundits proffer false new promises of green energy independence, or flatly deny the existence of a problem, Hofmeister offers an insider's view of what's behind the energy companies' posturing, and how politicians use energy misinformation, disinformation, and lack of information to get and stay elected. He tackles the energy controversy head-on, without regard for political correctness. He also provides a new framework for solving difficult problems, identifying

Invoking the strong ties they sense between the courses of their lives and their careers, the sixteen historians of religion who have contributed to *Autobiographical Reflections on Southern Religious History* share their thoughts and motivations. In these highly personal essays, both pioneering and promising young scholars discuss their work and interests as they recall how the circumstances of their upbringing and education steered them toward religious history. They tell of their own time and place and of their growing awareness of how religion ties into larger social issues: gender, class, and, most notably, race. Indeed, one essay begins, "I was asked to write about why I came to study religion in the South. It was then I realized that it was because my grandfather had been lynched." Lutheran, Jewish, Catholic, Methodist, and Episcopal viewpoints are represented as, of course, are Baptist. Some contributors have stood in the pulpit; others at least commenced their higher education with that aim. While some contributors were born and reared, and now work in the Bible Belt, others are outsiders--physically, philosophically, or both. Some came from intellectual traditions; others were the first in their

family to attend college. Despite their common interest in its history, southern religion is anything but an intellectual abstraction for the contributors to this book. It is a potent force, and here sixteen men and women offer themselves as proof of its power to shape lives.

"In One eloquent essay after another, some of the wisest historians of our time write American history in a grand cosmopolitan context. From the era of discovery to the present, histories that we thought we knew—of labor, of race relations, of politics, of gender relations, of diplomacy, of ethnicity—are more richly understood when causes and consequences are traced throughout the globe. One emerges invigorated, ready to welcome a new American history for a new international century."—Linda K. Kerber, author of *No Constitutional Right to Be Ladies: Women and the Obligations of Citizenship* "Rethinking American History in a Global Age is an extremely stimulating and thought-provoking collection of essays written by leading historians who offer wider contexts for illuminating the traditional themes and issues of American national history. Particularly impressive is the book's combination of caution and original, sometimes daring insights."—David Brion Davis, author of *In the Image of God: Religion, Moral Values, and Our Heritage of Slavery* "For decades American historians have been urging one another

Thomas Bender's unique volume includes not only essays theorizing such efforts and essays exemplifying such work at its most successful and its most provocative, it also provides more skeptical assessments questioning whether American historians can meet the challenge of overcoming our longstanding national preoccupations. Rethinking American History in a Global Age is an indispensable book that will shape the work of a rising generation of historians whose horizons will extend beyond our own shores."—James T. economic, and cultural forms? Karl Marx launched the modern debate on determinism with his provocative remark that "the hand-mill gives you society with the feudal lord; the steam-mill, society with the industrial capitalist," and a classic article by Robert Heilbroner (reprinted here) renewed the debate within the context of the history of technology. This book clarifies the debate and carries it forward. Marx's position has become embedded in our culture, in the form of constant reminders as to how our fast-changing technologies will alter our lives. Yet historians who have looked closely at where technologies really come from generally support the proposition that technologies are not autonomous but are social products, susceptible to democratic controls. The issue is crucial for democratic theory. These essays tackle it head-on, offering a deep look at all the shadings of determinism and assessing determinist models in a wide variety of historical contexts. Examining post- 1945 American and Eastern European interpretive novels in dialogue with each other and with postfoundational democratic theory, *The Underside of Politics* brings to light the ideas, forces, and circumstances that shattered modernity's promises (such as secularization, autonomy, and rights) on both sides of the Iron Curtain. In this context, literary fictions by Kundera and Roth, Popescu and Coover, Kiš and DeLillo become global as they reveal the trials of popular sovereignty in the "fog of the Cold War" and trace the elements around which its world discourse or global picture is constructed: the atom bomb, Stalinist show trials, anticommunist propaganda, totalitarian terror, secret military operations, and political targeting.

Through penetrating analysis of twentieth-century historical fiction from Central America this book asks: why do so many literary texts in the region address historical issues? What kinds of stories are told about the past when authors choose the fictional realm to represent history? Why access memory through fiction and poetry? Nicole Caso traces the active interplay between language, space, and memory in the continuous process of defining local identities through literature.

“An extremely good writer, [Ayers] is well worth reading . . . on the South and Southern history.”—Stephen Sears, Boston Globe ***The Southern past has proven to be fertile ground for great works of history. Peculiarities of tragic proportions—a system of slavery flourishing in a land of freedom, secession and Civil War tearing at a federal Union, deep poverty persisting in a nation of fast-paced development—have fed the imaginations of some of our most accomplished historians. Foremost in their ranks today is Edward L. Ayers, author of the award-winning and ongoing study of the Civil War in the heart of America, the Valley of the Shadow Project. In wide-ranging essays on the Civil War, the New South, and the twentieth-century South, Ayers turns over the rich soil of Southern life to explore the sources of the nation's and his own history. The title essay, original here, distills his vast research and offers a fresh perspective on the nation's central historical event. A new discussion of racism in America that***

focuses on how white people have been affected by their own racism and how it impacts upon relations between Blacks and Whites.

Growing up in a somewhat ethnic community during the depression and its aftermath and the experience of WWII left me with lasting impressions of learning how to make ends meet, the value of family ties and an appreciation of the "simple" things in life. My story is not unique, yet provides memorable insights into growing up in a specific community during a specific time in American history. By today's standards my family was poor and yet, even though money was not plentiful, we were not deprived. Our home life balanced discipline and "freedom" to act, providing a strong moral compass. We were loved and cared for, and the strong German and Swedish influence resulted in a reserved demonstration of affection and feelings. Unspoken expectations set the standards by which we ventured into new and unfamiliar territory: "honesty"; loyalty to one's family and friends; educational growth beyond high school; "sticking up" for the rights of self and others; how to act "properly" in public; and adaptability and accommodation to new and differing circumstances. "Growing Up in Jamestown, New York" is my reflection on the years of 1940-1955. These years are meaningful and memorable for me. I hope my grandchildren and great grandchildren and grand nieces and nephews will find insights, understanding and humor in a piece of their own histories.

Frederick Jackson Turner's 1893 essay on the

history of the United States remains one of the most famous and influential works in the American canon. That is a testament to Turner's powers of creative synthesis; in a few short pages, he succeeded in redefining the way in which whole generations of Americans understood the manner in which their country was shaped, and their own character moulded, by the frontier experience. It is largely thanks to Turner's influence that the idea of America as the home of a sturdily independent people - one prepared, ultimately, to obtain justice for themselves if they could not find it elsewhere - was born. The impact of these ideas can still be felt today: in many Americans' suspicion of "big government," in their attachment to guns - even in Star Trek's vision of space as "the final frontier." Turner's thesis may now be criticised as limited (in its exclusion of women) and overstated (in its focus on the western frontier). That it redefined an issue in a highly impactful way - and that it did so exceptionally eloquently - cannot be doubted.

During its initial invention, the discipline was founded to justify the study of rhetoric in a field of white male scholars analyzing significant speeches by other white men, yielding research that added to myths of Lost Cause ideology and a uniquely oratorical culture. *Reconstructing Southern Rhetoric* takes on the much-overdue task of reconstructing the way southern rhetoric has been viewed and critiqued within the communication discipline. The collection reveals that southern rhetoric is fluid and migrates beyond geography,

is constructed in weak counterpublic formation against legitimated power, creates a region that is not monolithic, and warrants activism and healing. Contributors to the volume examine such topics as political campaign strategies, memorial and museum experiences, television and music influences, commemoration protests, and ethnographic experiences in the South. The essays cohesively illustrate southern identity as manifested in various contexts and ways, considering what it means to be a part of a region riddled with slavery, Jim Crow laws, and other expressions of racial and cultural hierarchy. Ultimately, the volume initiates a new conversation, asking what southern rhetorical critique would be like if it included the richness of the southern culture from which it came.

What is the purpose of studying history? How do we reflect on contemporary life from a historical perspective and can such reflection help us better understand ourselves, the world around us, and the God we worship and serve? In this introductory textbook, accomplished historian John Fea shows why Christians should study history, how faith is brought to bear on our understanding of the past, and how studying the past can help us more effectively love God and others. Deep historical thinking can relieve us of our narcissism; cultivate humility, hospitality, and love; and transform our lives more fully into the image of Jesus Christ.
