*Acemoglu, Laibson, List: An evidence-based approach to economics Throughout Economics, 2nd Edition, authors Daron Acemoglu, David Laibson, and John List use real economic questions and data to help students learn about the world around them. Taking a fresh approach, the authors use the themes of optimisation, equilibrium, and empiricism to illustrate the power of simple economic ideas, and their ability to explain, predict, and improve what happens in the world. Each chapter begins with an empirical question that is later answered using data in the Evidence-Based Economics feature. As a result of the text's practical emphasis, students learn to apply economic principles to guide the decisions they make in their own lives. The teacher guide accompanies the student activities books in macro and microeconomics for teaching collegelevel economics in AP Economics courses. The publication contains course outlines, unit plans, teaching instructions, and answers to the student activities and sample tests.*

the term a monumental scholarly achievement--monumental in its sheer bulk, monumental in the definitiveness of its treatment of innumerable issues, large and small . . . monumental, above all, in the theoretical and statistical effort and ingenuity that have been brought to bear on the solution of complex and subtle economic issues." Friedman and Schwartz marshaled massive historical data and sharp analytics to support the claim that monetary policy--steady control of the money supply--matters profoundly in the management of the nation's economy, especially in navigating serious economic fluctuations. In their influential chapter 7, *The Great Contraction*--which Princeton published in 1965 as a separate paperback--they address the central economic event of the century, the Depression. According to Hugh Rockoff, writing in January 1965: "If Great Depressions could be prevented through timely actions by the monetary authority (or by a monetary rule), as Friedman and Schwartz had contended, then the case for market economies was measurably stronger." Milton Friedman won the Nobel Prize in Economics in 1976 for work related to *A Monetary History* as well as to his other Princeton University Press book, *A Theory of the Consumption Function* (1957).

By applying an analytical framework to the patient, stepped-out development of models, Frederic Mishkin draws students into a deeper understanding of modern monetary theory, banking, and policy. His landmark combination of common sense applications with current, real-world events provides authoritative, comprehensive coverage in an informal tone students appreciate.

Pearson FlexText ...setting you up for success in school and at work The study of economics requires a different style of thinking from what you may encounter in other courses.

Economists make extensive use of assumptions to break down complex problems into simple, analytically manageable parts. This analytical style, while not ultimately more demanding than the styles of thinking in other disciplines, feels unfamiliar to most students and requires practice. Our experience has taught us that what first-year economics students want most from a FlexText is help in mastering course material to do well on examinations. We have developed this FlexText to respond specifically to that demand.

These events are sufficiently important to be incorporated into the body of the text rather than just added as boxed-off features. In particular, they stress the lesson policymakers recently learned the hard way: What happens in the ever-expanding part of the financial system that does not involve commercial banks is of vital importance to the entire economy. This exciting text presents students with the underlying economic explanations of why the financial system is organized as it is and how the financial system is connected to the broader economy. Due to the overwhelming success of their principles of economics textbook, Hubbard and O'Brien have employed a similar approach in this textbook: They provide students with a framework that allows them to apply the theory that they learn in the classroom to the practice of the real world. 0133148688 / 9780133148688 Money, Banking, and the Financial System Plus NEW MyEconLab with Pearson eText -- Access Card Package Package consists of: 0132994917 / 9780132994910 Money, Banking, and the Financial System 0133020002 / 9780133020007 NEW MyEconLab with Pearson eText -- Access Card -- for Money, Banking, and the Financial System Principles of Economics 2e Principles, Applications and Tools Macroeconomics ; Australasian Edition**
